- 24) "% Uptime" means ratio of 'up time' (in minutes) in a quarter to Total time in the quarter (in minutes) multiplied by 100.

SECTION-II

INTRODUCTION

&

PROJECT DESCRIPTION

2.1 Introduction

The Gujarat Informatics Limited (GIL), on behalf of Department of Science and Technology, Government of Gujarat, is issuing this **“Request for proposal (RFP) for Selection of Service Provider for Providing Wi-Fi services on Service/Rental Model Including (Design, Built, and Operations & Management) for State-wide Public Wi-Fi Hotspot’s under Gujarat State Urban Area Network (GSUAN)”**, across the state of Gujarat. The Wi-Fi hotspots are aimed at providing the Internet access to citizens at public places. Once fully deployed, the Project will serve more than 3 lakh concurrent users.

The main objective of the project is to establish and provide Public Internet Access infrastructure to its citizens, Tourists, students and empower them as netizens by providing reliable and convenient Internet Wi-Fi connectivity at cities.

In addition to the above this project will help to enable and spread the following:

- Internet access facility
- Education and Digital Literacy
- Quick Access to Information
- Awareness and the information exchange digitally
- Convergence and utilization of the Government Services to its Citizens

2.2 Project Description:

The project requires, setting up of Wi-Fi infrastructure at locations such as City Bus Stand, Colleges, Taluka Office, City Chowk, Jan Seva Kendra, City Civic Center, Dist. Hospitals, Higher Secondary School, Municipal Corporation offices etc. through deployment of wireless Access Point’s for providing internet access. The project shall Initially cover 67 cities of the State and approximately 5 to 7 public Wi-Fi Hotspot’s in each city.

The project shall be based on the service model wherein the bidder will have to provide Wi-Fi Services through such Hotspots which shall include all required Hardware, software and internet bandwidth.

To monitor the services the TENDERER will appoint a Third-party agency which shall monitor the day to day operations of the project, to enable the same, the bidder will have to provide the access to its NMS with admin rights at the State Data Center to monitor, check and generate various MIS reports like quantum of traffic, Bandwidth availability & utilization etc.

- 6) Data centre/NOC where the central infrastructure will be hosted for providing Wi-Fi services should be geographically situated/located in the territory of India.

SECTION-IV
SCOPE OF WORK

4.1. Scope of Work

Department of Science & Technology, Government of Gujarat intends to create a state of art GSUAN for providing free internet to the citizens of Gujarat by setting up of public Wi-Fi Hotspots spread across multiple cities in the state of Gujarat. Proposals are sought from eligible bidder for providing Wi-Fi services on Service/Rental Model Including (Supply, Installation, Commissioning and Operations & Management) for State-wide Public Wi-Fi Hotspot's.

The scope of work broadly covers the followings:

- 1) Bidder is responsible for providing end- to -end solution for setting-up (required Hardware at central & edge locations, software, Internet Bandwidth, SMS & payment gateway) and O&M of Wi-Fi hotspots at multiple cities across the state.
- 2) **Design parameters of the Proposed solution:**
 - i. The main scope will be to design a State-Wide Wi-Fi Infrastructure across multiple cities with a single SSID
 - ii. The Wi-Fi infrastructure shall include multiple zones/hotspots in every city. Approximately 5-7 zones/hotspots and each Hotspot shall contain 2-8 Access Points in a mix of Indoor and outdoor Access points at the locations specified in **Annexure A** of this document.
 - iii. It is envisaged that the Hotspot's created shall provide seamless coverage within its range and provide seamless transition within the Hotspot as well as between different Hotspot of the proposed Wi-Fi Infrastructure.
 - iv. The Authentication periodicity of the Internet users should be configurable based on policy such as time duration, no. of days etc.
 - v. The bidder will have the flexibility to provide internet bandwidth at zone/City level
- 3) The bidder will have to install the Access Points (Indoor and outdoor) at suitable location to receive the maximum coverage of the Hotspot. However, in case of feasibility problem AP's (Outdoor) should be mounted on a pole of having outer height of Min 5 ft. over the roof or wall as per site requirement. Further, bidder is responsible for supply, installation, commissioning and maintenance of such mounting structure for AP's like Pole (as per requirement) along with required clamp, cable (Active & Passive) and accessories at each site/location.
- 4) The proposed solution should allow the TENDERER to have the user management and monitoring rights for the Wi-Fi network created for the project.
- 5) **The access to the User Management/Monitoring Module** for the TENDERER or its authorised agency should be given as a part of the solution and should support features such as Dash board, SLA Monitoring, MIS Reports, User authentication through OTP (One Time Password) on mobile no. and email.
- 6) Initially, the plan is to provide internet access free of cost to the end users, however in future, the TENDERER may decide to charge beyond the capped usage limit, therefore the proposed solution should be capable to allow users to buy in the extras usage access.
- 7) The bidder will be responsible for end to end process and operations of Wi-Fi services including SMS and payment Gateway and other associated services. The bidder will also have to provide a centralized billing mechanism based on the Wi-Fi usage under this project.
- 8) **Logs of Wi-Fi usage:**
 - i. The Bidder shall be further responsible for keeping log of Wi-Fi services to be utilized by the end users such as IP details, URL Visited, time stamp/time details, End User Authentication, Mobile No. MAC & IP addresses, access time, duration, data consumed, etc. to meet the compliance with all Regulatory and Legal guidelines issued by Department of Telecommunications/TRAI from time to time.
 - ii. The TENDERER may at any time ask the bidder to provide logs from the storage and maximum log retrieval time allowed is 4 hours.

- iii. The bidder is free to maintain the logs at the state/district/regional level, however the same has to be fetched and provided to the TENDERER on a single platform.
- 9) **The Web & Mobile App based user access Portal (Captive Portal) Solution should have the following functionality:**
- a) User registration through captive portal and mobile application.
 - b) The Web/WAP page should support various handheld devices such as Smart Phone, Tablets etc.
 - c) For logging into the AP at client end, the bidder will make a mobile app (Android, ios, windows platform) to allow signing into the network through mobile app.
 - d) It should allow customization like branding, Publication of information, payment options, user manual & FAQ etc. on captive portal/Mobile App throughout the contract period.
- 10) The solutions should be capable to categorise the users, as and when required by the TENDERER.
- 11) The proposed solution should be capable of generating various MIS reports on a dashboard in graphical/ pictorial representation such as:
- i. No. of Users with details: IP details, MAC ID, Access Point, Channel Wise etc.
 - ii. Internet Usage: User wise/ Access Point/ Location wise etc.
 - iii. Total Bandwidth Available on each AP/Hotspot and its Usage
 - iv. All Reports related to SLA & project Monitoring.
 - v. Change management reports: Configuration, firmware, patches, upgrades etc.
 - vi. Data usage and billing details
 - vii. Geography based grouping of all the reports i.e. Per Hotspot, Per City, Per Zone, Per District, Per Cluster, State etc.
 - viii. Any other reports that may be required from time to time
- 12) Proposed wireless solution is intended to provide 24x7 wireless Internet access at all Site(s).
- 13) The Raw electricity shall be provided by the TENDERER at all the prescribed Site/locations. However, it will be the bidder's responsibility to provide and install a meter/ sub meter at all such locations and extend the electrical power at each Site/locations as per the actual requirement.
- 14) TENDERER will reimburse the one-time charges paid by the bidder for installation of electricity Meters at the site/locations. However, any type of security deposit paid by the bidder will not be reimbursed by the TENDERER. Bidder is also responsible for payment of recurring charges to the GEB/electricity provider based on the actual power consumption at each site/location.
- 15) The TENDERER is also in the process of getting in to an arrangement with the Electricity Department for paying recurring electricity charges on lumpsum/subsidized rates for providing such citizen centric services at free of cost. Upon successful arrangement of the same TENDERER will inform the same to the bidder and bidders needs to deposit the actual charges with TENDERER and TENDERER will in turn pay it to the electricity department on agreed terms.
- 16) **Internet Bandwidth Provisioning:** Minimum internet bandwidth is to be provided as per the Annexure A of this RFP, therefore the solution has to be designed by the bidder in such a way that the user gets download internet speed of at least twice than the Upload Speed. internet bandwidth. The Third-party agency appointed by the TENDERER will randomly check the availability of the required bandwidth at any of the hotspot, in case if it is found to be less than the ordered bandwidth more than 3 times in any Quarter, the TENDERER may terminate the contract and forfeit the PBG.
- 17) Proposed wireless solution should conform to applicable WPC regulations for use of license-free spectrums in terms of EIRP. A declaration to this effect must be submitted which must be supplemented by periodic compliance reports during the project period.
- 18) The number of Site/locations mentioned in this RFP may increase during the duration of the project, therefore for the future orders, the bidder may supply Access Points of any make and model from the OEM featured in Gartner Magic Quadrant for wired and wireless LAN, 2016 complying to the technical specification of the RFP at the discovered prices only. The Bidder shall adhere to all the technical as well as commercial terms irrespective of the location of the Site.

- 19) The Bidder will have to carry out an initial assessment of the site locations. The tentative list of locations is mentioned in **Annexure A**.
- 20) **Wi-Fi Zone Signage's:** The bidder will also have to provide and install and maintain Wi-Fi Hotspot/Zone Signage/Banner at each AP/Hotspot as the case may be confirming minimum specifications mentioned below:
 - a) The sign board material should be made of Sun Board with UV printing on both sides (as the case may be) for greater visibility
 - b) The Size should be a minimum of 2 Ft (L) x 1 Ft (B) or bigger for clearly informing public of the existence of Wi-Fi Hotspot/Zones.
 - c) Min of 2 Nos. of such Sign Board/Banners has to be installed per Access Point and not less than 4 Nos. of such signboards/banners per hotspot/zones, However the bidder will have to consider the sizing ensuring complete coverage of the Hotspot/zone area.
 - d) The Content to be printed on the banner/sign Board shall approved by the TENDERER.
- 21) **Help Desk Support:**
 - a) The TENDERER will provide centralized Helpdesk for assistance or registration of user complaints through various medium like Voice Call/SMS/Email of ticket generation system. Bidder is responsible for coordination with the Helpdesk operator for early resolution of the complaints/request booked at the centralized helpdesk provided by the TENDERER.
 - b) On ticket generation at the centralised helpdesk, the calls pertaining to the Wi-Fi infrastructure created under this RFP will be allotted to the bidder for further resolutions of the complaints booked.
 - c) After rectifying the said compliant, bidder is required to update the resolution/call-closure on the centralized helpdesk and the confirmation for the rectification shall be done on visibility in the deployed NMS.
 - d) The bidder will further have to provide and publish a trouble shooting guide and necessary training for the existing Helpdesk Operators to provide L1 level support to the end user.

4.2. Functional/ Technical Requirement:

Below mentioned are minimum required functional and technical requirement of the Key components of the proposed solution.

4.2.1 Access Point:

- a) Access point shall allow wireless access through various types of devices like smart phones, laptops, tablets, desktops etc.
- b) **Every Access point should support:**
 - i. Should support IEEE 802.11 ac standard with dual radio 2.4 Ghz and 5 Ghz
 - ii. Minimum data transfer rate of 150 Mbps
 - iii. Minimum 70 Meters radial coverage for Outdoor Access Point
 - iv. Minimum 40 concurrent users @ each radio channels
 - v. Should support min 4 SSID
 - vi. Should provide seamless roaming within the network
 - vii. Interference detection and avoidance for both Wi-Fi and non-Wi-Fi interferes
 - viii. Should also allow Signal rejection for 3G/LTE/WiMAX in a co-located environment
 - ix. Operating ambient temperature for Outdoor AP should be 0° to 55°C
- c) The Outdoor Access point shall be IP56 or better rated for dust and water Ingress protection.
- d) The Outdoor AP should provide Omni directional antenna as required.

4.2.2 Features of the Wi-Fi Solution:

- a) Bidder has to provide functionalities of all the components like WLAN Controller, Authentication, Authorization and Accounting (AAA), RADIUS, SMS Gateway, Payment Gateway, Captive Portal, customization and branding of services.
- b) The proposed solution should be able to manage the access points installed during the contract period and its concurrent users, with the subsequent expansion plan and coverage of the Wi-Fi Hotspot, the system should be able to cater to the increased no. of AP's and users accordingly.
- c) The successful bidder will have to ensure seamless integration of its AAA platform with the supplied Access points. The user Authentication should be done through SMS based OTP sent to the user's mobile number and email. SMS push to the telecom service provider should happen in less than 5 seconds.
- d) The solution should have an integrated security capabilities such as content filtering, blocking of malicious attacks, etc. to provide security to the overall network infrastructure.
- e) Solution should allow policy level blocking i.e. initial policies to begin with should be to block pornography, torrents, pirated, poker/casino related website and contents.
