SECTION-I

KEY INFORMATION

&

INSTRUCTIONS

Important Dates

Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure on behalf of Gujarat ISP Services Limited (GISL).		
Sl. No.	Information	Details
1.	Contract Period	5 Years
2.	Last Date, Time for submission of written queries for clarification only by e-mail as per predefine format.	13/09/2022 up to 1500 hrs. Email: viveku@gujarat.gov.in; icto6-dit@gujarat.gov.in; dilipk@gujarat.gov.in
3.	Pre-bid meeting Date, Time, and Venue.	15/09/2022 up to 1500 hrs. at GIL. Address: Gujarat Informatics Ltd. Block No. 2, 2nd Floor, C & D Wing, Karmayogi Bhavan, Sector - 10 A, Gandhinagar – 382010, Gujarat.
4.	Last date and time for submission of EMD in GIL physically along with Self Declaration.	27/09/2022 up to 1500 hrs.
5.	Last Date and Time for the Submission of Proposal (Technical and Commercial) (Online on GeM Portal)	27/09/2022 up to 1500 hrs.
6.	Place, Date and Time for opening of Technical Proposals	27/09/2022 at 1600 hrs. Gujarat Informatics Ltd. Block no. 2, 2nd Floor, Karmayogi Bhavan, Sector-10A, Gandhinagar-382010, Gujarat
7.	Contact person for queries	Shri Vivek Upadhyay /Shri Maulik Chauhan, ICT Officer DGM (Technical), Gujarat Informatics Ltd. Block No.2, 2nd Floor, D Wing, Karmyogi Bhavan, Sector 10A, Gandhinagar – 382010 E-mail: viveku@gujarat.gov.in ; icto6-dit@gujarat.gov.in dilipk@gujarat.gov.in
8.	Address for communication	Shri Vivek Upadhyay/ Shri Maulik Chauhan, ICT Officer Deputy General Manager (Technical), Gujarat Informatics Ltd. Block No.2, 2nd Floor, D Wing, Karmyogi Bhavan, Sector 10A, Gandhinagar – 382010 E-mail: viveku@gujarat.gov.in ; icto6-dit@gujarat.gov.in
9.	Place, Date & Time of opening of Commercial stage	Gujarat Informatics Ltd. Block No.2, 2nd Floor, D Wing, Karmyogi Bhavan, Sector 10A, Gandhinagar – 382010

		Date and time for opening of Financial/commercial proposal will be intimated to qualified bidder.
10.	Bid validity	180 days
11.	Bid security (EMD)	Rs. 1,00,00,000/- (One Crore Rupees only)

1.1 INFORMATION REGARDING THE RFP

- 2 Gujarat Informatics Limited (hereinafter referred to as “GIL”), on behalf of Gujarat ISP Services Limited (hereinafter referred to as “GISL”) invites online bids for “Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure on behalf of Gujarat ISP Services Limited (GISL).” (As specified in Bid Format).

Actual award of contract will follow the conditions as per this document. This document is given for enabling the bidders to know the tender conditions so as to guide them in filling up the technical bid and financial bid for the said work.

- The bidders may download the tender document from website of Gujarat Informatics Limited (<https://gil.gujarat.gov.in>) as well as from <https://gem.gov.in>
- **Bidder to note that bid will be evaluated on the basis of this document.**
- This RFP document is not transferable.
- Bidders shall submit EMD of Rs. 1,00,00,000/- (One Crore Rupees only) in the form of Demand Draft OR in the form of an unconditional Bank Guarantee (which should be valid for 6 months from the last date of bid submission) of any Nationalized Bank including the public sector bank or Private Sector Banks or Commercial Banks or Co-Operative Banks and Rural Banks (operating in India having branch at Ahmedabad/ Gandhinagar) as per the G.R. no. EMD/04/2022/0002/DMO dated 20.05.2022 issued by Finance Department or further instruction issued by Finance department time to time; in the name of “Gujarat Informatics Ltd.” payable at Gandhinagar (as per prescribed format given at Section 10) and must be submitted along with the covering letter. MSME is Exempted only when MSME unit is OEM and providing end to end solution by themselves only.

OR

Bidders can also submit the EMD with Payment Online through RTGS/internet banking in Beneficiary name Gujarat Informatics Ltd., Account No. 50100247366022, IFSC Code HDFC0000190, Bank Name HDFC Bank Ltd. Branch address Sector-16, Gandhinagar Branch.

- The sealed cover should be super scribe as “EMD for the Request for Proposal for “Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure on behalf of Gujarat ISP Services Limited (GISL)”.
- Bids complete in all respects should be uploaded on or before the BID DUE DATE.
- Technical Bids will be opened in the presence of Bidders’ or their representatives who choose to attend on the specified date and time.
- In the event of the date specified for receipt and opening of bid being declared as a holiday for GIL office, the due date for submission of bids and opening of bids will be the next working day at the appointed time.
- Services offered should be strictly as per requirements mentioned in this Bid document.
- Please spell out any unavoidable deviations, Clause/ Article-wise in your bid under the heading Deviations.
- Once quoted, the bidder shall not make any subsequent price changes, whether resulting or arising out of any technical/commercial clarifications sought regarding the bid, even if any deviation or exclusion may be

specifically stated in the bid. Such price changes shall render the bid liable for rejection. However, GISL/GIL reserve the right to revised financial offer.

- GISL/GIL reserve the right to accept or reject any tender offer without assigning any reason.
- Use & Release of Bidder Submissions: GISL/GIL is not liable for any cost incurred by a bidder in the preparation and production of any proposal, the preparation or execution of any benchmark demonstrations, simulation or laboratory service or for any work performed prior to the execution of a formal contract. All materials submitted become the property of the GISL/GIL and may be returned at its sole discretion. The content of each bidder's proposal will be held in strict confidence during the evaluation process, and details of any Proposals will not be discussed outside the evaluation process.
- The document/papers prepared in this connection shall be the property of the GISL/GIL and will have to be deposited with the GISL/GIL after the work is over.
- The bid submitted should be valid for a period of 180 days.
- The duration of the Contract period for this activity will be of 5 years.
- In addition to this RFP, the following sections attached are part of Bid Documents.

Section – 1	Key Information & Instructions
Section – 2	Introduction and Project Description
Section – 3	Eligibility Criteria
Section – 4	Scope of Project
Section – 5	Technical Specification
Section – 6	Instruction to Bidders
Section – 7	Price Bid
Section – 8	Annexures & Formats

2.1 INSTRUCTION TO THE BIDDERS FOR ONLINE BID SUBMISSION:

- Tender documents are available only in electronic format which Bidders can download free of cost from the website Gujarat Informatics Limited (<https://gil.gujarat.gov.in>) as well as from <https://gem.gov.in>
- The bids have been invited through e-tendering route i.e., the eligibility criteria, technical and financial stages shall be submitted online on the website <https://gem.gov.in>
- Bidders who wish to participate in this bid, will have to register on <https://gem.gov.in>
- In case of any clarifications required, please contact DGM (Tech), GIL in writing 5 days before the Pre-Bid meeting date.
- Bidder has to follow for Government of India guidelines for border country

2.2 DEFINITIONS

In this document, the following terms shall have following respective meanings:

1. "Tenderer" means Gujarat Informatics Limited (GIL), Gandhinagar.
2. The "Bid Document" and "Tender Document" are the same
3. "Final Acceptance Test (FAT)" means the acceptance testing of the network equipment & software solution commissioned for the project at all/specified locations.
4. "Agreement" means the Service Level Agreement to be Signed between the successful bidder and GISL including all attachments, appendices, all documents incorporated by reference thereto together with any subsequent modifications, the RFP, the bid offer, the acceptance and all related correspondences, clarifications, presentations.
5. "Authorized Representative/" shall mean any person/ authorized by either of the parties.
6. "Bidder" means any System integrator who has an experience to establish, maintain & operate network equipment & software solution as required in the RFP. The word Bidder when used in the

pre-award period shall be synonymous with Bidder, and when used after award of the Contract shall mean the successful Bidder with whom GISL Signs the Service Level Agreement for executing the said project.

7. "Contract" is used synonymously with Agreement.
8. "**Corrupt Practice**" means the offering, giving, receiving or soliciting of anything of value or influence the action of a public official in the process of Contract execution.
9. "Default Notice" means the written notice of Default of the Agreement issued by one Party to the other in terms hereof.
10. "Fraudulent Practice" means a misrepresentation of facts in order to influence a procurement process or the execution of a Contract and includes collusive practice among Bidders (prior to or after Bid submission) designed to establish Bid prices at artificial non-competitive levels and to deprive GISL/GIL of the benefits of free and open competition.
11. "Good Industry Practice" means the exercise of that degree of skill, diligence and prudence which would reasonably and ordinarily be expected from a reasonably skilled and experienced Operator engaged in the same type of undertaking under the same or Similar circumstances.
12. "GoI" shall stand for Government of India.
13. "GoG" shall stand for Government of Gujarat.
14. "DIT" Directorate of ICT and e-Governance Technology
15. "GIL" Shall stand for Gujarat Informatics Limited.
16. "GISL" shall stand for Gujarat ISP Services Limited.
17. "Implementation Period" shall mean the period from the date of Formal Work order and up to the issuance of Final Acceptance Test.
18. "Law" shall mean any act, notification, by-law, rules and regulations, directive, ordinance, order or instruction having the force of law enacted or issued by the Central Government and/ or the Government of Gujarat or any other Government or regulatory authority or political subdivision of government.
19. "O&M Period" means period of 5 years starting with the successful, installation and commissioning and FAT of the project components.
20. "Request for Proposal", means the detailed notification seeking a set of solution(s), services(s), materials and/or any combination of them.
21. "Site" means the location(s) for which the Contract will be Signed and where the service shall be provided as per agreement.
22. "NOC" Network Operation Centre means the overall centralized location for control and command of the project
23. "SDC" means State Data Center located at Gandhinagar, Gujarat.
24. "Service" means provision of Contracted service viz., operation, maintenance and associated services for this project.
25. "Service **Down Time**" (SDT) means the time period when specified services/network segments with specified technical and operational requirements as mentioned in this document are not available to GISL. The service shall be operational on all days of a year and 24-hours/ day with in the uptime specified in the Service Level Agreement (SLA). The service is considered as operational when all centers/ Sites at all tiers/ levels are working, providing all/ specified services as mentioned in full capacity at all locations in the network.
26. "Third Party" means any, if/as appointed by the GISL for monitoring the project components at all times.
27. "Termination Notice" means the written notice of termination of the Agreement issued by one Party to the other in terms hereof.
28. "Uptime" means the time period when specified services are available to GISL and its user organizations. The uptime will be calculated as follows:
29. Central/Core Infrastructures means core/Central infrastructure including DWDM/Districts/Strategic Locations.
30. Total time in a quarter (in minutes) less total Service Down time (in minutes) in the quarter.

31. "% Uptime" means ratio of 'up time' (in minutes) in a quarter to Total time in the quarter (in minutes) multiplied by 100.
32. "GSVAN" means "Gujarat State Village Area Network"
33. "GSWAN" means "Gujarat State Wide Area Network"
34. "GFGNL" means "Gujarat Fiber Grid Network Limited"
35. "DST" means "Department of Science & Technology, Govt. of Gujarat"
36. "GP" means "Gram Panchayat"

SECTION-II

INTRODUCTION

&

PROJECT DESCRIPTION

2.1 Introduction

The Government of Gujarat vide GR No, WFI-10-2016-524041-IT dated 08.09.2016 incorporated a SPV in the name of Gujarat ISP Services Ltd as a wholly owned subsidiary of Gujarat Informatics Ltd. a Govt. of Gujarat Company under Companies Act, 2013 under Science and Technology Department, Govt. of Gujarat.

Gujarat ISP Services Limited (GISL) is holding Class B (ISP, Category- B) License for Gujarat Service area and intent to provide to Internet services across the Gujarat State up to the village level using the “Gujarat Fiber Grid Network Limited” (GFGNL)’s Fiber network implemented in Gujarat State under the BharatNet Project of Govt. of India.

Department of Science and Technology, Government of Gujarat is the nodal department for implementation of Bharat Net project in the state of Gujarat. The Gujarat Government has setup a Special Purpose Vehicle (SPV) namely “Gujarat Fiber Grid Network Limited” (GFGNL) to implement of BharatNet Project in Gujarat.

Project aims to provide internet connectivity to the citizens of rural areas through Wi-Fi access points and any other available media.

Panchayat, Rural Housing & Rural Development Department, Govt. of Gujarat has made budget provision to implement the Wi-Fi project in Gram panchayats of Gujarat state. The implementation is to be carried out by the Department of Science and Technology.

This SPV has been created to synergize with the efforts of Government of India under the National Optical Fiber Network and Digital India initiative and make focused efforts to actualize a state to-village fiber grid and to facilitate building common Government owned infrastructure to provide internet facilities to residents of State of Gujarat.

The Gujarat Informatics Limited (GIL), on behalf of Gujarat ISP Services Limited, is issuing this Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure On behalf of Gujarat ISP Services Limited (GISL). Once fully deployed, the Project will serve minimum 8000 villages.

To establish and encourage a Public Internet Access infrastructure to empower rural citizens and students as netizens by providing reliable and convenient Internet Wi-Fi connectivity at villages, across the state of Gujarat. In addition to the above this project will serve internet services to various users to enable and spread the following:

- Internet access facility
- Education and Digital Literacy
- Bridge the Digital Divide
- Convergence and utilization of the Government Services to its Citizens

2.2 Project Description:

GISL core objective is to deliver ‘high-speed’ wired and wireless services to rural area of Gujarat with an intention of large partnership at rural level and by building an effective Network architecture with maximum utilization of GOG’s infrastructure. As an ISP initiative, GISL is intending to offer Wi-Fi service to Citizens. Bidder should offer software and hardware solution with on-site (24 X 7) technical support to ensure ‘scalable and robust’ solution at “SDC/central, Districts/Strategic locations devices and Edge/Gram Panchayat location” for accommodating Wi-Fi services, authentication, billing, provisioning, utilization facility, asset management along with software based Wireless Controller, Access Points, Captive Portal, Network Monitoring Server (NMS), AAA, Core/Spine Switch/Switches, Leaf Switches, NTP Server, CRM, BNG(Broadband Network

Gateway), Hyper Converged Infrastructure, SMS and Payment Gateway, Next Generation Firewall (IPS+IDS+FW)...etc.

The project requires, Setting up of Central & Edge level Infrastructure:

1. **Setting up of Central & Edge Infrastructure:** Central & districts devices which will connect with Wi-Fi Access Points & Broadband infrastructure in each Gram Panchayat office and provide internet facility to rural citizen, these access points shall be connected to a central software-based controller which will manage the traffic, authentication of the users and other centralized management capabilities. The Gujarat ISP Services Limited is partnering with Gujarat Fiber Grid Network Limited (GFGNL) to create Gujarat State Village Area Network (GSVAN) infrastructure which terminate at village panchayat office for 8000 villages. The initial internet bandwidth requirement at each access Point is minimum 10 Mbps and may increase as per requirement at village panchayat. GFGNL may increase the bandwidth as per requirement. User authentication, Network configuration, all logs, Revenue collection, CRM+OSS+BSS should be managed and stored in Central infrastructure to be purchased under this RFP.
2. Setting up and maintain connectivity over LAN cabling work for providing Access Point Connection including Supply, Installation and Commissioning of Last Miles equipment on turnkey basis in the Gram panchayat offices to leverage the Bharat Net OFC backbone throughout the State of Gujarat and to be maintained as per terms and conditions of the RFP document
3. To provide comprehensive warranty, AMC & O&M Support for 5 years and facilitate GISL for DoT, GoI, GoG Compliance.

As per the guidelines of DoT, Govt. of India, subsidiary of Gujarat Informatics Limited (GIL), M/s Gujarat ISP services limited will be the owner of entire project and will use Class B ISP License for regulatory compliances and service delivery.

All the role, responsibilities, rights and obligation will be with the M/s Gujarat ISP services limited for the management of the entire project.

2.3 Proposed Architecture of GISL Project

As mentioned above all the 8000 links will be connected to the State Data Center. The centralized Network Operation Centre shall be located at Gandhinagar, Gujarat for managing and monitoring of the entire Wi-Fi Infrastructure under this project.

Central Infrastructure will be connected to 8000 Gram Panchayats using GFGNL Media. In this project, M/s GFGNL will provide fiber media connectivity only. M/s GFGNL & M/s GISL shall provide sufficient bandwidth at desired locations. At GP level, Bidder has to coordinate with Gram Panchayat Office for Indoor Access Point Installation. At Edge/Gram Panchayat location, Bidder may use existing GFGNL switch for access points connections. GFGNL-Gram Panchayat Switch is non-POE switch. So, Bidder has to procure and install converter/POE Injector to convert the port from Non-POE to POE in this RFP.

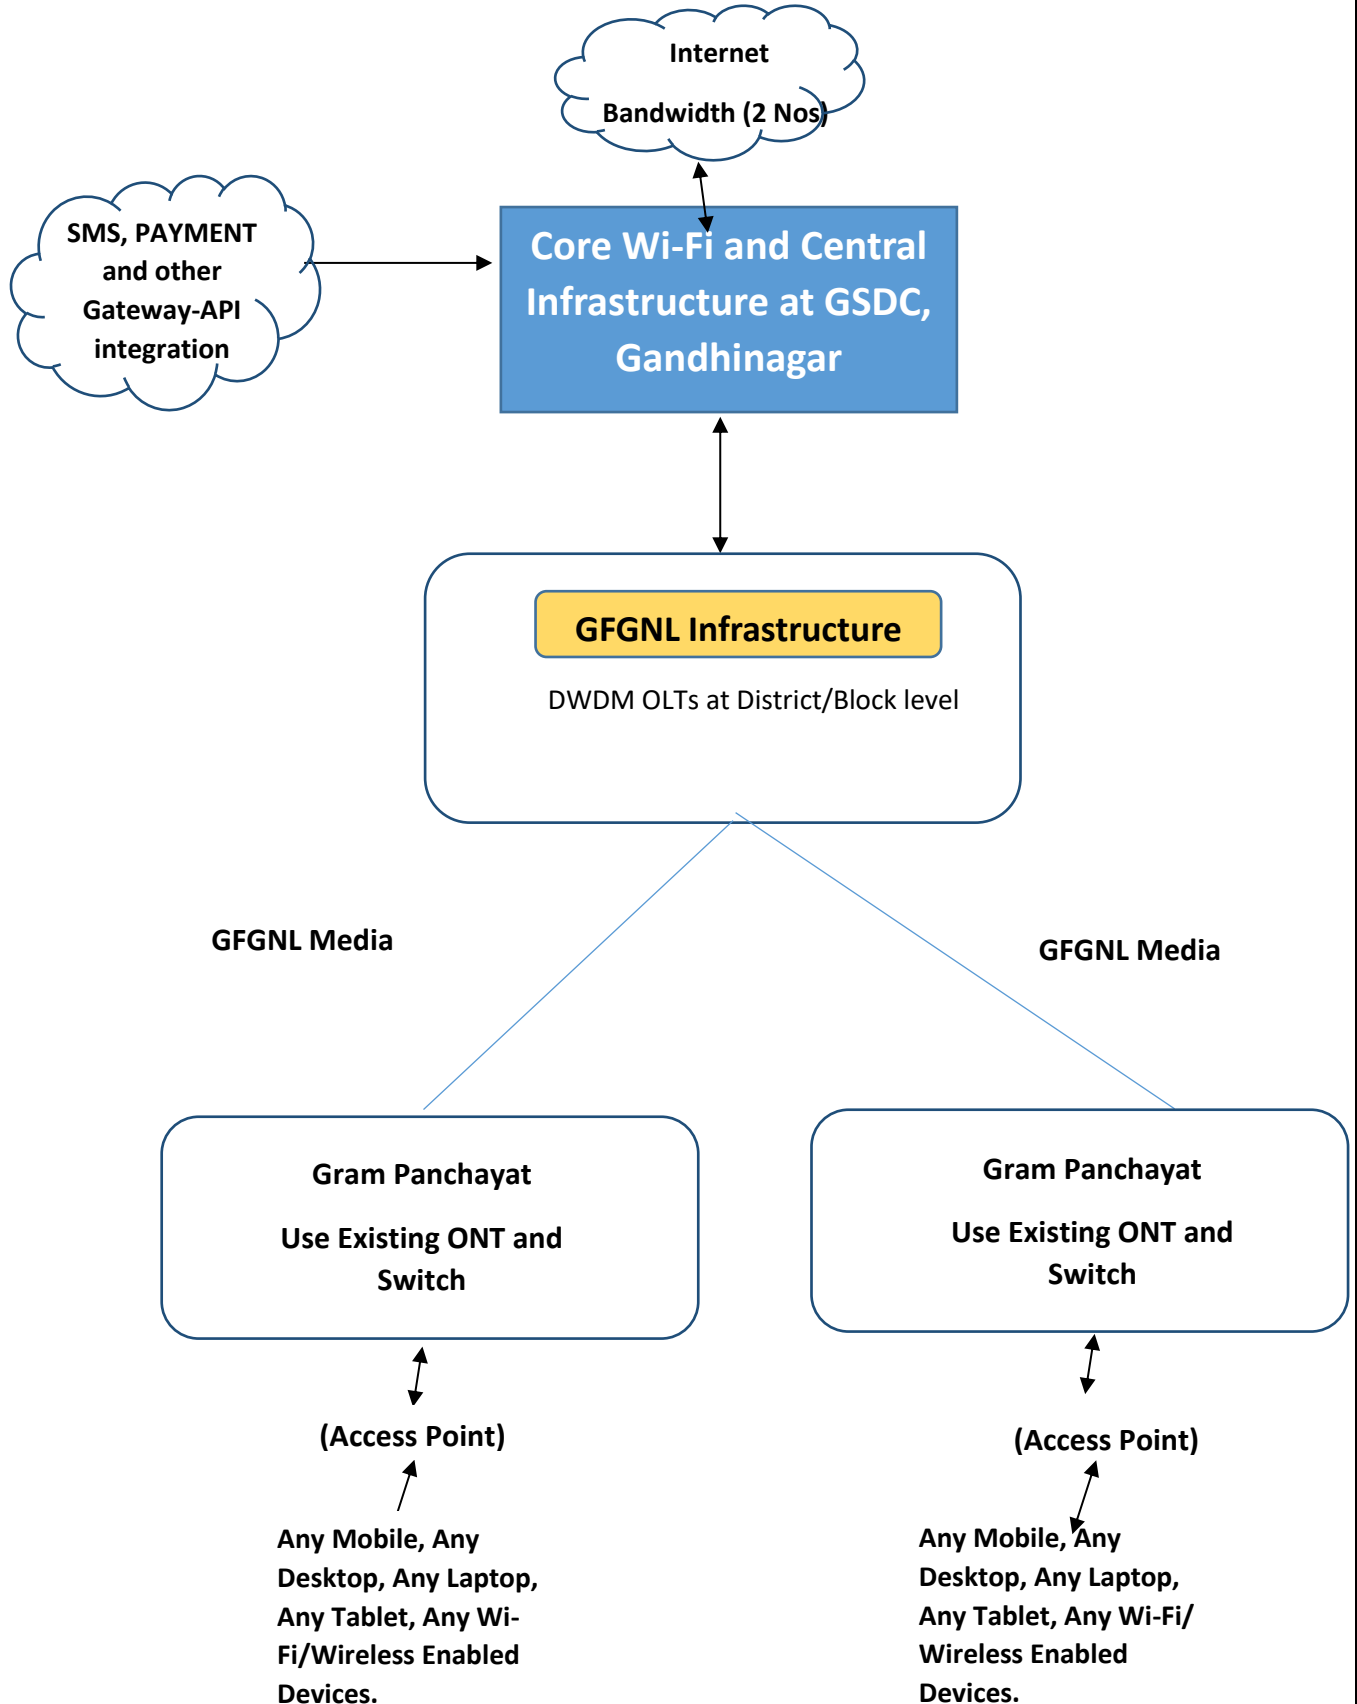

Successful Bidder has following minimum but not limited responsibilities in this RFP.

- Successful bidder will be complete responsible to provide internet facility in Gram Panchayat Office through supplied solution including Planning, Designing, Implementation/Execution, integration, operation, maintenance, coordination, 24*7 support, Resource Allocation, Deployment Timelines, Risk handling strategy ...etc.
- Successful Deployment of central Infrastructure, district/strategic locations infrastructure and Edge Level Infrastructure
- Facilitate and coordinate with other selected service provider in deployment and integration support of central infrastructure and Internet bandwidth gateway Infrastructure
- All Edge location devices must be integrated with central infrastructure and manage edge location controlled traffic i.e SMS, Payment, Authentication, Policy.
- Bidder is responsible to connect supplied solutions with GFGNL network (DWDN, OLT, ONT, Switches.etc) and Internet Service Provider Network Agency with including cable and other ancillaries.
- The solution provided by bidder should be compatible with GFGNL devices (mentioned in RFP) in terms of connectivity, fiber ports, Ethernet ports and should be able to provide Wi-Fi internet services

to the citizen in Gram Panchayat office. Supplied solution must be compatible with GFGNL devices when bidder's supplied solution connect with GFGNL devices for internet service delivery to Citizen/End Users.

- Coordinate with multiple partners to execute and run the ISP project
- Electrification, Connectivity and Internal cabling work of Central, district and Gram Panchayat/Edge Location Infrastructure
- Maintain SLA of supplied solution
- Traffic Engineering of all devices/solution in coordination with GFGNL devices.
- Provide a reliable and accessible conduit for traffic and services
- Provide quality and committed services to Users. Regular feedback will be taken from the users where internet service will be used through access points
- Resolve all technical and integration level issue.
- Resolve customer complaints within define SLA. Define SOP for resolution of complaints, escalation matrix. Also provide complaint module for online complaint booking, call, WhatsApp/Chatbot with tracking history and status. Provide regular update to customer through SMS/Call.
- Supplied solution must have to deliver the best performance as per compliance, SLA, Datasheet, specifications.
- 24*7 Internet service available for users and accessible central infrastructure for payment, SMS, Authentication...etc.
- Adhere all guidelines of Government of India, Department of Telecommunication, Government of Gujarat and Gujarat ISP Service Limited.

The Proposed Network architecture for the project will be as below:

SECTION-III

ELIGIBILITY CRITERIA

3.1 Eligibility Criteria:

The bidder must possess the requisite experience, strength, technical know-how and capability in providing the services necessary to meet the requirements as described in the RFP document(s). The invitation to proposal is open to all bidders who qualify the eligibility criteria as given below:

S/n	Basic Requirement	Specific Requirements	Documents Required
1	Legal Entity	The Bidder should be a company registered in India under companies Act 1956/2013 OR the bidder should be partnership firm and operating in India since last Three years as on bid submission date. and The Bidder should be into the business of ISP/WLAN/ System Integration/Software Development/ Network Services for Three years as on 31st March 2022	Certificates of incorporation AND Self - Declaration Certificates and copies of required Certificates
2	Sales Turnover of the Bidder	Average Annual Sales Turnover of the bidder generated solely from Telecom Networks/ ISP Business/System Integration/Software development /Data center (setting up or O&M) during last three financial years as on 31st March 2022 should be at least Rs. 40 crores.	Extracts from the audited Balance sheet and P&L AND Certificate from the statutory auditor
3	Experience of the Bidder	Must have experience of Successfully implemented project for, Supply, installation & Commissioning and Operations & Maintenance of at least 2 Project of Rs. 5 crore each and above for Internet Service Delivery/Public Hot-Spot/WLAN/Wi-Fi Solution using Controller/Cloud based controller/LAN/WAN/Data Centre/system integration within the last five years as on 31st March 2022.	Work Orders and Certificates of Successful Completion from Customer confirming year and area of activity should be submitted. Experience details should be given in prescribed format only. Bidder to mention specific details as per column mentioned. (Annexure V: Bidder's Experience)
4	Blacklisting	The bidder should not be blacklisted by any Central/State Government/PSU's for corrupt or fraudulent practices as on date of Bid Submission.	A Self Certified letter by an authorized Signatory with Signature and stamp
5	Presence	The bidder should have a Permanent Office in Gujarat preferably at Ahmedabad or Gandhinagar or should setup in 45 days from the award of Work Order.	Copies of any two of the followings: Property Tax / Electricity / Telephone Bill / GST Registration /Lease agreement. Or Undertaking to open an Office in Gujarat

6	Authorization certificate	The bidder should attach bid specific Authorization certificate from the OEM, for the authenticity, authorized representation and after sales support.	As per prescribed format (Annexure VII: Authorization Letters)
7	Adhere the guidelines	Bidder is required to adhere the guidelines published by Ministry of Finance, Dept. of Expenditure, Public Procurement division dated 23.07.2020 or latest while selecting the product and OEM.	As per prescribed format (Annexure XII)

Note:

- i. Bidders are required to submit the detailed compliance statement along with the required supporting documents for above mentioned criteria.
- ii. In case if Tenderer finds that submitted documents are insufficient then Bidder is expected to give additional documents to confirm eligibility based on request from Tenderer.
- iii. All Supporting Documents are to be uploaded on GeM portal <https://gem.gov.in>
- iv. All bidders who wish to participate in this bid must submit EMD as per bid requirement

SECTION-IV
SCOPE OF WORK

4.1. Scope of Work

As an ISP initiative, GISL is intending to offer internet services to citizens in the villages of the Gujarat State. Proposals are sought from eligible bidder for Scope of work divided in following parts:

Part A: Setting up of central including districts and Edge Infrastructure

Part B: To provide warranty, AMC & O&M Support for 5 years and facilitate GISL for DoT, GoI, GoG Compliance.

Part A: Setting up of Central including districts and Edge Infrastructure

4.1.1. Scope of Work for Setting up of Central including districts location devices Infrastructure and Edge Infrastructure to be setup at each Gram Panchayat office. Central Location will be at Gandhinagar.

Proposals are sought from eligible bidder for establishment of Central including districts location devices Infrastructure & Edge level Infrastructure for internet service delivery to citizens and intranet service traffic through supply, installation, testing, commissioning, operation & maintenance for a period of 5 years of the various hardware and software to be deployed. Operation and Maintenance period will start after commissioning/FAT period.

Central & Edge Infrastructure must have capability to manage following services and devices.

To provide internet services to citizen using supplied infrastructure

- Complete management and control of GISL Internet Service Provider Operation
- Wi-Fi Access Points Control and Management

The scope of work as envisaged under the project covers the followings and general requirement:

- ✓ **Successful bidder will be responsible to provide internet facility in Gram Panchayat Office through access Point and Supplied Solution- Top Priority.**
- ✓ Bidder is responsible for setting-up and O&M of Central including districts Infrastructure and Edge Infrastructure to be utilised for Wi-Fi facility at village level across the state. GISL may increase the number of Access Points installation quantity based on requirement/usage. In the RFP, Bidder has to provide solution for Captive Portal & mobile applications, SMS & Payment Gateway, Security for central infrastructure, Traffic Engineering, Load Sharing of Internet links, Load Sharing of Server traffic, OSS+BSS+CRM Solutions for pre-paid and post-paid services with complete life cycle of users, AAA & Captive Portal/Subscriber Management Platform solution for user management, Handle 8000 villages internet traffic through Access points, Complete IP scheme design and allocation as per requirement, multiple way third party integration, monitoring of all components, configuration of all devices, monitoring all devices through NMS/EMS, Helpdesk/Service desk solution, cabling works of supplied devices and connection with GFGNL devices at core including districts and Edge locations. coordination with multiple agency for project execution, scalable hyper converged infrastructure, Network time protocol device for time synchronization with all devices, follow guidelines- GOI, TRAI, GOG, DST, GISL, Advertisement/marketing of GISL service, supplied device with all required licences, features as per requirement etc. Bidder is free to add the component/device/server/services to meet the operational requirement.
- ✓ The Successful bidder shall not disturb or damage the existing premises construction work - wall, ceiling, parking area, parking shed, gate. Etc while installation and during the contract period. If in case any damage to the existing construction is done, the same shall be corrected with no extra cost. The successful bidder

will also be responsible for paying penalty, as imposed by the service owner to which the damage has been incurred

- ✓ Supply, installation, commissioning and operations & maintenance of Access point as per Scope of Work.
- ✓ An indoor access point will be installed in Gram panchayat office/building with the help of local Sarpanch, Talati and local gram panchayat staff. Preferred Indoor Access Point Installation location where people gathering is more and easily accessible to citizen in gram panchayat office.
- ✓ Proposed wireless solution should conform to applicable WPC regulations for use of license-free spectrums in terms of EIRP. A declaration to this effect must be submitted which must be supplemented by periodic compliance reports during the project period.
- ✓ Bidder is responsible to set-up edge level Wi-Fi infrastructure.
- ✓ Bidder shall be responsible to provide user-friendly portals and mobile applications.
- ✓ Successful bidder is required to discover, configuration and provision of procured hardware and software in the proposed solution.
- ✓ By separately floating RFP, GISL is also selecting agency to provide required internet bandwidth at defined locations. Successful bidder is required to coordinate with this selected ISP agency for traffic management (User and control) of Access point at local level for provisioning of internet bandwidth and other services at required places. Bidder is also responsible to provide necessary guidance, documents, training and technical work-flow information to other agency for integration.
- ✓ Successful bidder shall responsible to provide separate logins (NMS/EMS, OSS+BSS+CRM, Helpdesk etc.) for multiple agency, users and part this RFP.
- ✓ Successful bidder is responsible to coordinate with GFGNL team for integration with GFGNL devices, traffic management from Central & Cluster/Zone/District to GP level through GFGNL media (DWDM, OLT, ONT, Switch), resolve all the technical issues.
- ✓ The Network Operation Centre(NOC) shall comprise of various Network components like Core Switch, Router, Server, firewall, Wireless Controller that manages Open & Multi-Vendor Access Points, OSS+BSS+CRM, district level routers .. etc. capable to command and control the Wi-Fi and its user management & edge infrastructure.
- ✓ Successful bidder is complete responsible for network planning, designing and implement the ISP project. Architecture should be flexible and adopt the changes i.e Redundancy, IP scheme, traffic flow, allocation network ports, performance, active-active and active-standby, cabling works, tagging, proper hostname, hardening policy, systematic installation devices (network, server, devices etc.) in the rack.
- ✓ Proposed solution shall be built on Wireless Controller that manages **Open source and Multi-Vendor Access Points**. Such supplied hardware and software should be provided with perpetual license allowing GISL to use, modify etc. without limitation of number of users and access points connected in the GSVAN network. Further, proposed solution should be installed/set up on appropriate hardware to be provided by the bidder as a part of their proposed solution. Supplied device must be best in industry standard and Quality Product.
- ✓ The proposed solution should be able to initially manage minimum 8,000 access points with the subsequent expansion plan and coverage of the Wi-Fi Hotspot. The system should be able to cater to the increased no. of users. In 5 years, whatever make & model of Access Points procure by DST/GIL/GISL, the bidder will have to make such Access Points work with the supplied controller.
- ✓ Further, Operation and maintenance of the Central Infrastructure and APs deployed under the expansion phase beyond 8000 Access points this RFP will be the responsibility of the bidder under this RFP till the expiry of contract period. The O&M charges for any such additional work shall be paid at 1% per annum of the capex cost of such additional equipment/devices/hardware/ software component. Further successful bidder is required to comply with the overall SLA requirement of contract for any such additional Sow

- ✓ Successful bidder is responsible to resolve Day to Day technical and operational issue which will raise from System, field team, ISP Agency, GFGNL team and End Users. Bidder has to provide technical solution and resolve within define SLA.
- ✓ Any Wi-Fi enabled and IEEE standard devices must be connected with supplied open source Access point and serve the internet connectivity to citizen/users.
- ✓ The controller should be Open Source compliant. It should be given as a software package, without license/ time limitation of its usage. License here refers to all applicable licenses like for discovery, monitoring etc. with respect to “number of Access Points connected, the number of users of the network or both”.
- ✓ Whole network provisioning to be managed centrally with multiple internet break-out at districts/OLT/DWDDM where it is feasible. Managed internet service provision/Internet links and link termination are not part of this RFP. However, Internet links should be managed and controlled by Central infrastructure in coordination with Internet service provider agency. Managed internet service provider and Central infrastructure agency is required to coordinate and integrate various service IP allocation log details, IP sec tunnel between core and district break-out infrastructure, end user IP management...etc.
- ✓ Bidder has to provide and initiate SMS, Payment gateway, social media and any third party registration process on behalf of Gujarat ISP Services Limited. No extra cost will be paid by GISL.
- ✓ The controller should be capable to connect, recognize, control and manage Access Points of any make and model built on open standard/firmware.
- ✓ The Software based controller will be installed on appropriate hardware to be provided as a part of the central infrastructure. The hardware should be scalable for higher performance and manage additional Open Source Access Points without major changes in hardware and no cost at all level. The controller and other required components should be scalable to the number of access points increase up to 30000 in future.
- ✓ Initially, Internet plan is to provide internet access free of cost to the end users or decided by GISL, however in future if the DST/GISL may decides to charge beyond the capped usage limit, system must be capable to allow users to buy the extras usage access. Thereby it shall be required to be integrated with a Payment, SMS Gateway and third party integration along with a centralized billing mechanism provided by the bidder under this project. Bidder has to create various plan, features plan, advertisement plan, zone wise plan, group wise plan etc. and as suggested by GISL
- ✓ No user restriction to access the internet facility through supplied solution.
- ✓ Successful bidder has to create NMS/EMS and Controller view rights of concerned agency/team/vendor/zone manager/district team’s credential to check their concern devices status for general purpose.
- ✓ Bidder has to provide all functionalities asked in RFP. Bidder is complete responsible for configuration, Management and integration of all supplied hardware and Software in the proposed solution.
- ✓ Bidder has to provide and manage: Captive Portal Management, various service (Free, pre-paid, and special services), Advertise management, customer care management, Billing/Invoice, Partner billing, Coordinate with bank for failed transaction, payment reconciliation reports, promotional activity, discount plan, Tariff, charging, IP log management, Security management, Change management, Performance improvement plant submission, create credentials/logins for staff, partner as request by GISL. Provide unique dashboard to manage all devices and to check progress of all activities. Custom view for multiple user, agency, team, zone manager, district, taluka login.
- ✓ Bidder is responsible to provide custom reports from supplied hardware and software as and when ask by GISL/DST and as per RFP requirements.
- ✓ Provide helpdesk solution for online complaint booking through web portal and mobile applications, remote support to citizens for complaint resolution, chat-bot facility. Create a login - role wise, custom

view, complaint status (i.e. open, pending, work in progress, transfer etc.) should be integrate with SMS and third party gateway and notify the customer for complaint status.

- ✓ Successful Deployment of central including district and edge Infrastructure. All Edge location devices must be integrated with central infrastructure and manage edge location controlled traffic i.e. SMS, Payment, Authentication, Policy, Coordinate with multiple partners to execute and run the ISP project, Power cabling work at Central including district & Edge site, Internal cabling work of Central including districts & Edge Infrastructure and connect with GFGNL Devices, Maintain SLA , Traffic Engineering of all devices, Provide a reliable and accessible conduit for traffic and services, Provide quality and committed services to Users, Resolve all technical and facilitate to resolve field level issues, Resolve customer complaints within define SLA, Supplied solution must have to deliver the best performance as per compliance, SLA, Datasheet, specifications, 24*7 Internet service available for users and accessible central infrastructure for payment, SMS, Authentication. Etc., Adhere all guidelines of Government of India, Department of Telecommunication, Government of Gujarat and Gujarat ISP Service Limited.
- ✓ Successful bidder has to manage IPv4, IPv6 and policy Management for supplied solution i.e Access points, District routers and active components. Also allocate IP address/pool to edge device (Access Point and Internet break-out devices). Centrally managed IP address allocation list, create a standard document, flow diagram and training, firmware/packages details to other agency for project roll-out. Successful bidder must be developed unique firmware/packages for Access points. Also check quality, security, performance, throughput, coverage, concurrent session parameters of developed packages/firmware for access points.
- ✓ Bidder has to manage and maintain supplied inventory with complete life cycle management.
- ✓ GISL name & Logo should be display on every portal i.e. Captive Portal, Helpdesk Portal, Mobile Applications, NMS login page...etc and hardware. GISL Sticker with required details on every supplied device.
- ✓ Standard naming conventions, proper cabling including power cabling work with tagging.
- ✓ Bidder shall be responsible: Here in RFP- Cabling means- LAN cabling, Ethernet cabling, Fibre cabling. power cabling, patch cord with required connectors, casing-capping, route the cable properly, no hanging cable, proper joints, I/O Box, patch panel, all joints, all connectors, all type of cabling works required for functional and supplied solution requirement...etc.
- ✓ Bidder shall be responsible to provide spare cables, patch cord, LAN cable at strategic location to resolve field level issue immediately.
- ✓ Proposed solution shall have to support for various streaming servers traffic i.e. Netflix, Youtube, Google Server etc. if GISL may allow to any provider to put their devices.
- ✓ Bidder and OEM must have to provide software/firmware upgradation, patch upgradation of supplied device during the contract period and provide written confirmation to GISL.
- ✓ Supplied devices must be Integrated with each other in terms of features and functionality wise to get unique information. All devices must be registered and integrated with NMS portal and required portals. Centrally collection of all logs from core/central, districts and edge devices.
- ✓ Bidder must provide SMS Gateway, Email Gateway, Social Media Gateway, Payment Gateway etc. to meet the operational requirement.
- ✓ Solution must be integrated with SMS gateway. Also provide initially 1 crore SMS facility. Thereafter GISL will procure the bulk SMS pack based on the requirement from selected bidder on mutually agreed rates.
- ✓ Bidder must comply with GOI website guidelines W3C Standard for all required website/portal and part of this RFP.
- ✓ Bidder should conduct regular internal Vulnerability Assessment Penetration Testing (VAPT) of supplied solution and close the Vulnerability. The solution provided by the bidder shall be fully secured against

malware, un-authorized access, Zero Day Attack, SQL Injection, Virus, ransomware, DDOS attack, signature, IP based attacks and any kind of threats/ Vulnerability.

- ✓ Bidder is responsible to update/upgrade firmware, operating system/software, patches, bug fixing, version, driver, utilities etc of supplied solution with the help of OEM. Take OEM onsite support for major changes and upgradation.
- ✓ Bidder shall be responsible to manage DWDM/OLT/Strategice Location's routers. If required, Bidder may strategically change the locations to manage end users traffic in better way.
- ✓ Bidder shall be responsible to
- ✓ Bidder is responsible to provide complete onsite device and part replacement as per define timeline in RFP.
- ✓ GISL have own public IP address pool (/24). However, Bidder is free to procure new ip address pool name of GISL to run the proposed solution if require with no extra cost.
- ✓ Supplied hardware and software should not be End of Life and End of Support during contract period.
- ✓ Supplied hardware and software should be able to handle the internet traffic of the end users, support all IOT devices such as mobiles, laptops, desktops, tablets etc. and that too without modifying the hardware and software of the end users' devices.
- ✓ For enhancement of GISL business, Successful bidder has to provide integration and access support to GFGNL and external partner/agency to utilize the GISL infrastructure i.e. Authentication service, OSS+BSS+CRM service, customize captive portal, payment service, billing service, supplied solution etc. to increase the revenue of GISL.
- ✓ Successful bidder has to create number of customize captive portal as per GISL requirement and external agency requirement. (Name, logo, display, plan etc.) with advertisement facility. System should be capable to provide Zone Wise, District, Taluka and GP wise custom Captive Portals with advertisement facility, local information and customize the internet plan for citizen.
- ✓ If require, proposed solution should be scalable, capable and integrate with IPTV headend, CATV, OTT/IPTV and voice offering etc.
- ✓ Bidder is responsible to develop, maintain, update, security audit of following portals during contract period:
 - GISL Website
 - Captive Portal
 - Helpdesk Portal
 - NMS Login Portal
 - Mobile Application
 - Any portals which are part of this solutions.
- ✓ Custom mobile application for citizen login, Bidder's staff login, GISL Admin login and provide Dashboard. Mobile application should be complete customizable and change/modify/add functionality with work-flow as per requirement during the contract period.
 - Citizen Mobile App Login- Mobile OTP based login and provide various login method, Auto Identify the GISL SSID, Complete Plan Details, Usage Details, History, feedback, Payment Option, Plan Details, Free usage, User Profile, Data Sync with Captive Portal, app can be installed in any devices, data strongly protected, raise the complaints, feedback facility, lat-long facility regular update mobile applications and add standard parameter or bidder may suggest better approach...etc
 - Bidder NOC Staff & Field Login: Customer feedback reports with photo and video recording facility, Complaint (Open, pending, transfer close details.... etc.) real time sync with Helpdesk/NMS, Alert Message, Capture lat-long during FAT, installation and complaints raise

the complaints and add standard parameter or bidder may suggest better approach, Online Attendance Facility, etc.

- Admin login: Total Complaint details with all required status, feedback reports send message to bidder's field staff, receive the message from field staff and standard parameters or bidder may suggest better approach, Field staff attendance with mobile number facility. Call from app/better way...etc.
- ✓ Successful bidder is responsible to create technical work-flow, process, diagram, SOP, forms, documents and any documents which are part of this RFP. GISL/DST will be final authority for approval. Bidder is responsible to update all required documents at regular interval. It should be available on portal.
- ✓ Successful bidder is responsible to provide online platform for field staff, agency, user to submit online reports i.e. feedback reports, FAT reports, commissioning reports, quarterly reports ...Etc. and as suggested report by GISL.
- ✓ All SLA reports should be available in the NMS system with custom report facility. Create a custom pages/portal for monthly, Quarterly reports, SLA calculation, Penalty calculation, Quarterly payment report, one click access for quarterly payment & SLA reports, available all reports as per RFP requirement.
- ✓ Successful bidder has to provide online login credentials to concern agency to view inventory, device status, district/zone/taluka/gp view, reports, error/alarm status, pending complaints status, maintenance reports, and able to update complaint status...etc.
- ✓ Bidder has to keep the maximum process automated as per RFP requirement to avoid major human intervention. Supplied solution should work independent without manual/person intervention after FAT/installation. System should work in auto-mode in terms all process i.e. user registration, payment, SMS, connect/disconnect user as per data plan of user, notification, agency login and their work-flow/process-flow, helpdesk ticket allocation, various process as required in this RFP and customize the process as require by GISL/DST.
- ✓ Successful bidder is responsible to provide and integrate online RBI approved payment method for all users and provide facility to external agency for online payment collections.
- ✓ Successful bidder has to develop custom captive portal, configure SSID for events, location, area, district wise and as per GISL requirement. These requirements should be mapped with access point accordingly.
- ✓ Bidder shall be fully responsible for Quality inspection of the materials procured for this RFP and a certificate need to be produced that all material supplied are as per specifications.
- ✓ Bidder shall be solely responsible for the maintenance, repair & upgradation of the software as well as hardware systems, equipment and parts.
- ✓ GISL shall not be liable to interact with any of the partners/ collaborators, third party agency or subcontractors and any entity for ISP project.
- ✓ Successful bidder has to manage complete life cycle of supplied devices and software through NMS/ CRM/SMP/ITSM etc.
- ✓ Successful bidder shall responsible to create separate login ids for multiple monetization partners and LCOs with complete life cycle if require.
- ✓ Bidder shall be responsible to complete life cycle management of Wi-Fi, FTTH, FTTX and Hybrid Users.
- ✓ End user's authentication through Captive Portal/AAA Servers with standard security protocols.
- ✓ Bidder shall facilitate GISL to provision services and ensure its proper deliveries, including billing. All the payments from the customer, advertisement and any partner shall be received directly in GISL's collection account without deduction of incentives to the marketing/other/LCO Partner.
- ✓ GISL will be the Owner of the supplied equipment. However, the custodianship i.e. the safety and security of supplied equipment and supporting infrastructure will be with Successful bidder during the contract period

- ✓ Successful bidder is master agency to provide all technical document, guidance, support, solution to other agencies which are part of overall solution.
- ✓ Successful bidder will be responsible to create IP/MPLS and flexible network on supplied solution. Also, integrate with GFGNL network to provide internet connectivity to citizens through Access Points. GFGNL's Client/revenue partner network traffic and GISL Internet traffic should not merge with each other. Bidder is responsible to Create a separate VPN, VLANs, integrate with GFGNL devices (OLT/DWDM), path, tunnel, private network, separate IP/MPLS cloud, traffic segregation for GFGNL, GSWAN and other networks to handle their Sites/clients/revenue partner network through supplied solution. Bidder shall be responsible to manage GFGNL & GISL network traffic through supplied solution. Bidder has to provide necessary ports to GFGNL team to strengthen their networks. Successful bidder shall be responsible to understand complete existing GFGNL architecture and GISL requirement before actual execution of project. Bidder may take help from OEM to check supplied solution compatibility with GFGNL equipment for project roll-out.
- ✓ Bidder shall be responsible to integrate supplied router with GFGNL devices.
- ✓ Bidder shall be responsible to manage the internet breakout point by managed internet services if increase the number of internet links at districts/taluka places.
- ✓ Bidder must provide IPv6 and 5G technology supported solution from day-1.
- ✓ BYOD (Bring your own Devices) Policy to enable IT team to enforce strong BYOD Policies. Any Access points device connected to the Network should go through an approval process. Admins can choose access/deny or approval route for BYOD devices. Notification for approval should be received via email/SMS and define by GISL.
- ✓ Bidder is responsible for develop and hosting of mobile application (Android & IOS). Bidder is responsible to check all security parameter of required portals and Mobile Application before launching. Also responsible to get security clearance from concern team that it is free from vulnerabilities. Also get certificate from Authorised security/CERT-In agency if require. Regular update of mobile applications, captive portal and required portals.
- ✓ Bidder is responsible to export standard and custom reports from supplied solution in CSV/excel, PDF format and standard format.
- ✓ The Wireless Access Controller/Offered solution must show the deployment and coverage of each Access Point within the controller across all the sites. The Wireless Controller must be able to monitor and visually show the key health statistics of each Wireless Access Point. E.g. CPU, Memory, Disk, Network Utilization, signal strength. Connected users, standard parameters... etc. The Wireless Controller must be able to set thresholds and immediately send notifications via email, SMS and application alerts if any device falls below the health KPI.
- ✓ Bidder is responsible to maintain all users log with public and private IP address, mac address, source device information (mobile, Android, desktop, tablet, IOT devices) user details, tracking history, log details. Also adhere all guidelines of GOG, GOI, DOT, DST and GISL.
- ✓ Bidder has to procure SSL certificate and other required certificate for supplied solution i.e. Captive Portal, Helpdesk, NMS, Mobile Applications etc.
- ✓ Bidder is responsible to categorize the received the complaints and define the priority i.e. Critical, High, Low and Medium.
- ✓ Bidder shall be responsible for gradually and systematically migrating complete GFGNL network traffic to the supplied solution without any down-time and end user traffic distribution, if required.
- ✓ Supplied Wireless Controller and Access Points features must be in sync and manageable end to end. Wireless Controller and Access Point features (asked in technical in technical specification) must be compatible with each other's in terms of Hardware and Software with features.

- ✓ Supplied solution must provide
- ✓ Supplied Solution must provide one click internet access to end users/Citizen without any issue.
- ✓ The solution provided by bidder should not affect the performance of the devices due to Indian temperature and humidity.
- ✓ The Bidder shall be responsible for increasing the number of ports with SFPs, speed of ports, throughput, modules, connectors compatible with GFGNL devices, inter connections of supplied solutions and for redundancy. Shall also be applicable during the contract period.
- ✓
- ✓ Bidder shall be responsible to adhere all the guidelines of Government of India, Telecom Regulatory Authority of India, Department of Telecommunication, Government of Gujarat, Department of Science and Technology and Gujarat ISP Services Limited.
- ✓ Bidder shall be responsible to provide customizable, flexible, scalable solution during the contract period.
- ✓ In Offered Solution/AAA must have built-in guest management, device and user on-boarding. Also, Web based management interface with Dashboard. AAA Integrate with Captive Portal, SMS & Payment Gateway and third party tools.
- ✓ In Offered Solution/AAA must have Data repository for user, device, transaction information. Policy having identity, device, health or conditional elements. Able to send all AAA server logs to external server i.e. syslog, Data Storage server etc.

1) User Management Module:

- ✓ It should be given as a software package and should be without any licensing and time limitation of its usage. It should support features such as, auto IP allocation, user authentication, access etc. through OTP (One Time Password) on mobile no., social media and email It...etc. it should be capable to put a cap on user session and amount of data consumed and regulate the bandwidth usage.

2) The central including districts & Edge infrastructure provided by the bidder should have the ability to do the following:

- ✓ Auto discovery & Management of Access Points
- ✓ Assign IP address to access points and its connected end users.
- ✓ Automatic/Push configuration, policy firmware of the AP's
- ✓ Access points assign IP address to connected users and send all details to central infrastructure
- ✓ Manage and configuration of all devices supplied in this RFP
- ✓ Bandwidth with plan management
- ✓ The central infrastructure will broadly comprise of two components – Software and hardware components. Software components including license, operating system, user license, controller software which support open source and multi-vendor access points, firmware, patches, updates, security updates application development considering to handle ISP project traffic...Etc. Hardware components will be scalable and addition of hardware units result in support and manageability of increased no of Access points, traffic management, industry standard performance.
- ✓ Storage for keeping log of Supplied Solutions (Hardware and Software), Wi-Fi Access points and its connected users: Bidder is required to provision require storage for keeping log of Supplied Solutions (Hardware and Software), Wi-Fi services used by the end users such as MAC Address, IP details, Device info, URL visited, time stamp/time details, End User Authentication, Mobile No. etc. to be stored in a Storage. Whenever required, GISL will ask bidder to provide logs from the storage and in appropriate format. Also integrate with Internet break-out devices for log collection if any. Bidder shall be responsible for storing logs of solution provided by bidder as per GOI, DOT/TRAI, GOG, DST and GISL Guidelines.

- ✓ Bidder shall be responsible for providing complete security of Central including districts devices and Edge Infrastructure with necessary security tools
- ✓ Monitor all links and coordinate with agency if any issue
- ✓ Wireless Security Protocol- WEP, WPA, WPA2, WPA2/WPA, Mixed Mode etc.
- ✓ Network Monitoring software should be without the liability of Licensing i.e. independent of time duration of use as well as for the number of AP's connected and central infrastructure
- ✓ Prepare and provide standard technical configuration document for Access Point and other broadband service to other partners for edge location installation and configuration
- ✓ Create various prepaid, postpaid and voucher plan for users
- ✓ Manage third party integration SMS, Payment etc.

3) **The Web & Mobile App based user access Portal (Captive Portal) and Other Portals Solution should have the following minimum functionality:**

- ✓ All portals should be responsive web application means it allows users to have better user experience when using different devices. A responsive web app refers to a design that effectively responds to the behavior of users and the environment based on screen size, orientation, and platform. Responsive web application design has flexible layouts, grids and a wide range of images..etc.
- ✓ The Captive Portal Solution Should have the ability to customize the one universal captive portal and number of Captive Portals based on the Geography, districts, area, Location, Gram panchayat Hotspot. Necessary software/source code development shall be done by the bidder as per the requirements of GISL during the contract period. All portals should be customizable, in-house development team from day one. Develop mobile applications for citizen for internet access, bidder's staff and GISL's Officers.
- ✓ User registration must be through captive portal and mobile application. Captive portal and mobile application data should be in sync. Any changes in the captive portal should be immediately reflected in mobile application and vice versa.
- ✓ End Users can download mobile application via play store, apple store, standard store, page redirection from captive portal to store etc.
- ✓ The Captive Portal Solution support and integrate with Multiple login method e.g Social Media, Voucher/pin, SMS & email OTP, Manual Credentials, self-generated credentials... etc
- ✓ The Captive Portal must have in-built survey engine and quick to generate short survey based on locations.
- ✓ The Captive Portal Solution Should have inbuilt Advertisement module for Banner and Video etc. and auto run different advertisement video, banner and logo etc. during login, opening captive portal etc. Bidder may suggest better strategic way.
- ✓ Captive portal should have user friendly dashboard and fetch various reports i.e number of connected users, drop connection, total users in specific period, per user b/w utilization, historical data etc. and create condition based, filter based and custom reports.

Minimum Step Wise Data Flow but not limited. Bidder may suggest better work-flow

STEPS	DESCRIPTION
Step 1	User requests for Internet Access through the Captive Portal/ Mobile Application
Step 2	User Authentication and access management from the NOC through OTP, Multiple authentication options
Step 3	Assignment of IP to the end devices and establishing a secured connection to the Internet
Step 4	Session and Log Management by the Central infrastructure

General Requirement

Customize captive portal and mobile (Android & IOS) application for citizen. Mobile application should be available on Play store and Apple store for downloading. Captive Portal and Mobile Application must be available and support bilanguage with all required features.

Solution must have capability of captive portal authentication/login with Voucher/PIN, Username & Password via radius & rest api, SMS OTP, Email OTP, an Advertisement, with a Survey, Social Media Login, click to login option should be there. MAC address based binding where it requires. Appropriate login method enables through enforce enterprise policy and as defined by GISL. Voucher & Pin: QR Code, Printed Soft & Hard Copy, available on mobile app. Integration: SMS Gateway, Email Gateway, payment gateway, external system, social media etc.

Short Survey based login with following questions: 1 Short Answer 2 Long Answer 3 Email ID 4 Phone Number 5 Star Rating 6 Smiley Rating 7 Dropdown 8 Radio Button 9 Multi Select 10. Any other menu etc and defined by GISL. Survey details must be saved for a period of 1 year and as defined by GISL. Customize report facility should be available and export data in .CSV, PDF and word document format.

Bidder must provide solution with minimum requirements but not limited for end user management : Convergent Billing, Customer 360 Degree View(Active plan, payment history, purchase details, charge details, communication/notification),Customize plan area wise (Central, Zone, Districts, Talukas and GP...Etc.) and integrate with Captive Portal, Various customize Internet Plan(Days, Month, GB, MB,..etc), Payment Reconciliation with bank account, Order/Recharge Management, Incident Management integrate with Supplied Helpdesk Tool, Automated Processes, Role-Based Access, Smart Analytics, Subscriber Management, Internet Plan & Billing Management, Streamlined Inventory Management, Bandwidth and QoS Management, Pay Multiple Level Administrations/Resellers, Reports, Subscribers, Package Wise Subscribers, Invoices & reports, Online Subscribers, Online/Offline Payments and Advance Payment Method, Audit Reports, Current and Previous Usage, SMS, Payment and third Integration etc. Customize Reports i.e Payment fail & Success Reports, Revenue collection Reports, Area Wise Reports, Total number of users reports, customize report with full features/functionalities with customization from day 1. Customize dashboard facility with various option and fetch the reports in CSV/Excel and PDF format.

The OSS & BSS will be required for Wi-Fi, Hybrid FTTX connection. It is envisaged that GISL/GFGNL will also provide FTTX connection and OSS & BSS platform will be used for the same. Required customization during the contract period will be under bidder's scope.

4.2. Roles & Responsibilities:

a) Responsibilities of Selected Agency:

1. Supply, Installation & Commissioning of overall Central & Edge Infrastructure including Software based wireless Controller, AAA Solution, Captive Portal/Subscriber Management Portfolio, BNG Device, NTP Device, Hyper Converged Infrastructure, Core/Spine Switch, Leaf/Border/Access Switch, Core Router, Network Management System +ITSM, Link Load Balancer, Server Load Balancer, SDN, Automation tool, Helpdesk, Firewall, Core Router, Log Servers, Storage, OSS+BSS+CRM Software, Bandwidth Management software, Syslog and Access Points with required ancillaries etc. Operation and Maintenance of supplied hardware and software during the contract period of 5 years as per the scope of work defined in this RFP document.
2. Manage following GISL services and devices through Central & Edge Infrastructure
 - ✓ Provide Internet services to citizen through Wi-Fi Access Points
 - ✓ Wi-Fi Access Points and end user management
 - ✓ End user complaint resolution through helpdesk
 - ✓ 24*7 Internet Service availability for citizen
 - ✓ Any other internet related services

- ✓ Compete technical integration support
- 3. Testing and commissioning of supplied hardware and software.
- 4. Security of the GISL central/Core & Edge infrastructure.
- 5. Operation and Maintenance for a period of 5 years from the date of commissioning
- 6. Integration of SMS & Payment Gateway and other integration required during the contract period.
- 7. Coordinate with various stockholder (Service Providers, SDC, GFGNL, GIL, GSWAN and any vendors/Department) for integration (i.e. The Web & Mobile App based user access Portal (Captive Portal), core and edge solution) to make the operation live.
- 8. Customization/modification/development of Software(s) proposed in the central Infrastructure.
- 9. Bidder shall provide end to end encryption for data traffic
- 10. Provide committed internet service to citizen as per pre-paid post-paid plan and as decide by GISL
- 11. Bidder must ensure all the component are upgraded as per the latest upgrade/patches published by OEMs and/or developers and accordingly bidder to implement latest security and/or upgradation policy for whole central & Edge infrastructure. In case of any security breach observed & service disrupted, an additional penalty as per SLA will be imposed.
- 12. Bidder is responsible for complete workable technical solution for making whole network provisioning to be managed centrally with multiple internet break-out and edge location devices i.e. Access points Etc.
- 13. Operation and Maintenance for a period of 5 years and O&M will start after commissioning of hardware and software as per RFP terms and condition
- 14. Bidder shall coordinate with concern agency for space and raw power for Central and Edge Infrastructure installation.
- 15. Bidder is responsible to establish cable connectivity between Bidder's Supply device and GFGNL Devices at central, OLT/DWDM and GP devices.
- 16. Bidder is responsible to establish power cable connectivity from Raw power point to Bidder's Supply Device central, OLT/DWDM and GP devices.
- 17. Integration and management of the SMS and Payment Gateway, reconciliation and resolution of any integration issues during the project duration.
- 18. Bidder shall provide necessary cable connectivity from Central Infrastructure (Under this RFP) to ISP Setup and GFGNL Devices, Edge Infra to GFGNL Devices at Gram Panchayat Office.
- 19. Bidder shall be responsible to coordinate with all stake holders & provide end to end functional solution with necessary infrastructure, unconditional software support/licences (No additional cost will be provided to the bidder). It will be bidder's responsibility to obtained necessary approval and permission for rolling out of the whole project and meet the compliance of the GoI/GoG/DoT/TRAI guidelines and procedure.
- 20. At Gram Panchayat/Edge Location:
 - ✓ LAN/Structured Cabling WORKS
 - ✓ Connect cable from GFGNL devices to Access Points in coordination with GFGNL tea/local team.
 - ✓ For Cabling, the Cable used shall be Standard Branded CAT6, 100ohm, 4 pair unshielded twisted pair CAT 6 cable.
 - ✓ Cable Tagging shall be at both side and at both end
 - ✓ Cables that pass through the infrastructure of the building shall be suitably protected against damage. Through walls and floors this shall involve an appropriate type of sleeve; through any form of metalwork or stiff plastic then a rubber grommet shall be used.

- ✓ In order that the system may be easily re-routed, or damaged sections quickly replaced, free access to the cable, where possible, is important
- ✓ High power electrical plant may produce switching transients and radio frequency emissions that may induce interference on the CAT 6 cable. Therefore, in addition to the rules imposed by the IEE Regulations, data cables shall not run parallel to power cables, especially where these cables may carry heavy switching loads. If, however, this is unavoidable it is advisable to keep cables as far as possible.
- ✓ Cable shall not be routed over pipes, conduits, other cabling, ceiling tiles, etc., but shall rest directly on the supporting surface so as to minimize the potential for sharp bends, kinks etc. Every cable used shall be supported in such a way that it is not exposed to undue mechanical strain and so there is no appreciable mechanical strain on the terminations.
- ✓ **Turnkey Project Basis:** - The Bidder shall act as single Bidder to organize and manage the entire project – including design, supply, installation and commissioning of all required hardware, software, networking, accessory items and local wiring for Electrical power supply etc. at locations proposed by TENDERER. The Bidder shall be in a position to test, demonstrate and certify the basic requirements in accordance with the contract.
- ✓ All goods or materials shall be supplied strictly in accordance with the specifications, Drawings, datasheets, other attachments and conditions stated in the RFP/ Agreement / SLA. All materials supplied by the Bidder shall be guaranteed to be of the best quality of their respective kinds and shall be free from faulty design, workmanship and materials.
- ✓ **Reporting:** Bidder will have to fill up an installation and commissioning report and get the same duly signed by concern officer/person of respective gram panchayat office and remarks if any and submit the same in original and online submission to GISL or its designated agency/person. Further, GISL or its designated agency/person will release the payments based on these reports.
- ✓ TENDERER reserves the right to redefine the requirement of services within the scope of items specified in the bid as required from time to time.

21. At OLT/DWDM Locations:

- ✓ OFC Structured Cabling WORKS from the DWDM/OLT locations to Bidder's Access Router with proper casing and capping.
- ✓ Use industry standard patch cord with required connector at both ends
- ✓ Coordinate with GFGNL team for local connections
- ✓ Use industry standard patch-cord without any joint.
- ✓ The bidder shall provide at his own cost all tools, plants, appliances, implements etc. required for proper execution of work
- ✓ Cable Tagging shall be at both side and at both end (i.e., node side and rack side and inside and outside of I.O port and Patch panel)
- ✓ In order that the system may be easily re-routed, or damaged sections quickly replaced, free access to the cable, where possible, is important
- ✓ **Turnkey Project Basis:** - The Bidder shall act as single Bidder to organize and manage the entire project – including design, supply, installation and commissioning of all required hardware, software, networking, accessory items and local wiring for Electrical power supply etc. at locations proposed by TENDERER. The Bidder shall be in a position to test, demonstrate and certify the basic requirements in accordance with the contract.
- ✓ All goods or materials shall be supplied strictly in accordance with the specifications, Drawings, datasheets, other attachments and conditions stated in the RFP/ Agreement / SLA. All materials supplied by the Bidder shall be guaranteed to be of the best quality of their respective kinds and shall be free from faulty design, workmanship and materials.

22. Safety Measures:

- ✓ Adequate and proper safety precautions when working in the field such as use of appropriate insulated rubber gloves, goggles, helmet, electric tester, guarding, isolating or insulating etc. to be provided to the workers by bidder to prevent from contacting power/electric lines directly with any part of their body or indirectly through conductive materials, tools, equipment's or induction. Avoid the use of aluminum or steel ladder. Adequate arrangements are required to be made by the bidder with authorities to de-energize the electric circuit, if required. All the safety measures required during the execution of the work shall be ensured by the bidder
- ✓ The bidder should have arranged insurance coverage for all the employees deployed for any kind of such works. Any unexpected eventuality happened during the execution of the work in the contract period shall be covered under the responsibility of the bidder. GISL/GIL is fully exempted from the responsibility of such unexpected acts.
- ✓ GIL/GISL will be absolved off any legal or commercial implication related to any casualties occurring for the man power deployed by the bidder. The bidder should take necessary precautions related to the safety measures related to the work and also arrange insurance coverage where ever applicable.
- ✓ The GISL/GIL will not be responsible either to the bidder or to its workers deployed for any medical assistance/injuries/death or any kind of loss occurred to employees deployed by the contractor.
- ✓ The bidder shall be fully responsible for the damages caused by the workers during execution of work, to the properties belonging not only to GISL/GIL but also to other Departments, Organizations, Gram Panchayat Office, Other Private Operators/ Organizations and individuals and the cost of such damages will be recovered from the amount payable to the bidder.

23. Labour Laws: The bidder shall be fully responsible for the compliance of all the provisions applicable Labour Laws and its amendment.

24. Special Condition: Any disputes arise during the contract period related to laying of cable, using private premises, permission & compensation or any other situation and any kind of installation work, it will be bidder's responsibility to solve at his own endeavour & cost.

25. Confidentiality:

- ✓ The Bidder shall take adequate and timely measures to ensure that information provided through it as part of this contract/agreement shall be kept confidential, secured and protected and shall not be divulged to any unauthorized person/ firm.
- ✓ Bidders shall treat all documents / data / software or part of them, which GISL may provide/procure or Bidder shall access, as strictly confidential and maintain secrecy for the same. The Bidder shall maintain full confidentiality of the data Generated through contract/supplied by GISL. Under no circumstances the Bidder shall divulge/reveal/share such data for the purpose other than for meeting GISL's requirement. Any violation of this confidentiality clause may result in suitable penalty and /or termination of the contract, forfeiture of SD/encashment of PBG. GISL shall reserve the right to black-list the Bidder on all India bases. The decision of GISL shall be final in this regard and binding on Bidder.
- ✓ Bidder shall not publish, disclose any information about, make available or otherwise dispose of the document / data / software or any part or parts thereof to any third party, directly or indirectly without prior written consent of GISL.
- ✓ Bidder shall restrict access to the documents/data/software only to those of their employees to whom it will be felt necessary and relevant for the contact centre operations and shall draw the provision of this commitment to GISL made by the Bidder, to the personal attention of those of its employees to whom access to the document/data/software will be granted.

26. **Preventive Maintenance & Additional Task:**

The bidder shall also be responsible for the preventive maintenance and perform the below mentioned activities as a part of the regular preventive maintenance schedule:

- ✓ The bidder shall carry out Preventive Maintenance (PM), including cleaning, dusting and upkeep of interior and exterior, of all hardware and devices within every 6 months and should record such preventive maintenance activity carried out every time and appropriate report of the same should be submitted to TENDERER on regular basis.
- ✓ Check all connectors and fibre points for any damage/cuts etc., in case found faulty the same has to be repaired and replaced.
- ✓ The Wi-Fi Hotspot Signage's/Banner are to be check for visibility and availability, in case not found suitable, the same has to be mandatorily replaced by the bidder.
- ✓ AP realignment on need basis for better coverage and service has to be done free of cost by the bidder
- ✓ In case of Shifting of Access Point/s within gram payment, Bidder has to carried out same activity without any additional cost.

b) Responsibilities of M/s Gujarat ISP Services Limited /GIL:

- ✓ To provide the requisite space, raw-power point to the selected agency.
- ✓ To facilitate Bidder/SI to establish connectivity between the Central & Edge Infrastructure (Gandhinagar) to be purchased in this RFP.
- ✓ To provide centralised helpdesk number only
- ✓ To provide Internet Bandwidth of suitable capacity for the project.

4.3. Deliverables:

a) Supply of Hardware and Software:

27. The Selected agency shall supply all required hardware, software, licenses as per scope and in compliance with technical specifications defined in the RFP
28. GISL shall not pay any extra cost for transportation of the delivered items for installation and commission at the respective locations.
29. The Selected Agency shall ensure that all the software licenses delivered should be in the name of Gujarat ISP Services Limited (GISL). The selected agency will have to submit a detailed documentation with working note for the Open-source software, source code and its derivatives deployed/installed/customized as per the requirement of the project.
30. All Open-Source software along with the Source Code and derivatives will be the property of GISL with future development and modification rights allowing GISL to use the same for continuity of the project after completion of contract duration.
31. GISL or it representative will conduct inspection of the delivered items in accordance with the RFP at any time during the contract period.
32. Bidder should ensure that any open WRT/DD WRT/TR-069/WISP compliant access points should be able to operate in "plug in play" mode in to the solution where Central architecture should allow such to happen.
33. It shall be the responsibility of the selected agency to develop/integrate/ modify such open-source software/systems for the successful implementation and operations of the project.

b) Standards and policies:

34. The selected agency shall ensure a secure Internet connection and access through OTP and unique user id to all the subscribers with centralized authentication mechanism. Bidder may suggest standard method for login.

35. The selected agency shall ensure the uniqueness of mobile No. and unique ID for the use under free session, multiple logins shall not be allowed in any case and as decide by GISL. Bidder may suggest better solution.
36. Proposed solution with Wireless access points shall be configured with relevant security features to ensure that only authorized and authenticated users can use the wireless/internet services.
37. Proposed wireless network shall be secure and in compliance to relevant industry standard security requirements. The selected agency shall suggest and help in deploying various policies at various levels to prevent any intrusion/attacks in the wireless network.

c) Integration of proposed Solution:

38. The selected agency shall be responsible for integration with an Internet service provider (ISP) as directed by GISL. The bidder/SI shall have to use existing GFGNL network and media to deliver various service from Central Infrastructure to Gram Panchayats. However; User authentication, Network configuration, all logs, Revenue collection, CRM should be managed and stored in Central infrastructure to be purchased under this RFP. Bidder shall provide necessary cable connectivity from Central Infrastructure to ISP Setup and GFGNL Devices.
39. The selected agency shall be responsible for integration of proposed solution with the Payment & SMS Gateway as suggested by GISL.
40. Any other integration that may be required for the successful implementation of the project.
41. Existing GFGNL components details for Bidder information

Equipment Package-B	Make & Model No
DWDM	ECI- OPT-9603/OPT9608
NPT/Annexure Route	ECI-NPT-1010/NPT-1800/NPT-1050
OLT	Tejas- TJ1400_Type_7SR
ONT	Tejas- TJ2100N-11G
Switch	Tejas -TJ1400P-M1-24TC-LS
Equipment Package-A	Make & Model No
DWDM	DOT-F852X, DOT-F851X
ONT	CDOT - ONT11
Switch	D-Link - DGS-3000-10L, DGS-3000-28XS, DGS-1210-12 TS/ME, DGS-3630-28SC, Tejas- TJ1400P-M1-24TC-LS

d) Testing & Commissioning:

i.) FAT of Central & Edge Infrastructure:

- ✓ On completion of installation of the ordered item the selected bidder is required to offer the installed items for Final Acceptance Test (FAT). On request, GISL / designated third party agency or any other authorised representative of GISL will conduct the FAT.
- ✓ FAT report shall include results of following essential tests:
- ✓ Security: as per the security requirements guidelines issued by DoT, GoG, GoI.
- ✓ Logs: compliance of authentication, usage, and other as required as per the guideline of TRAI and DoT, GoG, GoI.
- ✓ Functional flow Diagram include every component which are part of this RFP
- ✓ Submit Data Sheet/technical specification of supplied devices
- ✓ Standard operating procedure for supplied device configuration and integration document

- ✓ Third party API integration document
- ✓ The selected agency shall be responsible for obtaining installation and commissioning certificate (Sign-off) on completion of the work as per the scope of work.
- ✓ Selected agency is responsible for rectification of discrepancies identified by the GISL/DIT/any other authorised representative while conducting FAT. Further on rectification of all the discrepancies FAT will be re-conducted or if agreed FAT will be signed.
- ✓ Documentation: The selected agency shall provide technical documentation with equipment supplied. The technical documentation should include technical and operation manuals.
- ✓ HLD & LLD Connectivity Diagram
- ✓ Captive Portal and Mobile Application (Android & IOS) functionalities
- ✓ Proper Cabling work with tagging
- ✓ Configure device name properly and sticker on every device with details
- ✓ Service Delivery & Authentication
- ✓ SMS & Payment gateway test report
- ✓ NMS Reports
- ✓ SLA Reports
- ✓ Hardware, Software and CRM Functionality as per scope of work
- ✓ GOG/GOI/DOT Compliance Reports

Edge Infrastructure:

- ✓ FAT of Hardware/Software like Access point installed at various locations will be deemed commissioned on discovery in the controller/NMS installed at central infrastructure with lat-long through mobile applications.
- ✓ Further, selected agency is required to conduct following test on minimum random 10% of the total locations to verify the health of the installed Wi-Fi infrastructure:
- ✓ Signal strength, file-transfer rate, and network authentication: As per the TEC standards, these should be conducted by the TPA or any other representatives authorized by GISL/GIL
- ✓ SSID: The SSIDs configured should be discoverable by any wireless enabled device.
- ✓ Download speed: TPA/any other authorized representative should conduct a file download test from any device to verify the effective bandwidth/throughput.
- ✓ Local Citizen Feedback Report
- ✓ Proper cabling with tagging information
- ✓ GISL Sticker on supplied devices
- ✓ Number of user login and connection time
- ✓ Coverage of Access points (Meters)
- ✓ Captive Portal and Mobile Application Response time (One Click Response)
- ✓ Login time duration i.e SMS, Email OTP or social media login (OTP Receive less than 30 Second)
- ✓ Government and private website response time (Less than 3 second)
- ✓ Successful Payment Transaction with complete log details if any
- ✓ Login through Mobile Application and Captive Portal
- ✓ Payment Redirection Page Response Time
- ✓ FAT report shall include results of following essential tests:
- ✓ Security: as per the security requirements guidelines issued by DoT, GoG, GoI.
- ✓ Logs: compliance of authentication, usage, and other as required as per the guideline of TRAI and DoT, GoG, GoI.
- ✓ Sign Board/Banner and connectivity diagram to identify the GISL connection

e) **Wi-Fi Zone Signage's:** The bidder will also have to provide and install and maintain Wi-Fi Hotspot/ Zone Signage/Banner at each AP/Hotspot as the case may be confirming minimum specifications mentioned below:

42. The sign board material should be made of Sun Board with UV printing on both sides (as the case may be) for greater visibility
43. The Size should be a minimum of 2 Ft (L) x 1 Ft (B) or bigger for clearly informing public of the existence of Wi-Fi Hotspot/Zones.
44. Minimum 1 Nos. of such Sign Board/Banners has to be installed per Hot-Spot/Access Point. However, the bidder will have to consider the sizing ensuring complete coverage of the Hotspot/zone area.
45. The Content to be printed on the banner/sign Board shall approved by the TENDERER

f) **Security:**

46. The entire Central and Edge networks should be fully secure, data communication between devices should take place in encrypted form through multiple authentication mechanisms such as WPA and any other standard security standard protocols should be implemented by the selected agency.
47. Firewall or any other supplied devices has to be deployed as per the specification for restricted access to a network and as per GISL requirements
48. The selected agency has to ensure compliance with all Regulatory and Legal guidelines issued by Department of Telecommunications/TRAI, GOG, GOI from time to time and submit the reports to GISL.

4.4. Operations and Maintenance:

- a) Selected bidder shall be responsible for day-to-day operations and maintenance for a period of 5-years from the date of commissioning of the project.
- b) It shall be the responsibility of the selected agency to ensure that all open-source software/firmware, HW firmware etc. should be updated for patches/release etc. periodically, as and when release by OEM, not later than once in a month without operational impact. Towards the completion of the O &M phase, the infrastructure should be updated with all the versions released in previous 5 years.
- c) Bidder shall provide services for management of network environment to maintain performance at optimum levels on a 24 x 7 basis. It should be noted that the activities performed by the Bidder may be reviewed by GISL.
- d) Bidder shall be responsible for monitoring and administering the network within the Data Centre up to the integration points with ISP Service, SMS Gateway, Payment Gateway, End users' integration and Internet Service Provider. Bidder shall be required to provide network related services for routers, switches, Firewall, Servers, etc.
- e) Bidder shall be responsible for creating and modifying Hardware as well Software configuration according to applications, traffic engineering and segmentation of traffic. Define IP Pool in coordination with GFGNL, GSDC, GSWAN and Concern Vendors.
- f) Coordinate with GFGNL, GSWAN, SDC and third-party agency for operational issues.
- g) Reporting security incidents and co-ordinate resolution
- h) Resolution of calls for security notifications, system alerts, vulnerabilities in hardware, software and alerting GISL as appropriate.
- i) Proactively monitor, manage, maintain & administer all security devices and update engine, signatures, and patterns as applicable
- j) Performing periodic review of security configurations for inconsistencies and redundancies against security policy.
- k) Preventive Maintenance of Central and Edge Infrastructure

- l) Resolve all technical integration related issue i.e. Access Points, Broad band and internet break-out devices.
- m) Performing periodic review of GISL Operations and suggest improvements.
- n) Rapidly resolving every incident/problem within agreed timeline.
- o) Bidder shall ensure that it prepares configuration Manual/Standard Operating Procedure for appliances, router, switch, firewall, servers all equipment's and the same needs to be submitted to GISL, any changes in the configuration manual need to be approved by GISL. Configuration manuals/SOP to be updated periodically.
- p) Submit performance report

a) Comprehensive onsite warranty and maintenance with spare parts/devices:

- The selected agency shall provide comprehensive onsite warranty and maintenance with spare parts, system software/ firmware, Signature updates, patches etc. for all the IT infrastructure supplied and installed under this project and to maintain the required SLA for the period of 5 years from the date of commissioning. Maintain all inventory records hardware and software in NMS/EMS and Government Database.
- The maintenance services involve comprehensive maintenance of all components covered under the contract, including repairing, replacement of parts, modules, sub-modules, assemblies, sub-assemblies, spares part, updating, security alerts and patch uploading etc.
- The selected agency shall maintain minimum of 10% of total quantity of Access points as spares at respective district centres/specific locations to meet onsite warranty/support and SLA requirements

b) Manpower:

The minimum requirement of manpower, their qualification and responsibility of each resource is given below:

S/N	Designation	Nos	Locations	Educational Qualification	Professional Qualification
1	Project Manager	1	NOC	BE/ B. Tech (EC/CS/IT) / MCA/BCA	Minimum 10 years' extensive experience of handling and managing Large scale of overall ISP project including execution and operation work. Experience having minimum 50 multiple locations as a project Manager. PMP and ITIL/Prince2 Valid Certification
2	Network Administrator	1	NOC	BE/B. Tech (EC/CS/IT) /MCA/BCA	Minimum 7 years of experience in installation, troubleshooting and handling and managing day to day ISP project activity i.e Network Planning and Designing, Router, switch, firewall, traffic engineering, FTTH, ONT, integrations..etc
3	Subject Matter Experts	2	NOC	BE/B. Tech(EC/CS/IT) /MCA/BCA	Minimum 7 years of experience in installation, troubleshooting and handling and managing day to day ISP operations i.e cloud, server, OSS, BSS, CRM software, HCI, portal and mobile application management, billing management captive portal
4	Help desk/ Call Center Coordinator	2	NOC	BCA/ Graduate/Diplo ma	Minimum 2 years of technical experience of helpdesk/call centre in client interaction and Liaoning and coordination's role.

5	Field Engineer/Technical Support Executives	23	Districts/Zone/GP	B.E/B.Tech/Diploma/BCA/MCA	Minimum 2 years of technical experience with installation, troubleshooting and handling and managing day to day activity of large scale Access Points, FTTH, Switch, Router LAN/WAN/MAN experience
---	---------------------------------------------	----	-------------------	----------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- The bidder has to ensure that appropriate qualified manpower with requisite skill sets is deputed at central location in Gandhinagar and district/zone/GP/Specific location. The bidder shall depute the resources as per the requirements for carrying out the O&M Activity and maintaining the SLA.
- This is minimum indicative list of resources and based on actual requirements, the bidder may deploy any number of resources to meet the SLA. GISL/GIL shall not pay any cost for additional resources required to operate, maintain, monitor & manage the SLA. In case support staff is not available or is on leave, the bidder is required to provide the alternative personnel with same or higher technical capabilities of the non-available personnel.
- The selected agency shall be responsible for the deployment, transportation, accommodation and other requirements of all its employees required for the execution of the work and for all costs / charges in connection thereof.
- The selected agency shall provide and deploy “dedicated on site manpower” for carrying out the work, only those manpower resources who are skilled and experienced in their respective trades and who are competent to execute or manage / supervise the work in a proper and timely manner as per the RFP.
- The selected agency shall maintain backup personnel and shall promptly provide replacement of every person removed pursuant to this section with an equally competent substitute from the pool of backup personnel.
- In case of change in its team composition owing to attrition the selected agency shall ensure a reasonable amount of time-overlap in activities to ensure proper knowledge transfer and handover/takeover of documents and other relevant materials between the outgoing and the new member.

c) Helpdesk/Service Desk/ITSM SUPPORT

- GISL/GIL will provide only centralized Helpdesk **number** for assistance or registration of user complaints through Voice Call of ticket generation system and bidder has to provide complain module through E-mail, SMS, WhatsApp etc. Bidder is responsible for coordination with concern team, agency/Dept/office, users for early resolution of the complaints/request booked at the centralised helpdesk.
- On ticket generation at the centralised helpdesk, the calls pertaining to the Wi-Fi/Central infrastructure created under this RFP will be allotted to the selected person/agency for further resolutions of the complaints booked.
- After rectifying the said complaint, selected agency is required to update the resolution/call-closure on the centralised helpdesk. Provide complaint trend, analysis, knowledge base solution.

4.5. Implementation Timelines:

- a) The timelines for the implementation of the entire project with respective deliverables, are as mentioned below:

S/N	Deliverables	Timeline
1	Accepting of contract agreement on GeM portal & Submission of Performance Bank Guarantee	Within 15 Days from date of issuance of Work order/Contract on GeM portal.

2	Delivery of Central & district Infrastructures as per Schedule –I (I.a, I.c and I.d) of Price bid.	Within 30 days from the date of accepting of contract agreement
3	Development/Customization, integration of the proposed solution, central including districts and Edge Infrastructures. (I.a, I.c and I.d)	Within 45 days from the date of accepting of contract agreement
4	Installation, Commissioning and FAT of hardware and software. (I.a, I.c and I.d)	Within 60 days from the date of accepting of contract agreement
5	Delivery, Installation, Commissioning and FAT of Access Points (I.b) of Schedule-I of Price Bid	Within 90 days from the date of accepting of contract agreement

Note: Days = Calendar days

- It should be noted that delay in the project timelines shall attract appropriate Penalties as per this RFP document.
- Selected agency requires to submit Device-wise Configuration report stating IP Schema with traffic engineering report.

4.5.1. Installation of central & Edge infrastructure and configure connection:

- 1) Carrying out devices and related equipment/Accessory installation at site including handling at site, unpacking, assembling of hardware components, physical installations, network/ip configuration, cabling between hardware units in redundant manner, proper tagging of laying cables, connecting to power supplies and testing.

Part B: To provide warranty, AMC & O&M Support for 5 years and facilitate GISL for DoT, GoI, GoG Compliance:

- 1) To prepare reports for DoT, GoG, GoI compliance as per DoT, GoG and SOC (Security Operation Centre) of GOG, GoI guidelines, and submit it to GISL.
- 2) Bidder shall responsible to provide documents of O&M, AMC, Warranty of supplied hardware and software under this RFP. It should be visible on OEM/SI Website. Submit the inventory report with detail information.
- 3) To assist GISL in case of any legal compliance required from any GoG, DOT, GoI agency/Authority.

SECTION-V
TECHNICAL
SPECIFICATION

Technical Specification:

It shall be the responsibility of Bidder to procure, install, configure and commission the infrastructure for GISL at defined the location in the RFP. Bidder shall also be responsible for sizing of necessary hardware and determining the specifications of the same in order to meet the service levels and requirements of GISL.

In the technical proposal, the bidder needs to elaborate on the proposed approach for commissioning, configuration & implementation of the entire central infrastructure. The requirements for the central infrastructure deployment are (but not limited to the following):

- The Bidder shall assess the sizing requirements for various Hardware, Products, tools, software's, number of ports are required to fulfil the functional, technical and operational requirements of the solution.
- Sizing of the hardware should be done to support the scalability and performance requirements of the solution - Bidder shall be required to augment the infrastructure without any additional cost to the GISL to ensure that the SLAs are maintained. There should not be any constraints on the services (for example, limit on sessions, blocking etc).
- The Bidder shall ensure and mandatorily bring in the latest version of the components being deployed for envisaged solution and will be supported by OEM and shall not end of life and End of Support during the contract period.
- The bidder shall provide the product road-map along with their technical proposal to substantiate the same. In case the OEM declares any of the component to be end-of-support during the said period, the Bidder shall replace the component with an alternate that is acceptable to GISL. However, this replacement should not lead to any degradation in performance, business continuity and delays in the project.
- Central Infrastructure will be at Gandhinagar and Edge Location will be 8000 Gram Panchayat of Bharat net Phase-2

5.1 Software based Wireless Controller:

Minimum Required Specifications		
Sr No	Category	Description
1	Deployment	The Wireless Controller must be available as an On-Premise Solution with fully High Availability, Scale Out and Modern architecture. Open Source Wireless controller must support any open source access points. Should support Industry-standard & more secure protocols such as Open WRT, DD WRT, TR-069, SNMP/SOAP/TCP HTTP/S etc. The Wireless Controller must provide management access via Mobile App (Android & IOS).
2	Capacity	The Wireless Controller should have capacity to handle 8,000 Access points from day 1 and scalable up to 30,000 access point devices without any cost implication. Should support Access Points of any make built on standard i.e., 802.11, a, b, g, n, an ax, r and latest one. Complete manageability of Wi-Fi 5, Wi-Fi 6 access points and latest one. Should have inline/gateway and bridge mode functionality.
3	Architecture	Wireless Controller Real-time event processing and Service containerization and use integrated Artificial Intelligent/Advance tools to provide advance Interference Mitigation. The Wireless Controller must have a modern as well as Resilient Architecture to prevent single point of failure in core operational and business systems.

4	Zero Touch/ ease of use Configuration	The Wireless Controller must support Zero Touch Initial Account Configuration and Setup. The Wireless Controller must support adding new AP via Mac Address/ Serial Number and IP address. Also auto assign IP address to Access Points and connected End users/clients. The Wireless Controller must be able to Bulk Upload the AP in any Site. Auto Configure and manage of any make of Access Points i.e. Wi-Fi 5, 6 and latest one. The Wireless Controller must push all the configuration (IP, Gateway, LAN/WAN, DNS, routes, transmit powers, SSID.Etc.), policy, image, firmware of the site to all the Wi-Fi Access Points. Provide the status i.e. fail success and pending status with reason. Zero touch configuration: Physical Network IP address.
5	Cluster/Site Management	The Wireless Controller must support logical distributed management features to enable Multi-Site Management, Site creation based on Logical location or Physical Location. The Site Management must be integrated with Google Maps or inbuilt track management system.
6		The Site Management must be Hierarchical in Nature with support for unlimited number of sites in Hierarchy. The Wireless Controller must support Top-Down hierarchical access. The User created on the Top Site can have access to all the Child/Sub Sites. The Wireless Controller must support creating the Configuration at all levels of the Site Hierarchy. The Wireless Controller must be able to publish the configurations at all levels of the Site Hierarchy. The settings created on the Parent Sites automatically get published in the Child/Sub Sites.
7		The Wireless Controller must support central Dashboard to view the status of all Sites in one single screen. The Wireless Controller must all to move the access points from within any site to another site. The settings should automatically get updated.
8	API & Open Extensibility	The Wireless Controller should provide a Developer SDK/Rest API for Integration with being 100% accessible through APIs. The Wireless Controller must readily integrate into 3rd Party systems via REST API and available API integration method. must have capability to integrate with NMS, OSS, BSS, CRM and third party tools.
9	Hotspot	The Wireless Controller must support Wi-Fi offload and Hotspot to ensure smooth offloading of Wi-Fi users from LTE to Wi-Fi.
10	Guest Engagement & Analytics	The Wireless Controller must have a built-in/integrated Guest Captive Portal System. The Wireless Controller must be configuration with a simple Wizard or visually. GISL may use this facility to create custom captive portal for zone wise, district, Taluka and GP wise Access Points.
11		The wireless controller must have capability to customize/integrated captive portal with possibilities to display the captive portal in languages (Gujarati, Hindi and English). The language configuration must be simple and editable.
12		The Wireless Controller must be able to Generate IP Logs for all browsing sessions via Guest Captive Portal. WLC should remotely install new software packages, patch management, roll backs, policies for Access Points. The Wireless Controller must be able to store IP Logs for all browsing sessions via Guest Captive Portal for a period of 1 Year and as per DOT/GOI, GOG and GISL requirements/guidelines. The Wireless Controller must be able to search, retrieve and export the IP Logs for Guest Captive Portal browsing sessions.

13		The Wireless Controller should have custom Captive Portal Dashboards to show all Captive details, Voucher statistics, Survey statistics. Advertisement statistics etc.
14		The Wireless Controller must provide rich Captive Portal Dashboards with the reports like New Users, Returning Users, Authentication Type, Peak Days, Peak Times etc.
15	Coverage View & Speed	The Wireless Controller must visually show real-time Signal Strength of all the devices connected to via Wi-Fi. The Wireless Controller must be able to perform an on-demand speed test on any Wireless Access Point, an ongoing speed test at regular intervals to ensure the health of the network link is optimal
16	Network Quality	The Wireless Controller must be able to perform an on-demand Network Performance Test/Check, an ongoing network performance test to check evaluate the suitability of the network for applications like voice, video, streaming etc.
17	Dashboards	The Wireless Controller should consolidate dashboard, location specific dashboard, support deep packet inspection for all user traffic across Layer 4-7 network to analyses information about applications usage(L7-DPI), peak network usage times for all access points from day one, Top to bottom view of access points from centrally, districts and GPs. WLC must be able to monitor and visually show the key health statistics of each Wireless Access Point. E.g. CPU, Memory, Disk, Network Utilization etc. WLC must be able to set thresholds and immediately send notifications via email or application alerts if any device falls below the health KPI.
18	Topology View	The Wireless Controller must create a Network Topology, a visualization of elements of WiFi, switching, Mesh links etc. to provide visibility and control., Create a separate topological view for critical device
19	Radio Resource Management	The Wireless Controller must support Artificial Intelligent/Advance integrated Tools driven Radio Resource Management, real-time charts/log showing interferers per access point, on a per- radio, per-channel, able to change to a better channel without any human intervention in an immediate or on-demand basis, able to visually display the source of interference, automatically shift users to adjacent access points if the load is high on particular access points, Intelligent band steering- able to dynamically upgrade to 5 Ghz from 2.4 Ghz if adequate conditions are met
20		The Wireless Controller must support dynamic Airtime allocation on per WLAN, per AP, Per AP group basis and must support Client Steering to the Wireless Access Point which can provide the best service.
21	Industry Standard Policy	The Wireless Controller should provide all the Industry Standard Policies below in both Gateway and Bridge Mode, Able to filter for Malware, Phishing and SPAM domains and/or other such security threats...etc to protect wireless controller. Also, Customize Policy can be applied on Individual User, Device, SSID, Group of Users, All Users, captive portals, authentications. The Wireless Controller should provide 1) Content Policy to enable Internet content control i.e. Web Filtering, Application (L7) Filtering. 2) Time & Quota Policy i.e. date, time(min/hours), duration(to/from date), Volume (MG, GB), Usage (per day, per plan) 3)Quota renewal policy.
22		The Wireless Controller must be able to restrict the number of logins per user/Concurrency Control, speed restrictions of users and devices, traffic priority(Low/High/Medium). Should have facility to restrict and allow network access based on the type of devices i.e Android, IOS, IoT devices...etc. Must have capability to

		ensure users can get full bandwidth till the quota is valid. Once designated quota is complete, the user's speed be altered dynamically and stop the internet connection.
23		The Wireless Controller should be able to provide Application/IP wise Speed allocation. The application should be identified regardless of being accessed via an application or via browser, able to control the access to the Network based on the location defined by the IP, support and integrate with Firewall Policy to allow/deny traffic from certain Ports and Protocols.
24	Scheduled /Period Tasks	The wireless controller should be able to schedule tasks / actions that can be executed in future date/time, scheduled periodic intervals and notify on completion.
25	User/Role Management and Integration	The Wireless Controller should have role-based admin rights and provide granular control on each and every access rights. WLC should ensure Access Points integration with supporting systems i.e AAA, NMS, log, IPAM, NOC Helpdesk, ITIL services, Firewall rules
26	Notifications	The Wireless Controller must support Real Time Push Notifications via Email, Mobile App and Web Notifications.
27	Audit Trail	The Wireless Controller must have an Audit Trail to log all the activities on the Wireless Access Point. Must not override any settings or changes but create a copy of the same to ensure the changes can be reverted or create a copy on controller/HCI
28	Authentication	The Wireless Controller must support centralized Authentication through AAA and AD/standard credentials and ensure that the Wireless access has to be provided based on user role, user groups, based on multiple parameters of AD/ standard so that any kind of customized group policy can be pushed.
29	Wireless Security	The wireless controller should prevent unauthorized / rogue Access Points to gain access and be part of infrastructure. The Wireless Controller should detect and protect an Ad-hoc connection when a connected user forming a network with other system without an AP or try enabling bridging between two interface.
30	Security	The Wireless Controller must use end to end strong encryption for all the communication between Wireless Controller and the Wireless Access Point, able to exclude clients based on excessive/multiple authentication failure, able to stop/revoke any Wireless Access Point instantly. Adhere and support to the security standards: Wireless Protected Access (WPA), advanced protocol/encryption methods, and Universal Access Method (UAM). Controller have capability to revoke/stop connection of particular user as well device
31	QOS	The Wireless Controller must support enforcing QoS throughput traffic prioritization at Access Point / End user level. WLC solution should regulate internet bandwidth usage with time, bandwidth QoS, volume to all end users, to provide a fair share of internet experience. Bandwidth controls on daily / weekly / monthly be provided. IPv4 and IPv6 control list.
32	Roaming & Channel Selection	The Wireless Controller should support L2 and L3 roaming for IPv4 and IPv6. Automatic wireless channel selection. Also adjust channel and power setting.
33	Troubleshooting	The Wireless Controller must support AP over-the-air packet capture for export to a tool such as Wireshark/equivalent/in-built facility, able to SSH into any Wireless Access Point for Troubleshooting. The Wireless Controller must support the DPI function to identify the Applications being used by Individual users and devices.

34	Link/Log Management	The Wireless Controller must support Link Status Monitoring to continuously monitor the link availability across all the sites, support defining the SLA for the Link Quality based on the type of the link in terms of Jitter, Packet Loss, Latency, Uptime and Throughput. The Wireless Controller must support Link Quality Monitoring to monitor the link Quality in real-time across all the sites and show the real-time status on the dashboard, report the Link Utilization per Link to ensure the optimum utilization of the link and link expansion if required.
35	Security	The Wireless Controller in conjunction with the Wireless Access Point must support auto detect and categorize all IoT devices i.e Mobile, Desktop, Laptop, Tablet connecting to the Network, ensure the security of all IoT devices connecting to the Network. The Wireless Controller in conjunction with the Wireless Access Point must be able to learn the usage pattern of the IoT devices and suggest policies to be applied on the IoT devices. The Wireless Controller must enable the IT Admin to Instantaneously Stop Internet to any device across all the sites from the Central site. The Wireless Access Controller must support Static Routing and dynamic routing i.e BGP, OSPF...etc
36	Tunnels	The Wireless Access Controller must support the below Tunnels: L2TP/ GRE/EoGRE, SSLVPN/ L2TP/IPSEC/PPTP/ Wireguard/SSL. Wireless Controller should have secured channel way of communication between WLC and Access Points.
37	Scheduled Report	The Wireless Controller must be able to send a scheduled summary report of all the entire system on a Daily/Weekly/Monthly manner to all the key stakeholders.

5.2 Captive Portal /Subscriber/User Management Platform

Sr	Minimum Requirement
1	The Captive Portal Solution Should be responsive and work with any devices. Must be Multi-Language (Gujarati, Hindi and English) Support for Captive Portal including Self Care Portal. High Availability (HA) with cluster deployment solution. Also have facility to customize captive portal based on Hotspot/Location/district, taluka, specific locations. Also support branding facility. Able to integrate with SMS Gateway, Payment gateway, E-mail Gateway, Social Media Gateway, NMS device and any third party integration etc.
2	User can login into captive portal and guest captive portal through various methods i.e. username and password (The Captive Portal Solution Captive Portal should be able to integrate with external system to validate Username & Password generation via RADIUS/REST API and manual creation of credentials) , SMS OTP, Social Media, E-mail OTP, Advertisement, voucher, PIN...etc.. Also have facility to binding users with mac address to restrict the connection. Captive Portal must support QR Code functionality
3	The Captive Portal Solution should be Adaptable & Configurable Web Self-care view as per device type like smartphone, tablets, laptops, IoT devices etc.
4	The Captive Portal Solution must have a standard Interface to preview the Captive Portal before launch in Web, Mobile and Tablet mode. App must provide a mechanism for users to feedback/rate the access points and service. Captive Portal and Mobile Applications should show the user, Current plan details, available plan/packages and standard parameters. Once the user chooses a package/plan, user should be directed to make payment on the portal. App provider must have a mechanism to allow regular app update and improvements. Mobile app usually sends OTP within 30 seconds for the authentication and mutually agreed with Bidder and GISL. Mobile app must be compatible with most/latest android and iOS versions, optimal battery consumption. App have proper error handling and present appropriate user-friendly error messages, especially for

	common issues. App provide response to any action on the app within 5 seconds. Further, for logging into the mobile app at client end, the bidder will make a mobile app (Android, ios, platform) to allow signing into the network through mobile app. Mobile App also allows user to change the “password” and allow user to setup profile with additional optional attributes: Name, Address, Gender, Age, Email, Preferred Payment address etc.
5	Bidder shall have to show two to three prototype of Captive Portal and Mobile Application to GISL before launching. Incorporate the changes in the Captive Portal and Mobile Applications as suggest by GISL team. If the minimum free minutes are used or existing data plan expires, the solution is to downgrade the user's speed, turn off Internet access and give access to only payment transaction/GISL may decide. Option will be mutually agreed between bidder and GISL. Offered solution should maintain as per WPC regulations, log of such users by storing its Phone No, MAC & IP addresses, access time, duration, data consumed etc. Captive portal must have capability to create zone wise, area wise, district wise and area wise captive portal facility and according to display plans, advertisement, local messages etc.
6	Offered solution shall allow wireless access through various kinds of devices such as smart phones, laptops, tablets, IOT Devices and desktops for IEEE 802.11 standards and industry standard parameters. Solution has the facility to restrict the internet access as well as user should not connect access points, supplied hardware & software through username, mobile number, MAC address, or any other available method if found doing mal- practice. The proposed solution should be capable of generating various MIS reports such as: Internet Usage: At a glance report, User wise, Access Point, Location wise, customize day, duration, specific interval etc. Total Bandwidth Usage Data usage and billing details Any other reports as per requirement
7	The Captive Portal Solution must be Edit of Captive Portal Pages. E.g Change image , text etc.
8	The user shall enter “username” and “password” manually, E-mail & SMS OTP based login, Social Media login on captive portal in case of devices where App is not installed.
9	The Captive Portal Solution should be editable on demand : change/custom work flow, preview the captive portal before launch, update any styling element, change image/icon with the help portal editor/customize tool etc.
10	The Captive Portal Solution should support data retention rules/feature & delete old logs automatically after the fixed retention period as per DOT/GOI & GOG Guidelines and define by GISL
11	The Captive Portal Solution must have an Alert & Backup function. The Captive Portal Solution should support Alert receiver (With SNMP/standard protocol trap for IPv4 & IPv6 both)
12	The Captive Portal Solution Monitors different KPIs like Message volume alert, System Alert - Disk Usages, System Alert - Fail Over, System Alert - CPU Usage, System Alert - RAM Usage...etc
13	The Captive Portal Solution should support Backup/Restore features A) Immediate backup Support B) Backup to retain), C) Backup Schedule (Day & Time support). The Captive Portal Solution should support Push & Pull mechanism for backup integration and able to send logs/file/data to external syslog server/device
14	Built-in Survey Engine. The Captive Portal Survey Engine must be support for Survey, have a detailed Dashboard for all the filled surveys, store the Survey Information for at least a year and policy define by GISL, Able to export the Survey details, must be able to show validation for all fields, support Username & Password fields, must be able create a Survey for users to self-Register themselves for Wi-Fi Usage, maintain the lifecycle of the Survey,
15	The Captive Portal Solution Should support integration with any Ad Server for Banner and Video. The Advertisement Server must be pre-integrated with the Captive Portal and Controller, Multi-Tenant, able to configure multiple sites for each Tenant, able to show both Video and Picture Advertisements, be able to configure the Advertisement based on criteria like device, location, time etc. must show real-

	time dashboard of the advertisements being viewed, must have detailed reports on the Advertisements shown during the day, week, month, custom date(to/from) and define by GISL etc.
16	Captive portal should have user friendly dashboard, export reports in CSV/excel and pdf format, Maintain Customer/user profile and maintain history, Integrate with internal and external gateways (Payment, SMS, E-mail.etc).

5.3 Network Monitoring Server(NMS) + ITSM/Helpdesk/Service Desk Tool:

S/n	Minimum Required Specifications
1	Industry-standard Network Monitoring Server to use for IT Operations and SLA Measurement. Parts of IT setup are Network Fault and performance Management, Network Configuration Management, Server Performance Monitoring, Network Log management, Centralized and unified Dashboard Reporting, Centralized and customizable service level reporting, Helpdesk for Incident management and Asset Management. Capable to integrate with E-mail & SMS Gateway and third party integration etc. Provide flexible dashboard for user and role wise. Dashboard provide high level information in single page and in map view
2	It should be able to auto discover minimum 12,000 devices with all supplied solution interface through physical and virtual devices/interfaces. Able to discover by IP, IP Pool and any other available method. Top-Dow View of devices, zone wise, block wise, district wise, GP wise and custom view of devices, monitor custom parameters. The solution should support single console for automated discovery of enterprise network components e.g. network and security devices, servers, VM, WLC, AP, Appliance, ups etc.
3	It should be able to manage and monitor the network through SNMP/Syslog/XML/NETCONFIG and latest protocols. The solution must support custom device template to support Generic SNMP devices as well as extensive support on traffic encryption including SNMP v3, v2. with AES 256 or higher etc. Should be able to monitor the active components and its services.
4	The Monitoring Solution should provide Unified Architectural design offering seamless common functions including but not limited to: Event and Alarm management, Auto-discovery of the Network environment, Correlation and root cause analysis, Reporting and analytics. Capable to provide information/knowledge about Incidents, Alarms, Events. The NMS admin console must provide operators with seamless automation to extract fields from collected logs via drag and drop functionality to avoid log parsing complexity of collected logs from various syslog/windows/application sources.
5	Should be able to generate necessary, custom, defined SLA and historical reports from the NMS data bases i.e Link and Device report -Availability, Reachability, Packet drop, Utilization report of CPU, Memory and link, threshold, Downtime maintenance report, all SLA reports which are part of this RFP etc. Should have capable to configure SLA for every active component. Able to set baseline thresholds of devices: lower, higher, deviation set point and reset point for ease of use. System should have anomalies detection, outlier detection and stop alarm flooding with these dynamic thresholds. Also, capable of performing prediction- based anomaly detection to identify unusual or unexpected events and measurements within the monitored environment. Able to set periodic and custom reports. Capability to send reports via e-mails and critical alarms/events via SMS
6	Should be able to provide a Map view of the Devices discovered and can be customized map by districts, zone, taluka and as suggest by GISL. Based customize view, Users can see their inventory, complaints.
7	Should have Role-based access control provides flexibility to segment the network into one or more virtual domains controlled by a single Infrastructure platform. These Virtual domains shall help deploy both large, multisite networks and managed services. Should have capability to auto create logical path from Core infra to district devices to edge devices so this will help to identify root cause of the problem
8	a) Network Fault Management b) Network Performance Management c) Server Performance Monitoring e) Network Traffic Analysis f) Centralized Log management g) Centralized and unified Dashboard h) Centralized and customizable service level reporting i) Incident management j) Asset Management. Also, provide end to end Asset Life Cycle Management: Makes it easier to handle the complete life cycle of an asset, that is, all stages/modules from procurement to disposal, The Proposed solution should support maintaining AMC/Warranty Information with Alerting when about to expire. Also provide Asset Deletion

	capabilities enabled with workflow engine, Each incident shall be able to associate multiple activity logs entries via manual update or automatic update from other enterprise management tools.
9	There should be a tight integration between infrastructure metrics and logs to have the single consolidated console of Infrastructure & security events.
10	Consolidate IT event management activities into a single operations bridge that allows IT team quickly identify the cause of the IT incident, reduces duplication of effort and decreases the time it takes to rectify IT issues.
11	Should be able to pull up security events related to a given Configuration Item, from a single console which also has NOC events, and use the security events to triage the problem. This way the team gets consolidated system/network event details and security events (current and historical) from the same console and save time in troubleshooting / isolating the issue.
12	The solution should have capability to perform cross domain correlation with alarm correlation built-in algorithms from Network, Security, Systems and other domain events as well as KPI patterns, also correlation should not be limited to only parent-child or service mapping relationships.
13	The solution shall provide future scalability of the whole system without major architectural changes.
14	The Solution shall be distributed, scalable, and multi-platform and open to third party integration such as Cloud, Virtualization, Database, Web Server, Application Server platforms etc.
15	All the required modules should be from same OEM and should be tightly integrated for single pane of glass view of enterprise monitoring. The platform must provide complete cross-domain visibility of IT infrastructure issues.
16	The solution must support custom dashboards for different role users such as Management, admin and users, zone wise, district wise login and able to create custom login for components
17	The solution must allow creating custom data widget to visualize data with user preferences.
18	The solution must support custom query based widget with multiple visualization methods including Chart, Gauge, Grid, Top N list etc. to visualize and represent collected data with ease.
19	The proposed solution should provide alert console with alert summary such as no. of correlated alert, network alert, server alert, virtualization alert, cloud alert, application alert etc. Topology based and event stream based correlation should be made available. It shall also provide Real time network monitoring and Measurement off-end-to-end Network performance & availability to define service levels and further improve upon them.
20	The Platform must support Event or Alarm Correlation integrations with service desk to trigger automated creation of incidents, problems management. The solution should classify events based on business impact and also allow defining custom severity levels and priority metrics such as Ok, Critical, Major, Down, Info etc with color codes.
21	The solution must offer relevant remedy tools, graphs in context of a selected fault alarm/event and capability to configure actions based rules for set of pre-defined alarms/alerts enabling automation of set tasks.
22	The solution should provide superior view of infrastructure health across system, networks, application and other IT Infrastructure components into a consolidated, central console.
23	The log data generated should be stored in a centralized server and log storage. The monitoring module of proposed solution must not use any third party database to store data in order to provide full flexibility and control on collected data as well as avoiding tempering with SLA calculations. The period up to which the data must be available should be customizable as per DOT/GOG/GOI guidelines and as define by GISL.
24	The proposed traffic monitoring system must be able to track all network flow (including netflow v1-v9, Jflow, Sflow, IPFix and latest one) of traffic on the network and identify malicious behavior with all IP conversations.
25	The system must support the ability to create reports that allow the user to search all IP traffic over a specified historical period, for a variety of conditions: 1) Search for any traffic using a specific configurable destination port, or port range 2) Search for any protocol in use by a specific host, interface or list of hosts or interfaces.3) Any custom reports

27	System should able to generate the reports with multiple option CSV, EXCEL, PDF and standard format. The system shall have the capability to drag and drop building of custom search queries & reports
28	System should have capability to create custom page for onetime, quarterly payment, payment part of this RFP include following parameters: All Service Level Agreements (Defined Vs Actual), Compliance reports, MIS reports, Daily, Quarterly reports, auto calculation penalty. In payment summary page, add no. of parameters (attachment, comment, system generated, manual reports attachment) as request by GISL. The system should generate the report automatically in single summary page.
29	The proposed solution must provide a common classification of event irrespective of the log format, The proposed solution should provide a minimum log compression of 8:1 for ensuring log compression to reduce overall log index storage space for the raw log format, The proposed solution must support log collection for Directories (i.e. AD, LDAP), hosted applications such as database, web server, file integrity logs, and network components such as router, switch, access points, aaa, bng, firewall etc. using agents. The Log receiver or log collection component must store the data locally if communication with centralized collector/receiver is unavailable, The system shall support the following log formats for log collection: Network device log, Windows Event Log, Syslog, Access Log Data, Application Log data, Any Custom Log data, Text Log (flat file), JSON Data. The proposed solution must provide alerting based upon established policy. The proposed solution must provide SDK and Rest API to write custom connectors and collectors to pull log and monitoring data from third party system, The proposed solution must collect, index the log messages and support full-text searching for forensic investigation
30	Asset Management: A configuration management database shall be established which stores unique information about each type Configuration Item CI or group of CI. The proposed solution allow scheduling periodic report to check current software and hardware inventory, The proposed solution must allow attaching CI record to generated service tickets, The Proposed solution should provide end to end Asset Life Cycle Management: Makes it easier to handle the complete life cycle of an asset, that is, all stages/modules from procurement to disposal. The Proposed solution should support maintaining AMC/Warranty Information with Alerting when about to expire also provide Asset Deletion capabilities enabled with workflow engine. The Proposed solution should support Software License Metering: Helps to understand the software license compliance and the use of unauthorized software in the organization and helps to act proactively to curb illegal usage and problems associated with it. The proposed solution should provide Asset Dashboards/Reporting: Graphical representation all the assets based on Category, location, aging of the asset, customer, which can be further level down to the incident record ID. The proposed solution should support patch evaluation in a test environment before distributing,
31	The proposed solution must keep historical rate and ip to ip, ip to protocol, protocol to protocol conversation data for a minimum of 3 months (most recent) and as per GOG/GOI/GISL guidelines in its current long term operating database.
	ITSM/Helpdesk/Service Desk Solution:
32	The proposed helpdesk system shall provide flexibility of logging, viewing, updating and closing incident manually via Multiple interface: Email, whatsapp, web interface/portal, Captive Portal and mobile applications. Solution must follow industry standard process i.e ITIL..etc. Each incident shall be able to associate multiple activity logs entries via manual update or automatic update from other enterprise management tools. System shall be able to provide flexibility of incident assignment based on the workload, category, location etc. solution should automatically provide suggested knowledge base articles based on Incident properties with no programming. Solution should automatically suggest available technicians based on workload, average ticket closure time assigning tickets with no programming. The proposed solution should tightly integrate with monitoring system to provide two-way integration - E.g. when system down alarm created, it should automatically create ticket and assign it to technician, in case system comes up before ticket is resolved by technician, it should automatically close the ticket to minimize human efforts. Configure the SLA as per RPF requirement and Manage the SLA, Set Escalation Matrix.
33	The proposed system must not create more than one ticket for same recurring alarm to avoid ticket flooding from Monitoring system, The proposed solution should allow administrator to define ticket dispatcher workflow which automatically assign incoming tickets based on rules defined in workflow. E.g. Network fault keyword tickets gets assigned to network technician and field staff automatically. The

	proposed solution should allow Technician to relate Incidents to Problem, Change and vice versa to have better context while working on any of ticket type. The proposed helpdesk system shall support tracking of SLA (service level agreements) for call requests within the help desk through service types. The proposed helpdesk solution should be equipped with chatbot functionality for identifying the intent of the query and provide an accurate answer and suggest options to confirm or resolve the issue.
34	Support Incident Management, Problem Management, Request Fulfillment, Change Management, Asset Management, Virtual Agent, Knowledge Management, Release Management

5.4 Authorization, Accounting and Authentication Server

Sr	Specification Requirement
1	AAA Solution should be a highly powerful and flexible attribute-based access control solution that combines authentication, authorization, and accounting (AAA); posture; profiling; and guest management services on a Single platform. AAA solution should compliant with Telecom Regulatory Standards/GOI and Cybersecurity standards of India. AAA should support Cluster deployment provides High Availability (HA) solution from day one.
2	AAA should be Fully redundant and "on premises" and Highly scalable system solution. Support following login options: SMS OTP, Email OTP, Manual credentials, Social media login, AD and Code login. AAA must be an easy-to-deploy hardware platform that utilizes identity based policies to secure network access and includes an integrated set of capabilities bundled under single uniform policy platform.
3	AAA Should have the ability to create necessary logs of user sessions and generate various reports based on the same. Logs should have details like Login/Logout Date & time, MAC Address, Device type, Nos of persons to whom wi-fi services denied with reasons, Total internet bandwidth used by all free & paid Wi-Fi users, mobile numbers, users login, Survey based login, Email & SMS OTP
4	AAA should support authentication protocols, including PAP, MS-CHAP and standard security protocols.
5	AAA Solution should be scalable enough to support added endpoints in the network. Facility to integrate with multiple devices and gateways i.e SMS, Payment, Email ..etc.
6	AAA Should have GUI for configuration, Rule base engine for different Flow, able to Integrate over standard RADIUS protocol with multiple OEM products, MAC Provision and Authentication. Support MACID based Authentication via Captive Portal, support Web Self-care-based login using existing username password, Usage collection from multiple network setups/Groups/topology, Workflow based system with - Configurable Authentication & Authorization for different Networks
7	AAA Should Support Audit of all Customer & Staff activity.
8	AAA should support Seamless roaming with proxy forwarding based on Realm, ANI & DNIS or any other standard methods. Also, handle requests from Partner networks/devices and authenticates for roaming. AAA should provide Subscriber profile lookup based upon network across multiple type of repository like LDAP, RDBMS, file based etc
9	AAA should provide Alerts & notifications via SMS, email, Web Self-care with configurable/customize templates
10	AAA should be Access Agnostic Architecture for handling requests from multiple ISP partner networks/multiple devices.
11	AAA should provide Workflow based Authentication & authorization flows for each type of ISP/Telco partner network. Pre & Post Auth Plugins to manage demands of uniform service management across multiple networks
12	AAA The solution should must allow for the complete separation of Authentication and Authorization from different sources. For example, authentication against Active Directory but authorize against Local database etc.

13	AAA should support multiple methods for device identification and profiling facility. AAA should support Self Provisioned Guest Access. Ability to make changes to a visitor account's session while it is in progress.
14	AAA the solution should must allow for the complete separation of authentication and authorized from different sources.
15	AAA must have Reporting and analysis with custom data filters, all transaction information, export the data in .CSV/Excel and PDF format, send logs to external system/device and provide the data as requested by GISL/DST.
16	AAA must be compatible with different deployment and implementation tools/devices.

5.5 Next Generation Firewall – FW+ IDS+ IPS

S No	Item	Minimum Required Specification
1	Hardware & Networking/Interface features	<p>Solution should be purpose build on high availability hardware appliance with Access & Threat prevention controls, Stateful Inspection Firewall, Next Gen Firewall, Intrusion Prevention System, User Identity Acquisition, Application Control, URL filtering, Anti – Bot and Anti – Virus, HTTPS Inspection, Advance Sandboxing, Threat Scrubbing, IPsec VPN, Mobile Access, Security Policy Management, Monitoring and Logging, Logging and Status, Event Correlation and Reporting, zero day attack protection, Virtual Systems, Networking & Clustering. NGFW solution must be a dedicated hardware appliance & Architecture should support N+1 Clustering.</p> <p>Proposed Firewall should be open architecture based on multi-core CPU's to protect & scale against dynamic latest security threats. Also, IP based traffic blocking, TCP and UDP port based traffic blocking, Region wise blocking, country wise blocking, bulk IP blocking, Group IP blocking.</p> <p>Bidder must be able to supply a recommended hardware configuration based on the criteria of real world traffic and next generation security applications provided by the customer and sizing should be based on following parameters: Total Throughput requirements, security rules, concurrent session, logging enabled, maximum users, NAT and PAT, enterprise traffic or real world traffic or IMIX traffic blend of HTTP, SMTP, DNS...etc</p> <p>Appliance must have onboard 10/100/1000Base-fiber port, management and USB ports dedicated for console management, At least 8 X 10/100/1000 Base T RJ-45 ports, 12 X 1Gbe/10Gbe SFP/SFP+ fiber ports and 2 X 40 GB SFP/SFP+ Supplied minimum 64 GB RAM and 1 TB HDD/400 GB SSD storage and have facility to send log, file, data to external server</p> <p>NGFW must have minimum Next Generation Firewall with IPS and application visibility throughput of 10 Gbps, IPS throughput of 10 Gbps, , Threat prevention throughput of 10 Gbps, 100K connection per second and 1 M concurrent connections, support NAT 66 and NAT 64 functionality, IPsec VPN throughput of 10 Gbps and support all Internet Key Exchange (IKE) Versions for IPSEC VPN or bidder is free to increase the capacity to meet the operational requirements and bidder may increase the throughput to meet the operational requirement.</p> <p>Solution should be supplied with High Availability with Active-Active, Active-Standby Load Sharing functionality. Solution must support gateway high availability and load sharing with state synchronization and fail-over link monitoring. Support IPv4 and IPv6 Static routing, complete stack of dynamic routing protocols BGP, OSPF. Support different actions in the policy such as deny, drop, Allow, accept, date and time based.</p> <p>firewall vendor/OEM must be in Leader's quadrant of Gartner Enterprise Firewall repo rt in last three year reports.</p>

2	NGFW Features	<p>NG Firewall should support Identity based controls for Granular user, group and zone-based visibility and policy enforcement. allow free custom application signatures for Home-grown and custom applications.</p>
		<p>NG Firewall should support the Identity based logging, application detection and usage controls, should enable securities policies to identify, allow, block or limit application regardless of port, protocol etc. support static as well as hide Network Address Translation (NAT) and Port Address Translation (PAT) functionality using automatic and manual NAT, remote access VPN module, compliance/risk based access to critical resources. RA VPN deployment should support split tunnelling & full tunnelling with minimum 100 licences, IPSEC site to site VPN and remote user VPN in transparent mode without any additional cost for VPN clients, the communication between the management servers and the security gateways must be encrypted and authenticated with PKI Certificates or highly secured protocols.</p>
		<p>IPS module must be based on the following detection mechanisms: exploit signatures, protocol anomalies, application controls and behaviour-based detection, pre-defined profiles/policies that can be used immediately. support a software-based fail-open mechanism/OEM may use their own mechanism, configurable based on thresholds of security gateways CPU and memory usage</p>
		<p>IPS application must have a centralized event correlation and reporting mechanism, able to automatically activate new protections, based on configurable parameters (performance impact, threat severity, confidence level, client protections, server protections)</p>
		<p>IPS must provide an automated mechanism to activate or manage new signatures from updates, to convert SNORT signatures and upload in the IPS signatures database. options to create profiles for either client or server based protections, or a combination of both.</p>
		<p>Threat Protection detection engine be capable of detecting and preventing a wide variety of threats (e.g. network probes/reconnaissance, C&C, VoIP attacks, buffer overflows, P2P attacks etc.). The solution should Maintain flexibility with options to maintain the original file format and specify the type of content to be removed</p>
		<p>Should support more than 12,000 (excluding custom signatures) IPS signatures and more. Should support capability to configure correlation rule where multiple rules/event can be combined together for better efficacy. The Appliance must support minimum 1000 IPSEC VPN</p>
3	Threat prevention	<p>Integrated Anti-Bot and Anti-Virus application on the next generation firewall. Anti-bot application must be able to detect and stop suspicious abnormal network behaviour. Anti-Bot application must use a multi-tiered detection engine, which includes the reputation of IPs, URLs and DNS addresses and detect patterns of bot communications</p>
		<p>Anti-Bot and Anti-Virus must be having real time updates from a cloud based reputation services. Look for C&C traffic patterns, not just at their DNS destination. The solution should have detection and prevention capabilities for DNS tunneling attacks, DNS trap feature as part of our threat prevention, assisting in discovering infected hosts generating C&C communication. Solution must protect from DNS Cache Poisoning, and prevents users from accessing blocked domain addresses. DNS Exfiltration and Domain Generation Algorithm (DGA) to protect against the DNS tunnelling. Support DNS protecting facility.</p>
		<p>Antivirus engine must be integrated on the NGFW platform with inspection of file type, able to prevent access to malicious websites, able to scan archive files. Anti-Virus policies must be centrally managed with granular policy configuration and enforcement</p>

		<p>The solution should support detection & prevention of Cryptors & ransomware viruses and variants (e.g. Wannacry, Crypt locker, CryptoWall etc.) through use of static and dynamic analysis, zero day attack solution. The solution should Eliminate threats and remove exploitable content, including active content and embedded objects. Solution should have capability to protect against Denial of Service (DOS) attack</p>
		<p>The detection engine must incorporate multiple approaches for detecting threats, including at a minimum exploit-based signatures, vulnerability-based rules, protocol anomaly detection, and behavioural anomaly detection techniques. Real-Time Prevention-unknown malware in Web browsing & email. The solution must offer the sandboxing capability to scan the malicious weaponized files using static and dynamic analysis.</p>
4	<p align="center">Administratio n, Management and Logging</p>	<p>Management and Firewall should be two separate systems. Management can be virtual appliance or bare metal hardware installation. SI has to provide the pre-requisites to implement the solution. Centralized dedicated management system separate from the NGFW appliance, Device Management system includes Centralized Management, logging, reporting and event correlation functionality in the single box.</p>
		<p>Device Management system should provide the real time health status of all the firewall modules on the dashboard for CPU & memory utilization, state table, total no. of concurrent connections and the connections per second counter. It must provide a security rule hit counter in the security policy. The device must provide a statistic about the health of the firewall and the amount of traffic traversing the firewall. Solution must be able to segment the rule base in a sub-policy structure in which only relevant traffic is being forwarded to relevant policy segment for an autonomous system</p>
		<p>Solution must be able to segment the rule base in a layered structure. Solution must be able to segment the rule base to allow structure flexibility to align with dynamic networks. Support layer sharing within Threat Prevention policy, The proposed solution must support the ability to lock configuration while modifying it, avoiding administrator collision when there are multiple people configuring the appliance.</p>
		<p>Solution must have capabilities for multi-domain management and support the concept of global security policy across domains. Solution should support troubleshooting tools like Ping, Traceroute, Packet Tracer/capture, etc. Should have smart dashboard. Facility to integrate with NMS, AD/Authentication devices and AAA , local authentication facility and third party integration facility...etc</p>
		<p>The firewall/ firewall's Operating System shall be tested and certified for EAL 4 / NDPP (Network Device Protection Profile) or above under Common Criteria Program for security related functions or under Indian Common Criteria Certification Scheme (IC3S) by STQC, DEIT, Govt. of India.</p>

5.6 Core WAN Router

Sr No	Minimum Requirement Description
1	The router chassis shall be fixed configuration, rack mounting & support redundant integrated AC power and redundant fans for high availability. Should support Carrier Ethernet/MEF 3.0 services framework and should be Metro Ethernet Forum Carrier Ethernet 3.0 compliant/certified.
2	As the routers are going to be installed in Aggregation locations with conditioned environment, the router must be equipped with fan-filter to avoid accumulation of dust on main board. The fan filter must be a field-replaceable unit

3	<p>Router shall support non-blocking System throughput of 1.6Tbps half-duplex/800 gb Full Duplex. Should be supplied with all applicable feature and interface perpetual-licenses from day one. No interface should have year-based capping for usage and restrictions</p> <p>Router should have fixed 48x 1/10GE SFP+ and 6X40/100G interfaces equipped with 6x40G with short distance SFPs ,12x 10G LR + 12 x 10 SR SFPs, 10 x 1G SX SFPs and 10 x 1G LX SFPs. Router must also have a console/management port.</p>
4	<p>Router should support 40/100G, 10 G and 1 G ports. Compact or bi-di SFPs on 1G or 10G interfaces are not allowed in the solution. All the 40G interfaces should support 100G also by just changing 40 G SFPs to 100G SFPs.All the 10GbE interfaces shall also support interface speed of 1Gbps and use of 1GbE SFPs. This router will connect with GFGNL devices (DWDM) to handle Block traffic and centrally connect with core infrastructure. Router should support long distance & coloured SFP and provide long distance SFP if required and part of solutions. Router should have all the interfaces and licenses built in the system available from Day-1 as per RFP requirement.</p>
5	<p>The modular operating system, Failure of one module shall not impact operations of rest of the OS, support non-blocking System throughput of 1.6Tbps, Router must support: 125 K MAC address, 250K IPv4 / 150k IPv6 routes in FIB, 500 BGP peers, 2k MPLS layer-3 VPN, 3K MPLS VPLS instances, 3K MPLS Layer-2 PWs, 500 BFD sessions. The router must have capability to act as as Precision Time Protocol(PTP) Grand Master (GM).</p>
6	<p>Complete stack of IPv4, Static routing (IPv4 & IPv6), Dynamic routing IP v4 and IPv6 (BGP, OSPF, IS-IS) VRRP and BGP Prefix Independent Convergence (EDGE and Core). The router must support multiple instances of protocol OSPF (v2 & v3) and IS-IS. Also support link aggregation into single bundle. Boot options like booting from TFTP server, Network node & Flash Memory. Router support both L2 and L3 services on all interfaces</p>
7	<p>Should have Multicast routing protocols IGMPv1, v2, v3, PIM-SM and PIM-SSM, MSDP, IGMP v2 snooping. The router should support SNMP/Netconf, YANG, gRPC and other modern system management protocols.</p>
8	<p>Complete stack of MPLS provider/provider edge functionality i.e MPLS VPN, mVPN, AS VPN, Diffserve tunnel modes, MPLS, Inter AS VPN, VPLS,OAM, Ethernet OAM, Ethernet over MPLS. Segment routing and segment routing traffic engineering. PCEP, SyncE & IEEE1588v2. Also support Point-to-Point and Point-to-Multipoint LSP for Unicast and Multicast traffic. support minimum 4 ECMP paths - equal cost multipath.</p>
9	<p>Shall support MPLS Provider/Provider Edge functionality. MPLS VPN, MPLS mVPN (Multicast VPN), AS VPN, DiffServ Tunnel Modes, MPLS TE (Fast re-route), DiffServ- Aware TE, Inter-AS VPN, Resource Reservation Protocol (RSVP), VPLS, VPWS, Ethernet over MPLS, EVPN, Segment routing and Segment routing Traffic engineering, CFM (IEEE802.1ag), Link OAM (IEEE802.3ah) and Y.1564, ITU Y.1731 The device should support YANG - A Data Modelling Language for the Network Configuration</p>
10	<p>The solution should support the network configuration protocol (NETCONF) that provides mechanisms to install, manipulate, and delete the configuration of network devices</p>
11	<p>The router should support telemetry based on push model for monitoring network devices. The router should support sending telemetry data to multiple consumers simultaneously. The solution shall use either UDP or GRPC for transport of telemetry data.</p>
12	<p>The Router should support various software models/sensors for capturing different health parameters from the devices, based on either yang, xml or open config</p>
13	<p>the router shall support GPB/GRPC/KAFKA encoding for telemetry data. Enabling telemetry should not have any adverse impact on the performance of the device.</p>
14	<p>The router should support jumbo frame, port mirroring – local and remote, DHCP Server and DHCP Relay function. QoS features: classification and hierarchical scheduling, WRR, strict priority (SP), profiled scheduling and multi-tier policing and shaping. QOS shall be supported for all type of interface including Bundled interfaces. Support multi-level of access privileges through Local database and through an external AAA Server. Shall support SSHv2. router shall support QOS and HQOS for L2 & L3 service on all kind of interface.</p>

15	IP Application Mapping. The list of IP match criteria should include Source IP address and mask, Destination IP address and mask, IP protocol, UDP source port, TCP source port, UDP destination port, TCP destination port.
16	Support Access Control List to filter traffic based on Source & Destination IP Subnet, Source & Destination Port, Protocol Type (IP, UDP, TCP, ICMP etc) and Port Range etc. Should Support SNMPv1/v2/V3
17	AAA support – Accounting, Authorization and Authentication of users and commands. Support of local authentication, TACACS+ and Radius. Authentication of routing protocol updates: IS-IS, OSPF, BGP

5.7 DWDM/District/Block- Router

Sr No	Minimum Requirement Description
1	The router chassis shall be fixed configuration, rack mounting & support redundant integrated AC power and redundant fans for high availability. Should support Carrier Ethernet/MEF 3.0 services framework and should be Metro Ethernet Forum Carrier Ethernet 3.0 compliant/certified.
2	As the routers are going to be installed in Aggregation locations with conditioned environment, the router must be equipped with fan-filter to avoid accumulation of dust on main board. The fan filter must be a field-replaceable unit
3	Router shall support non-blocking System throughput of 1.6Tbps half-duplex/800 gb Full Duplex. Should be supplied with all applicable feature and interface perpetual-licenses from day one. No interface should have year-based capping for usage and restrictions Router should have fixed 48x 1/10GE SFP+ and 6X40/100G interfaces equipped with 6x40G with short distance SFPs ,12x 10G LR + 12 x 10 SR SFPs, 10 x 1G SX SFPs and 10 x 1G LX SFPs. Router must also have a console/management port.
4	Router should support 40/100G, 10 G and 1 G ports. Compact or bi-di SFPs on 1G or 10G interfaces are not allowed in the solution. All the 40G interfaces should support 100G also by just changing 40 G SFPs to 100G SFPs.All the 10GbE interfaces shall also support interface speed of 1Gbps and use of 1GbE SFPs. This router will connect with GFGNL devices (DWDM) to handle Block traffic and centrally connect with core infrastructure. Router should support long distance & coloured SFP and provide long distance SFP if required and part of solutions. Router should have all the interfaces and licenses built in the system available from Day-1 as per RFP requirement.
5	The modular operating system, Failure of one module shall not impact operations of rest of the OS, support non-blocking System throughput of 1.6Tbps, Router must support: 125 K MAC address, 250K IPv4 / 150k IPv6 routes in FIB, 500 BGP peers, 2k MPLS layer-3 VPN, 3K MPLS VPLS instances, 3K MPLS Layer-2 PWs, 500 BFD sessions. The router must have capability to act as as Precision Time Protocol(PTP) Grand Master (GM).
6	Complete stack of IPv4, Static routing (IPv4 & IPv6), Dynamic routing IP v4 and IPv6 (BGP, OSPF, IS-IS) VRRP and BGP Prefix Independent Convergence (EDGE and Core). The router must support multiple instances of protocol OSPF (v2 & v3) and IS-IS. Also support link aggregation into single bundle. Boot options like booting from TFTP server, Network node & Flash Memory. Router support both L2 and L3 services on all interfaces
7	Should have Multicast routing protocols IGMPv1, v2, v3, PIM-SM and PIM-SSM, MSDP, IGMP v2 snooping. The router should support SNMP/Netconf, YANG, gRPC and other modern system management protocols.
8	Complete stack of MPLS provider/provider edge functionality i.e MPLS VPN, mVPN, AS VPN, Diffserve tunnel modes, MPLS, Inter AS VPN, VPLS,OAM, Ethernet OAM, Ethernet over MPLS. Segment routing and segment routing traffic engineering. PCEP, SyncE & IEEE1588v2. Also support Point-to-Point and Point-to-Multipoint LSP for Unicast and Multicast traffic. support minimum 4 ECMP paths - equal cost multipath.

9	Shall support MPLS Provider/Provider Edge functionality. MPLS VPN, MPLS mVPN (Multicast VPN), AS VPN, DiffServ Tunnel Modes, MPLS TE (Fast re-route), DiffServ- Aware TE, Inter-AS VPN, Resource Reservation Protocol (RSVP), VPLS, VPWS, Ethernet over MPLS, EVPN, Segment routing and Segment routing Traffic engineering, CFM (IEEE802.1ag), Link OAM (IEEE802.3ah) and Y.1564, ITU Y.1731 The device should support YANG - A Data Modelling Language for the Network Configuration
10	The solution should support the network configuration protocol (NETCONF) that provides mechanisms to install, manipulate, and delete the configuration of network devices
11	The router should support telemetry based on push model for monitoring network devices. The router should support sending telemetry data to multiple consumers simultaneously. The solution shall use either UDP or GRPC for transport of telemetry data.
12	The Router should support various software models/sensors for capturing different health parameters from the devices, based on either yang, xml or open config
13	the router shall support GPB/GRPC/KAFKA encoding for telemetry data. Enabling telemetry should not have any adverse impact on the performance of the device.
14	The router should support jumbo frame, port mirroring – local and remote, DHCP Server and DHCP Relay function. QoS features: classification and hierarchical scheduling, WRR, strict priority (SP), profiled scheduling and multi-tier policing and shaping. QOS shall be supported for all type of interface including Bundled interfaces. Support multi-level of access privileges through Local database and through an external AAA Server. Shall support SSHv2. router shall support QOS and HQOS for L2 & L3 service on all kind of interface.
15	IP Application Mapping. The list of IP match criteria should include Source IP address and mask, Destination IP address and mask, IP protocol, UDP source port, TCP source port, UDP destination port, TCP destination port.
16	Support Access Control List to filter traffic based on Source & Destination IP Subnet, Source & Destination Port, Protocol Type (IP, UDP, TCP, ICMP etc) and Port Range etc. Should Support SNMPv1/v2/V3
17	AAA support – Accounting, Authorization and Authentication of users and commands. Support of local authentication, TACACS+ and Radius. Authentication of routing protocol updates: IS-IS, OSPF, BGP

5.8 CORE/Spine SWITCH

Sr. No.	Minimum Required Specification
1	The Switch should support non-blocking architecture, all proposed and equipped ports must provide wire speed line rate performance. 32 x 40/100G interfaces. Spine shall support Zero Touch provisioning and capability to support fully customizable ZTP script, downloadable at startup of the system based on the DHCP options. Must have min 6.4 Tbps half-duplex throughput, support 156 K no. of MAC addresses.
2	All relevant licenses for all the features and scale should be quoted along with switch. Switch should have adequate power supplies for the complete system usage and providing N+1 power supply redundancy. Switch and optics should be from the same OEM.
3	Support layer 2 extension over VXLAN across all Data Center to enable VM mobility & availability and support BGP EVPN Route type-1 to type-5 for the overlay control plane.
4	Switch should support at least 512 IP-vrf instances and 4K Mac-vrf instances, 250K IPv4 LPM routes, 32 MB Packet Buffer.
5	Switch should support the open SDK for development of custom modules with full access and control over the system applications (FIB, RIB, Interfaces)
6	Spine shall have capability to access to underlying Operating System (OS) tools and management (e.g. bash, cron). Shall support YANG and gRPC/gNMI interface.

7	Should support complete stack of BGP, MPLS, OSPF, IPv4, IPv6, static and dynamic routing, mBFD on LAG interfaces.
----------	-------------------------------------------------------------------------------------------------------------------

5.9 Link Load Balancer

Sr.No.	Category	Link Load Balancer
1	Features	<p>Should be high performance purpose built next generation hardware to load balance traffic from different ISPs. Support for multiple internet links in Active-Active load balancing and active-standby failover mode.</p> <p>Appliance should support 16x10GbE SFP+ ports, 2x40GbE QSFP+ ports & The appliance should have 128GB RAM and 4TB HDD. The appliance should have minimum 80Gbps of system throughput from day one. Or Bidder may increase the throughput, ports, storage capacity to meet the operational requirements</p> <p>Appliance must have link load balancer license & server load balancer license comes by default along with base license including ipv6. Should support Outbound load balancing algorithms like round robin, Weighted round robin, shortest response, hash ip, target proximity and dynamic detect</p> <p>Standard policy to implement business logic on network without changes in application code. Should support Outbound & inbound load balancing algorithms like round robin, Weighted round robin, shortest response, hash ip, target proximity and dynamic detect.</p> <p>Should support Static NAT, Port based NAT and advanced NAT for transparent use of multiple WAN / Internet links. IPV6 support with IPv6 to IP4 and IPv4 to IPv6 translation and full IPv6 support. IPV6 support with DNS 6 to DNS 4 & DNS 4 to DNS 6 translation, Domain name support for outbound link selection for FQDN based load balancing.</p> <p>Shall provide individual link health check based on physical port, ICMP Protocols, user defined I4 ports and destination path health checks. Health check for intelligent traffic routing, failover. In case of link failure, device should detect it in less than 30 seconds and divert the traffic to other available links. Should provide mechanism to bind multiple health checks, support for Application specific VIP health check and next gateway health checks.</p> <p>Should support various deployment modes for seamless integration including reverse proxy (IPv6 to IPv4, IPv4 to IPv6) and IPv6 to IPv6 transparent and reverse proxy mode. Should support persistency features including RTS (return to sender) and ip flow persistence.</p>
2	Security	<p>should support advance ACL's to protect against network based flooding attacks, define ACL's rules based on connections per second (CPS) and concurrent connections (CC), cookie value utilizable for the clients on a specified subnet/IP or network.</p> <p>Should support QOS for traffic prioritization and provide QOS filters based on port and protocols including TCP, UDP and ICMP Protocols. support rate shaping, integrated firewall module to protect the device itself from network based DOS and DDOS attacks. Also, security features like reverse proxy firewall, Syn-flood and dos attack protection features from the day of installation .</p> <p>Solution should support DDoS attacks like Protocol Attack: SSL invalid packet, SSL handshake attack, SSL renegotiation, HTTP invalid packet attack – Application Attacks: HTTP slow attack, HTTP flood attack, long form submission, Challenge Collapse (CC), Hashdos, DNS NXDomain flood – Network Attacks: SYN flood, ICMP flood, Ping of Death, Smurf, IP option – HTTP & DNS ACL rules, ACL blacklist – Monitoring and Logging: PUSH/ACK flood, FIN/RST flood, Connection flood, UDP flood – Machine learning of traffic patterns and automatic configuration of HTTP/DNS thresholds to defend against anomalous traffic</p>

3	Global Load balancing	The appliance should support site selection feature to provide global load balancing features for disaster recovery and site redundancy. Global load balancing should support advance functions Authoritative name sever, DNS proxy/DNS NAT, full DNS server with DNSEC, DNS DDOS, application load balancing from day one
		Capable of handling complete Full DNS bind records including A,MX, AAAA, CNAME, PTR, SOA etc. GSLB solution should able to evaluate round trip time (RTT), Persistence loss ration (PLR) and hop count for dynamic proximity calculations.
		The appliance should support global server load balancing algorithms including - Weighted round robin, Weighted Least Connections, Administrative Priority, Geography, Proximity, Global Connection Overflow (GCO),Global Least Connection (GLC),IP Overflow (IPO), should support dynamic proximity and static proximity rules to direct the traffic to closest datacentre/DR/Defined locations.
		Shall provide individual link health check based on physical port, ICMP Protocols, user defined I4 ports and destination path health checks.
		GSLB SDNS should provide full IPv6 functionality with support for AAAA DNS resolution, proximity rule support for IPv6 , dynamic proximity (to detect IPv6 local DNS's) and SDNS health check for IPv6 service IP's
4	High Availability	Should provide comprehensive and reliable support for high availability and N+1 clustering based on Per VIP based Active-active & active standby unit redundancy mode.
		Stateful session failover with N+1 clustering support when deployed in HA mode
		Support for multiple communication links for realtime configuration synchronizations including HA group, gateway health check, decision rules, SSF sessions etc.. and heartbeat information
		should support floating MAC address to avoid MAC table updates on the upstream routers/switches and to speed up the failover. should support for secondary communication link for backup purpose
		should support floating IP address and group for stateful failover support. Appliance must have support 256 floating ip address for a floating group
		should support built in failover decision/health check conditions including, CPU overheated, system memory, process health check, unit failover, group failover and reboot. should also have option to define customized rules for gateway health check - the administrator should able to define a rule to inspect the status of the link between the unit and a gateway. Configuration synchronization at boot time and during run time to keep consistence configuration on both units.
5	Management	The appliance should have extensive reporting and logging with inbuilt tcpdump like tool and log collection functionality, should have SSH CLI, Direct Console, SNMP, Single Console per Cluster with inbuilt reporting. provide detailed logs and graphs for real time and time based statistics. multiple configuration files with 2 bootable partitions for better availability and easy upgrade / fallback. support led warning and system log alert for failure of any of the power and CPU issues. Should support XML-RPC for integration with 3rd party management and monitoring of the devices.

5.10 Server Load Balancer

Sr.No	Category	Minimum Specifications
1	Specification	Should be high performance purpose built multi-tenant hardware with NFV and SDN support. Appliance should System must support 4x10GbE SFP+ ports, 4x1G copper ports and 1GbE (copper) Management Port & should have 128GB RAM and 4TB HDD
		Platform should support minimum two instances of 20Gbps each from day one and scalable to two more instances of same throughput with license upgrade. Each instance must have assigned dedicated hardware resources including vCPU's, I/O, memory, SSL card, per virtual function, SR-IOV.

		Platform should support provisioning of third-party network and security functions to enable consolidation of advanced security and ADC capabilities on a single platform, for secure, reliable access to applications by businesses and service-provider customers.
		Platform should support Minimum 53K SSL TPS for RSA 2048 bit key and 38K SSL TPS for ECC (ECDSA-SHA256).
2	Application Load Balancing	Should able to load balancer both TCP and UDP based applications with layer 2 to layer 7 load balancing including WebSocket and WebSocket Secure.
		The appliance should support server load balancing algorithms i.e. round robin, weighted round robin, least connection, Persistent IP, Hash IP, Hash Cookie, consistent hash IP, shortest response, proximity, snmp, SIP session ID, hash header etc. Support for policy nesting at layer7 and layer4, solution should able to combine layer4 and layer7 policies to address the complex application integration.
		Script based functions support for content inspection, traffic matching and monitoring of HTTP, SOAP, XML, diameter, generic TCP, TCPS. Load balancer should support ePolicies to customize new features in addition to existing feature/functions of load balancer
		Traffic load balancing using ePolicies should support algorithms including round robin, least connections, shortest response, persistence ip, hash ip, hash ip and port, consistent hash ip and snmp. Should provide application & server health checks for well-known protocols such as ARP, ICMP, TCP, DNS, RADIUS, HTTP/HTTPS, RTSP etc..
		Should provide performance optimization using TCP connection multiplexing, TCP buffering and IEEE 802.3ad link aggregation. Support for TCP optimization options including windows scaling, timestamp & Selective Acknowledgement for enhanced TCP transmission speed TCP optimization option configuration should be defined on per virtual service basis not globally.
		Appliance should provide real time Dynamic Web Content Compression to reduce server load and solution should provide selective compression for Text, HTML, XML, DOC, Java Scripts, CSS, PDF, PPT, and XLS Mime types.
		should provide advanced high-performance memory/packet based reverse proxy Web cache; fully compliant with HTTP1.1 to enhance the speed and performance of web servers
		Should provide support for cache rules/filters to define granular cache policies based on cache-control headers, host name, file type, max object size, TTL objects etc..
		The appliance should support Certificate format as "OpenSSL/Apache, *.PEM", "MS IIS, *.PFX", and "Netscape, *.DB".
		Should support OCSP protocol to check the validity of the certificates online. Certificate bases access control, CRL's (HTTP, FTP, and LDAP) support, Should provide full ipv6 support.
		Should support advance ACL's to protect against network-based flooding attacks. Administrator should able to define ACL's rules based on connections per second (CPS) and concurrent connections (CC), cookie value.
		Should support License upgradable feature to provide machine authentication based on combination of HDD ID, CPU info and OS related parameters i.e. mac address to provide secure access to ISP network/user
Should define ACL rules to restrict the connections per second (CPS) and concurrent connections (CC) utilizable for the clients on a specified subnet/IP or network		
Should support integrated firewall module to protect the device itself from network-based DOS and DDOS attacks.		

		<p>Solution should support DDoS attacks from day one like Protocol Attack: SSL invalid packet, SSL handshake attack, SSL renegotiation, HTTP invalid packet attack – Application Attacks: HTTP slow attack, HTTP flood attack, long form submission, Challenge Collapse (CC), Hashdos, DNS NXDomain flood – Network Attacks: SYN flood, ICMP flood, Ping of Death, Smurf, IP option – HTTP & DNS ACL rules, ACL blacklist – Monitoring and Logging: PUSH/ ACK flood, FIN/RST flood, Connection flood, UDP flood – Machine learning of traffic patterns and automatic configuration of HTTP/DNS thresholds to defend against anomalous traffic</p> <p>Supports SAML secure application access – Supports web single sign-on (SSO) – Serves as a SAML SP (service provider), Capable of handling complete Full DNS bind records including A, MX, AAAA, CNAME, PTR, SOA etc. Stateful session failover with N+1 clustering support when deployed in HA mode</p> <p>should support built in failover decision/health check conditions including, CPU overheated, system memory, process health check, unit failover, group failover and reboot</p> <p>Should provide comprehensive and reliable support for high availability with Active-active & active standby unit redundancy mode. Should support both device level and VA level High availability</p>
	<p align="center">SSL VPN</p>	<p>Access Gateway solution must Support 1000 concurrent users from day1 and must scale up to Maximum 25000 concurrent users. Should support at least 5 Virtual portals from Day1 and scalable to 256 virtual portals with ad-on License. Should support up to 256 Virtual gateways on same system with add-on licenses</p> <p>Should have Security-hardened OS – Passive and active Layer-7 content filtering – Permit or deny policies – DDoS prevention – Reverse-proxy network separation</p> <p>Separate VPN access for employees, partners, tenants, customers, contractors and guests, each virtual gateway can have its own AAA method, Customization, policy</p> <p>Access Gateway solution should be 100% client less for web based applications, Should support URL masking of internal FQDN and IP addresses. Must support SAP and Oracle application (browser based) and additional Web Socket based access if needed</p> <p>Should have feature to control end points: Detection of files, registry keys; Advanced Interrogator: (simplified granular end point detection, including detailed configuration information on over 100 anti-virus, anti- spyware) Data Protection: Cache Control (data protection), Secure Desktop (advanced data protection); Includes jailbreak or root detection for iOS and Android devices.</p> <p>Must support Single Sign-On (SSO) for web based applications and web based file server access with SAML, also support OAuth via Google or WeChat. Must support HTML 5</p> <p>Should support any IP based application with bidirectional communication. Should Support IPV6 and compression</p> <p>Should support following Authentication and Authorization methods :- Active Directory, LDAP, RADIUS, Local database, Certificate based authentication, 3rd party authentication like RSA SecurID, Swivel, Vasco, SMX, custom, multistep HTTP, Anonymous access. Should support inbuilt 2 factor authentication for ensuring secure access to authorized users only from Access Gateway right from day 1</p> <p>Should able to restrict the users logins based on Hard disk ID, MAC address, CPU ID and OS ID combinations and custom checks. Appliance must support Access control options based on:- User and group, Source IP and network, Destination network, Service/Port, Host name or IP address, IP range, Subnet and domain, Day, date, time and range. Also, Should support password Management Quality checks of password expiration, Password length, Password lockout policy, and Password change.</p>

4	Authentication	Access Gateway solution must provide machine authentication based on combination of HDD ID, CPU info and OS related parameters i.e. mac address to provide secure access to corporate resources. Also, provide provision for auto collect, auto approve functions for automated collection and approval of hardware ID's without any manual intervention
		Appliance must support workflow functionality that should allow security administrators to approve end user hardware machine before users can access the published resources
		In addition to hardware ID mapping with users, appliance should provide option bind hardware ID's with group. SSL solution should support Machine based authentication based on AD/LDAP group membership.

5.11 Broadband Network Gateway- BNG

S.N.	Feature Set
1	The proposed platform shall be a chassis based solution with capability to provide internet gateway security functions such as network firewall, network address translation gateway, BNG security functions such as URL filtering. Throughput of atleast 9 Tbps Full Duplex, modular architecture, rack mountable type, controller card redundant, power and fan redundancy, dual redundant AC or DC power supply, support high availability using active passive and active-active setup. System should be in high availability and support active-active and active-standby mode. Router/router OS/router family must be MEF/CE 3.0 compliant.
2	All interface modules, line cards should be hot swappable for high availability. All interfaces on the routers shall provide wire-rate throughput. The chassis must support minimum non-blocking per-slot capacity of 4 Tbps full-duplex from Day-1 or higher at full services scale. All line-card slots should be universal. All the line-cards should be capable to be configured on all given line-card slots without any restriction. Should be equipped with redundant controller card on day-1
3	The 'slot' for router means a main slot or full slot on the router chassis. Only such a slot shall be counted towards determining the number of free slots. Any sub slot or daughter slot or a half slot shall not be considered as a slot. The router must support 16GB packet buffer memory. The router must have minimum of 16GB RAM and must support minimum 16GB of storage memory (SD/CF, etc).
4	The router must support 10GE, 100GE, 400GE interface pluggable up to 80Km distances. The router must support multi-rate interfaces: 10GE/25GE, 40GE/100GE, 100GE/400GE. The router must support 100GE, 200GE, 400GE interfaces with coherent optics for longer distances over dark fiber. The router must have capability to support minimum interfaces : 10 x 400GE, 40 x 40/100GE, 80 x 10/25GE, 50 x 1/10GE.
5	The solution should be equipped with minimum 16 x 10/25 GE equipped with 10 qty 10G SR SFPs from Day-1. The solution should also be equipped with minimum 4 x 40/100G interfaces from Day-1. All interfaces must be natively provided. For high availability, on-board/chassis interfaces shall not be considered as part of the offered solution. The Router should be supplied with all applicable features and interface perpetual-licenses from day one. No interface should have year-based capping for usage.
6	Proposed platform shall support minimum 125000 or more active dual stack subscriber PPoE/IPoE/Standard sessions. Proposed platform shall be able to provide all type of NAT e.g. NAT44, NAT64, deterministic NAT ...Etc., support minimum 100G CGNAT on Day one and expandable to 400G CGNAT. Support min 40M NAT sessions. support static as well as dynamic routing. ISIS, OSPF and BGP. support the NATLOG using syslog and IPFIX. Router must support IPSEC, URL filtering, DPI, WLAN Gateway, Application Assurance from Day-1. Also, support MPLS/LDP/RSVP, MPLS/L2 and L3 VPN & EVPN. In

	addition, support LLDP, Netconf and other modern system management protocols. The device should support SNMP v1, v2 and v3.
7	The device should support minimum 5M IPv4 routes, 2M IPv6 routes, 2M MAC Addresses, 64k Multicast Routes, 8K VRF/L3VPN, 180K MPLS PW, 40K L2VPN, 230K MPLS labels and 12 label stack. Also HQoS and minimum 750K Queues, support RADIUS and TACACS authentication for services, shall support URL redirection to captive portal. Should support 64 ECMP (equal cost multipath).
8	The proposed solution should be able to do portal based authentication with the support of AAA and captive portal server. Support DHCP server and client functionality, it shall support server/relay as well. Able to cater to Open SSID traffic, able to provision different type of policies for free subscribers and paid subscribers with the support of AAA. Multiple AAA Server for Redundancy in Global instance and VRF as well. Configured different AAA for different type of service. Support IPv4 & IPv6 soft GRE for subscriber termination using Global and VRF IP endpoints
9	It should support Port channel for link aggregation – min 32 links, multi-channel into single bundle, equal cost multipath. must support SNMP/NETCONF/RESTCONF/Yang / JSON / GPB / XML for network management & provisioning functions.
10	Device shall support E-Line, E-LAN MEF standards. The operating system of the Device category/series/family should be MEF-9/14 or CE (Carrier Ethernet) or latest Certified/compliant.
11	Shall support following CGNAT capability and Functional Features.
12	Proposed platform shall be able to provide network address translation with static 1 to 1,dynamic many internal to one external, dynamic many internal to many external, port address translation to use same external IP on different services to different internal servers, support policy-based NAT, protect itself from DOS and DDOS attacks, protect against protocol flood attacks such as TCP, UDP, and ICMP etc. protect against malformed packet, fragmented packet, TCP reassembly related attacks.
13	The proposed platform shall support CGNAT functionalities like fixed Network Address Translation (NAT), CGN must support source-based NAT, allow for enabling/disabling of NAT capabilities at different levels of the NAT components hierarchy: card or outside pool, The CGN must employ endpoint-independent mapping. The CGN support the ability to configure static mappings (configured permanent IP address and port bindings). CGN must support NAT44 & NAT64. IP address/range filter before traffic hits the CGN module or while being processed by CGN module
14	The CGN must support static-port forwarding to allow a subscriber to define a mapping of (protocol, outside IP, outside port, inside address, inside port) on the CGN. bypass within the NAT rule to not NAT certain traffic
15	The NAT platform shall translate (modify) IP datagrams passing between two IPv4 domains (an external domain e.g. the public internet, and an internal private operator domain), modify the headers of all IP datagrams in a session, Adjust the checksum values of all IP, UDP, TCP and ICMP headers. Must support monitoring the actual usage of sessions per card/chassis, and associated logging of threshold crossing. Also, must support monitoring the actual usage of ports per outside address/port pool, and associated logging of threshold crossing
16	Shall be able to view the current static and dynamic IP address and port bindings and GISL/Admin team shall be able to terminate any arbitrarily selected static or dynamic IP address and port binding, configurable limit for sessions per subscriber, support thresholds for monitoring the actual usage of sessions per subscriber

17	The GATEWAY shall be able to provision different type of policies for free subscribers and paid/premium subscribers with the support of AAA. Multiple AAA Server for Redundancy in Global instance and VRF as well. configured different AAA for different type of service. Support link aggregation.
18	SDN Features if opted in future: Support YANG - A Data Modeling Language for the Network Configuration, Support NETCONF protocol.
19	The solution should support the network configuration protocol (NETCONF) that provides mechanisms to install, manipulate, and delete the configuration of network devices, support BGP link-state
20	TELEMETRY Features/Function: should support telemetry based on push model for monitoring network devices, support various software models/sensors for capturing different health parameters from the devices, support sending telemetry data to multiple consumers simultaneously, support GPB/GRPC/KAFKA encoding, Also, software model/sensors should be based on either yang, xml or open config, shall use either UDP or GRPC for transport of telemetry data. Device shall have the ability to interact with open standard based tools. Support REST API for third party integration.
21	System: Chassis Environment, Line card utilization (memory, processor, QoS, Temp, Port utilization), errors counters, Fabric statistics, ARP table state, System sensors (memory, CPU, Temp etc), Monitoring all interface, protocol statistics. Device Should Support Dual Image/Partition with USB flash drive booting option for OS recovery. support jumbo frame, port mirroring, security features of Broadcast/Multicast/Unicast Storm control, support Jflow / Sflow /Netflow
22	The Device shall support dynamic point-to-point interface latency performance measurement. The measurement must be integrated in the IGP and BGP LS for SDN Controller Analysis.
23	Device should have support of following features on EVPN: EVPN-IRB, EVPN VPWS, EVPN VPWS Preferred Path over SR- TE Policy, PCEP, BGP-LS, BGP Prefix Independent Convergence, flex-algo, static and BGP SR policy, SyncE, IEEE 1588v2, CFM (IEEE802.1ag), Link OAM (IEEE802.3ah) and Y.1564, ITU Y.1731 Device should have support of Ethernet VPN (EVPN with single homing, multi homing). Device should have capability to calculate Bandwidth based path using centralized controller.
24	Shall support MPLS Provider/Provider Edge functionality. MPLS VPN, MPLS mVPN (Multicast VPN), AS VPN, DiffServ Tunnel Modes, MPLS TE (Fast re-route), DiffServ- Aware TE, Inter-AS VPN, Resource Reservation Protocol (RSVP), VPLS, VPWS, Ethernet over MPLS, EVPN, Segment routing and Segment routing Traffic engineering

5.12 Network Time Protocol Server- Synchronization with all devices

1	The device shall support NTP packets with a total of 160,000 NTP transactions per second including MD5 or better security/encryption, The device shall allow the use GNSS with Multiband as a source of time, The device shall allow support ePRTC mode for NTP (with additional caesium), NTP and SyncE to be used on the same Ethernet port, NTP services on ports supporting Fast Ethernet, 1Gb.
2	The Device shall be able to support NTP and G.8275.1 on the same ethernet port, 2 devices may be used as a redundant pair, in 1:1 protection mode. The device shall be configured via CLI over SSH, not use or support telnet or FTP for security reasons. web interface using HTTPs for performance monitoring, have 10Mhz and 1pps outputs for verification purposes, The Device shall have up to 4 x E1 outputs for future use. The Device shall accept have 2 PPS-TOD ports where each one can be configured for input or output, accept a PTP input, to be used as a primary or backup input for GNSS, The device shall use phase based APTS for the backup PTP input.

5.13 BSS+OSS+CRM System

Sr.No	Module	Minimum Required Specification
1	Features	The proposed solution shall be a BSS + OSS + CRM System for the below services: Wi-Fi Flow, FTTH services, Hybrid Services to manage postpaid, prepaid plan including various authentication method mobile/SMS otp, e-mail otp, social media integration, self-generated username and password and all standard method for login. Customizable during the contract period, no licence restriction for users and devices. Complete life cycle management of Wi-Fi Users, FTTH Users, and Hybrid connection's users and its component.
		The proposed solution shall be a BSS + OSS + CRM System shall include the below Key Modules. 1. Customer Management 2. Plan / Product / VAS Management 3. Order Management 4. Revenue and Billing Management, 5. Customer Support / Ticket Management, 6. Customer Self Care (Portal & Mobile App), 7. Partner Management 8. Inventory Management 9. MIS, Reporting and Business Analytics 10. Role based Access Control
		The proposed solution Include the below External Integrations in scope 1. SMS Gateway, 2. Payment Gateway, 3. OTT Platform, 4. Voice Platform 5. IVRS 6. Whatsapp, 7. NMS/EMS 8. Any third party integration
4	Customer Management	The Proposed Solution include 1. customer's/accounts creation 2. OSCustomers/Accounts uniqueness should be defined and controlled and preserved. 3. should provide multiple Address management like the Legal Address and the Billing Address 4. unique the Legal Representative Contact and the Billing Contact 5. Allow multiple RBI approved Payment modes for Invoice Payment. 6. that Creation / modification that are performed in any of the entities related to the Customer and Account Management should be tracked by the system. 7. definition of different segments for the customer: - Individual - B2B all scenario, B2G - etc. 8. the e-KYC support with Aadhar Card and standard government approved method. 9. the capability to search customer using single and combination of multiple Customer parameters and custom report facility. 10. display the payment refund history for specific customer, prepaid and post-paid, GSM or ADSL, corporate and consumer. 11 Fail, success and total transaction , reconciliation with bank account..etc
		Customer profile in one single screen covering the below details at the least 1. Active Plans, 2. Future Plans 3. Plan History 4. Purchase Details 5. Payment Details along with Credit Notes 6. Provisioning Details 7. Charge Details 8. Ongoing incidents/Tickets 9. Past Communications & Notifications 10. Customer Documents, 11. Customer Update Tracking 12. Network Sessions, 13 Usage details.
6		The Proposed Solution include 1) Ability to record the sales channel and individual responsible for acquiring a customer and/or for the sale of additional products and services, 2) select and group customers based on any criteria to produce an output file for use in promotions. 3) ability to provide a field that records if the customer was recommended by another customer, and if so, who that customer is 4) view all subscribers' statuses/account states. 5) ability to onboard a New Customer via Digital CAF Form integrated with e-KYC to enable automated customer acquisition 6) Multiple Customer status (Active/Inactive/Suspended/Terminated). 7) Extension of the Expiry Date of the customer 8) Customer Lifecycle Management with functions like Onboarding, Recharge, IP-Purchase, MAC Reset, Password Reset, any other special request 9)

7	Plan Management	<p>The Proposed Solution must have 1) an advance Plan, Product, VAS Management Functionality, 2) the ability to create Prepaid Plans with Time & Volume Resource/Quota.3) define fixed and cyclic validity of the Prepaid Plan with usage details 4) to define Valid Government Tax for the Prepaid Plan.5) flexibility to update the Tax configuration to comply with the changes in the Tax regime.6) to create a Prepaid Plan offerings Tax. 7) must have the flexibility to bundle multiple Value Added Services along with Data Services e.g. OTT, Voice, etc 8) flexibility to define the Price for the Prepaid and postpaid Plan as well as the VAS Services. 9) offer multiple OTT at the time of Customer Onboarding. 10. flexible combination of base Prepaid Plans with VAS (OTT etc) services to offer lucrative bundles to the customer. E.g. 50 Mbps base plan with Netflix, Prime Zee5 & Hotstar as optional VAS. The customer can choose the same during the Onboarding process. 11. create multiple variations of the same VAS offerings fulfilled by multiple Providers. 12. the ability to configure Location & Location Specific Plans.13. support groupings of plans e.g. Internal Staff, Government Employees Plan, Retail Customer plans. Etc. 14. display the key plan elements on the search / List screen. 15. the creation of Refund Policy as part of Plan offering.17. the creation of One Time Charge. E.g. Router Charge, Installation Charge 18. FUP Functionality for Plan configuration. 19 Plan Types like Base Plan, Add On Plan.</p>
8	Order Management	<p>The Proposed Solution must have an advance Order Management Module 1) ability to capture a New Customer Order 2) capture and decompose an order into multiple trackable Workflows 3) an option to trigger all the sub flows for a given workflow automatically. 4) to manually execute any workflow on need basis.5) track the workflow execution status along with failure status and reasons if any. 6) ability to view the Order status at each stage of the Order workflow.7) track the TAT (Turn around time) for each workflow.8) automatically define a workflow based on the components of a given Plan. E.g. 50 Mbps Plan + Free ONT + Hotstar via M2MIT</p>
9	Revenue Management	<p>The Proposed Solution must have 1) an Advance Billing and Revenue Management Module.2) flexible creation of Invoice 3) multiple Invoice Templates 4) billing of Multiple Services in a Single customer Invoice 5) for Discounts and adjust the values accordingly.6) facility to track the due and Overdue payments from the Customer.7) support creation of Dunning Rules to take a variety of actions including Notifications, Suspensions of Customer Account on delays/default of payments 8) support extension of Suspension Customer Account deactivated due to Dunning Actions.9) support payment of Bills through both Online and Offline payment modes.10) Reconciliation of the Customer Invoices 11) Revenue Share Models with multiple Partners 12) support Dispute Handling of the Invoices 13) Automatic Refund according to the Refund Policy 14) advance Incident Management and Trouble Ticket System.</p>

10	Ticket Management and integrate with helpdesk solution to maintain uniqueness	The Proposed Solution must support 360-degree view 1) Ticket Creation with below channels like IVR, Portal, Customer App and CRM etc 2) Ticket Generation from Customer Portal, Mobile Application. 3) support Filter and Search Complaints by Complaint No, Username, Mobile, Assigned By, Assigned To, Complaint No, Type, Category and Sub-Category, Department wise ticket arrived, Date and Time etc 4) support Facility to export all search results in excel and pdf format 5) Ability to re-assign an opened ticket 6) ability to view Customer Information while Attending/resolving tickets with one click on Subscriber 7) Adding Description/Summary to the Ticket.8) Ticket Status Options Open, In Progress, Resolved, On Hold, Closed status, transfer Forwarded to Next Level 9) Ability to attach a files to a ticket 10) to search a user by account name / mobile number / username / email / Complaint ID / Complaint Type, Category, Sub-Category and Department and any custom requirements 11) maintain a complete audit trail of ticket 12) support Internal notes for the Staff Members WRT to the ticket 13) must Avoid Duplicate Ticket identification and creation based on multiple criteria. 14) support Bulk Ticket closure i.e fault wise, zone wise, common issue 15) the ability to define priority and Severity level for ticket. 16) support automatically assign the district, taluka, GP wise tickets to the respective team and Category of ticket. 16) notify the Staff on Ticket Assignment.
11	Customer Web Self Care	The Proposed Solution must have a Customer Web Self Care for the customer Self Service. must display the below details on the Customer Web Self Care post Authentication. 1. Active Plans 2. Future Plans 3. Plan History 4. Purchase Details, 5. Payment Details 7. Charge Details 8. Ongoing incidents/Tickets 9. Network Sessions
12		The Proposed Solution must 1) able to Make Payments/Recharge via Online Modes from the Customer Web Self Care. 2) creation of a Trouble Ticket and see progress of ticket 3) allow updation of the Modem Password and Self Care Password.
13	Partner Management	The Proposed Solution must have 1) a robust Partner Management Module 2) Partner On boarding 3) must support association of partner with multiple Zone/Location 4) able to assign a plan based revenue share model for the partners 5) to assign a Prepaid Wallet to the partner to hold the Balance 6) able to assign and Check the Credit Limit of the Franchisee over and above the Wallet. 7) able to provide Financial reports around partner commission and Topups. 8) able to provide Financial Ledger of the partners 9) to enable and configure Payment Gateways for the Customers of the partners 10) be able to enable and configure the VAS Fulfillment providers for the partners 11) to enable or disable the Online Payments for the Customers of the partners 12) customize the Notification Templates for the customers of the partners 13) able to configure and allocate the SMS provider for the partner 14) configure the Invoice Template for the partner 15) able to configure and allocate the Staff for the partner 16) able to configure the role based access of the Staff of the partners 17) able to provide a partner Self Care Portal. 18) authenticate the partner with a Secure mechanism. 19) The Proposed Solution must display the below details on the Franchisee Web Self Care portal for all the registered: 1. Active Plans 2. Future Plans 3. Plan History 4. Purchase Details 5. Payment Details 7. Charge Details 8. Ongoing incidents/Tickets 9) Network Sessions

14		The Proposed Solution must able to 1) Recharge his Wallet via Online Modes from the Franchisee Web Self Care. 2) support creation of a Trouble Ticket on behalf of the partner Web Self Care.3) must be allow updation of the Modem Password and Self Care Password. 4) able to Recharge the registered Customers under partner management using the Wallet via partner Web Self Care.
15	Inventory Management	The Proposed Solution must have a robust Inventory Management Module and include 1) manage Physical Inventory in the Inventory Management 2) provide facility to create different types of Physical Items with their specifications and Units of Measurement 3) to create different Store locations to preserve the Inventory. 4) to create and maintain Supply Vendors for the Inventory Items. 5) provide facility to create and maintain Supply Vendors for the Inventory Items. 6) Material Requisition (MR) by the Staff 7) define Approval workflow for the MR request by the Staff.8) to allocate Inventory Items to the Staff based on the Approval workflow 9) record Consumption of the Inventory by the Staff. 10) reconcile the Inventory Items. 11) Ledger covering the entire Inventory Lifecycle for the product 12) must provide the ability to transfer stock between Multiple locations. 13) the ability to configure Low Stock Threshold for the Inventory Items and Alert when the same is breached. 14) to configure call flow for the Inventory items allocated to the customer.
16	Reporting	The solution must provide COTS reports, not limited to: - Aged Debts - Installation Report - Subscription Report - Churn Report - Upgrade/Downgrade Report, financial reconciliation report, standard and customize reports. Reports format should be able to support standard format (e.g. csv, excel, pdf etc.) and able to download from the system as well as Dashboard report should be provided in GUI.
17	IAM	The Proposed Solution must ensure All users must be identified or be mapped to the technology platform by a unique User ID controlled by the central Identity Management (IAM) platform. creating/ updating/ deleting User Groups and removing users from the group. Two types of user level – Admin and User must be supported. (i) Admin level having all rights and permission. (ii) User level having limited access (iii) customize user and partner credentials with permission rights
18		The Proposed Solution Rights and permission on users and user groups level must be able to defined and edited as needed. Password contain a minimum of eight (8) characters in length or decide by GISL, should ensure that the passwords are never be displayed on the screen in clear text (with the exception of one time use).
19	General	Proposed solution must be integrated with supplied solution. Change the policy, work flow, custom rules as defined by GISL.

5.14 Leaf & Border Leaf/ Access Switch

Sr. No.	Solution Requirement
1	The Switch should support non-blocking Layer 2 switching and Layer 3 routing, complete STACK of IPv4 and IPv6 services, equipped with 48 x SFP28 (1/10/25G) ports and 8 x QSFP28 (40/100G) ports with 4 Tbps (HD) switching throughput. Console and management interface/port, 1 RU switch, Rack mountable and support side rails if required, Power redundancy, Modular Operating System with dedicated process for each routing protocol/
2	Switch should support and EVPN(Ethernet VPN) symmetric IRB(integrated routing and bridges) for supporting Spine/core - Leaf architecture to optimise the east - west traffic flow inside the data centre

3	Support VLAN Trunking (802.1q), Create add/delete/modify vlans, L2 and L3 port bonding and link aggregation, number of port channel should be 32. Link layer protocol for finding media level failures, switch should support BGP EVPN- all types, fast switching facility
4	Support Static and Dynamic routing protocols OSPF, BGP, ISIS,BFD, fast re-convergence of routing protocol, should support minimum 512 IP-vrf and 4k Mac-vrf instances, 300K IPv4 LPM routes, 150K Mac address and/or bidder may increase the requirement to meet the operation requirement
5	Support QoS i.e CoS (Class of Service), DSCP (Differentiated Services Code point), rate limit, traffic shaping, Priority base traffic, Weighted random early detection, QoS marking/priority settings of the end points as per the defined policy
6	Switch should support control plane Protection from unnecessary or DoS traffic by control plane protection policy, Role Based access control (RBAC) for restricting host, authentication using external AAA using Tacacs+ or Radius, remote login for administration using SSH. SSHv2, able to GUI login, different privilege for login in to the system for monitoring and management, SNMP or gRPC/gNMI must be supported, Ability to control broadcast/strom control traffic, port level security i.e number of mac address, number of traffic etc. creating access list for traffic permission and deny, port mirroring facility, capture output in tcp dump or hex formats and store in a file during troubleshooting.
7	sending logs to multiple centralised syslog server for monitoring and audit trail, Local storage in the switch, Switch should provide gateway level of redundancy for ipv4 and ipv6 using vrrp or anycast gateway, capturing packets for identifying application performance using local and remote port mirroring for packet captures, Support all model, Support virtualization/stacking/bundling when connect two or more switches
8	N+1 power supply redundancy, console cable, power cable, all component should be from same OEM, Support third party integration: NMS, Syslog, Security Device etc. support sFlow/jFlow/netflow/sflow v5 support for both IPv4 and IPv6

5.15 Hyper Converged Infrastructure

S.No.	Minimum Technical Requirement
1	The solution shall provide hyper converged end to end appliance with software that allows delivery of enterprise-class compute/storage services using latest x86 server infrastructures with an integrated approach (Compute, Network, Storage and Management) technology, without dependence on a separate Storage Area Network & associated components such as SAN Switches & HBAs.
2	All the components of HCI shall be fully factory integrated appliance and ready for fast deployment. The product should be licensed for hardware and all the required software for proposed solution
3	Proposed solution must be “Hyper Converged Infrastructure” listed in the leaders’ quadrant of latest Gartner’s Magic Quadrant for Hyper Converged Infrastructure for consecutive last 3-year report. The OEM Should provide the warranty & support for both Hardware and Software. Proposed HCI Solution should be aligned to a single product roadmap from a single vendor.
4	The proposed Solution must have single management browser based console for managing but not limited to VM, SDS, Replication, Backup & DR, Files NAS, Microsegmentation, Updates and Upgrades etc.
5	SDS Feature : Proposed Solution must be Hypervisor and Cloud agnostics and must support Native Hyper-V, ESXi for future investment protection. And allow migration from above mentioned Hypervisor. Bidder need to submit the public URL document on the same.
7	SDS Feature: The HCI solution shall be configured with min 80 TB usable cluster disk capacity with SSD & NL-SAS OR SAS drives. The capacity shall be achieved without considering any data reduction

	features viz de-duplication, compression & Erasure coding. Also the proposed solution should be able to rebuild data automatically after a node failure automatically.
8	SDS Feature: The HCI solution shall support scaling hyper converged node in terms of adding a compute only node or storage only node or mixed Node for CPU and Storage. The proposed HCI solution shall be proposed with support for minimum one Node failure and it should in no way affect/degrade the production services by usable resources, to the end user application. The solution shall have no single point of failure (NSPOF). The SDS Solution Must support Hybrid and All flash node within same cluster, as in Future will have all-flash nodes/ NVMe or SSD etc. Operating system, Database and any other licenses are required to provide as per functional/RFP requirement with upgrade/update support during the contract period.
9	SDS Feature: The proposed HCI solution shall support scalability up to 8/16/64 hyper converged nodes (Compute + Storage) or more in a single cluster. N+1 redundant power supplies & cooling fans. Ssolution shall support future addition of nodes with different CPU models and memory capacity/configuration in the same cluster.
10	Bidder/OEM Need to consider 28 Core Processor, No. of Nodes without HA- 4, No. of Nodes with HCI Overhead (with HA) – 5, Usable Sizing mentioned below is without dedup, Compression and Erasure Coding. Hence bidder need to confirm the same. Bidder need to consider 10Gbps SFP/Base-T Switches in Pair (24 Port min). Bidder Need to consider 10Gbps * 4 Port in each of the HCI Nodes. Usable Core: 200, Usable RAM- 1800 GB, Usable Storage- 80 TB.

5.16 Server Management Switch

Sr. No.	Minimum Required Specification
1	Ports: 48 x 1GE RJ45 Electrical Ports for OOB Management connectivity with leaf, spine, border-leaf, wan & internet routers and 4x10GE SFP ports populated with 10G SR SFP for uplink connectivity. Should have aggregated system throughput minimum 176Gbps FD, 32 MB of System Buffer, RAM - 16GB, CPU - 4 Cores, SSD - 32GB.
2	Switch Platform should support, IPv4 host routes: 64K, MAC Addresses: 8K, IPv6 host routes: 5K, VLAN: 4096, OSPFv2, OSPFv3, eBGP, ISIS, SNMPv1/2/3 or equivalent next generation interfaces like gNMI, gRPC, JSON-RPC, NTP, telemetry.
3	Switch and optics should be from the same OEM.

5.17 SDN Controller

Sr No.	Minimum Technical Requirements.
1	Solution manages flow control for improved network management and application performance. Proposed fabric must be the Clos network topology architecture defined using Core, Server switches with VXLAN (RFC7348) overlay. Solution should allow workload mobility anywhere in the SDC, across the Data Center sites, edge locations, Leaf switches to Spine connectivity should use 100 G uplink port. Should be integrate with different VIM viz. vCenter, Kubernetes, Openshift and manage virtualize networking and supplied solution from centralized management plane.

2	Should support 512 BGP-EVPN VXLAN VRF / Private Network. Should act as single distributed layer2 Switch, Layer3 Router and stateless distributed firewall etc. SDN controller should support Kuberenetes based architecture. Should be on premise and must have all related licenses to support the entire fabric infrastructure. SDN controller must support intent based networking (IBN) framework with all the necessary licenses built in system from Day-1.
3	The SDN platform must have capability to define 'fabric as code' in a declarative way eg: in YAML format, for continuous integration and continuous deployment of network infrastructure and for configuring the network with 'infrastructure as code' model. SDN controller should support instantiation the DC fabric from intent by providing for example #of racks, #of uplinks per rack,#speed of uplinks,#speed of access interfaces.
4	Should support multi tenancy and role base access control to tenant for management. Should support micro-segmentation rules and policies for workloads connected to DC fabric for east- west traffic. Should support Fabric underlay configuration auto-generated from intent execution: AS Number allocation, Point to Point IPs, BGP Sessions auto generated from the intent rules.
5	SDN Controller should support on-prem integrated digital twin of the Data Center Leaf & Spine Fabric allowing it to build an exact replica of the fabric. This will use real time network states from production Leaf & Spine fabric and can create digital replica. This should allow to confirm and test how upgraded software, new feature functionality will perform before implemented in production. All the necessary hardware and licenses must be incorporated in solution from Day-1.
6	SDN Controller using digital twin functionality should support functionality like Validate design, Deploy fabric intent, Deploy workload intent. Make configuration changes without risk, software upgrade without risk etc. This functionality is required so that any change in network is first validated on-prem in the digital twin / digital sandbox / network replica before deployment into production network. The same SDN controller must be capable to manage the digital twin (network emulation) without requirement of any external solution. Incase multiple solutions and controllers are required to build this functionality, all the necessary hardware and licenses must be incorporated by the OEM in solution from Day-1. SDN Controller should not participate in Data plane and control plane path of the fabric.
7	Must run in N + 1 redundancy to provide availability as well as function during the split brain scenario. In case of SDN Controllers fails, the fabric must function without any performance degradation and with the current configuration. Should provide dynamic device inventory of the fabric, current network topology (like bandwidth utilization, traffic throughput etc.), Also validate the cabling connectivity and generate alarms in case of deviation from the intent.
8	SDN Controller should support for cable map generation of designed Leaf & Spine Fabric which can be shared with field team for physical connectivity. Controller / Management plane must have ability to automate BGP-EVPN peering across the leaf & Spine fabric as control plane protocol to federate routing information. SDN Controller should support integration with cloud management systems like VMWare and open source systems like open stack, K8S.
9	SDN Controller should have support to be able to do pre-configuration / pre-change analysis of configuration CLI so that it can point out any challenges/issues even before actually pushing configuration to the Leaf & Spine Fabric. Should support to detect configuration deviation from designed and actual state of the fabric network. Should give flexibility to admin accept or reject the configuration deviation

5.18 Routing EMS and Orchestration Layer

S. No.	Minimum Technical Requirement
1	The EMS shall support capability for monitoring, provisioning and configuration of IP/MPLS network through NOC & support single management system for IP/MPLS network to provide ease of operation
2	EMS shall be capable of providing the FCAPS functionality to the network. EMS shall provide all necessary information to NMS on standard interfaces.
3	It should support northbound open interfaces such as SNMP/JA VA/CORBA/XML for integration with the NMS. It should also support client-server-based architecture. Client being GUI/web browser-based access with secure interface to the server. It should allow service and equipment provisioning.
4	EMS should allow the user to zoom down to the port level of any given card /equipment.
5	EMS should support Scheduler to handle administrative operations to be performed repeatedly at a particular time of day. Such as: NE configuration backup, software image download, operator login/logout attempts, etc.
7	Alarms should be categorized into different categories e.g. Emergency/Critical, Flash/Major, Immediate /Minor, Priority/Warning, Deferred / Informative depending upon the severity of the alarm, display the Network Elements and the links in different colors depending upon their status for healthy, degraded and critical alarm conditions, Dashboard should indicate the number of active alarms with filtering options based on the period, duration, severity, event type and location.
8	The NMS system should support email or SMS feature for informing user, all failure and restoration events should be time-stamped, GUI shall provide the ability to create, delete and modify topology views of the network.
9	EMS should be based on open, secure, and scalable software for optimizing network infrastructure and operations, it should support editing that provides the ability to view, edit, and delete all aspects of a device's configuration.
10	EMS should support audit logs, rapid deployment of IP/MPLS network, APIs for customization and integration.
11	The system should be able to create performance reports and Alarm reports. These reports shall be HTML or pdf which can be dynamically generated and sent over e-mail. The system should also allow creation of group profiles with multiple users as member and should facilitate with similar access policy and permission.

5.19 Indoor Access Point -2*2

Sr No	Category	Minimum Required Specifications
1	Access Point	<p>The Wireless Access Point must have 802.11 ax and support backward compatible, Wi-Fi 6 standard, 2x2 MU-MIMO & SU-MIMO, an Indoor Type and should support latest Open WRT/ DDWRT/TR-069/WISP firmware or any other open Firmware and compatible with centralized open wireless controller. It should be Pre-configured/ Configurable with the necessary open firmware such that it becomes a Plug and Play device and should be auto discoverable by Software based controller.</p> <p>Device must have base throughput of 1.2 Gbps. Must have router mode and DHCP server for IP allocation to the connected devices.</p> <p>Access points should be installed in gram panchayat office at strategic location where maximum people can easily access with full signal strength. If necessary, access points should be wall and ceiling mountable.</p>
2		<p>The Wireless Access Point must be shipped with the mounting accessories, Minimum Two number of ports (WAN+LAN) with 1 Gbps Ethernet port, POE supported ports - speed can be set 10, 100, 1000 and auto sensing based Ethernet ports, must support SSH, HTTPS and SNMP. Any Wi-Fi enabled device can connect to Access point and use the internet services.</p>

3	Antenna	The Wireless Access Point must have minimum 4 Internal/External Antenna. must be Omnidirectional Antenna of 5 dB or more and minimum distance to cover minimum 100 meters.
4	Basic Radio	The Wireless Access Point must be able to support 2.4GHz & 5 GHz, simultaneously support 2.4 and 5 GHz band, must have backwards compatibility to 802.11a, b, g, n, ac, ax Wi-Fi standards, have OFDMA (at least 1024 QAM), have Omnidirectional Antenna Radiation Pattern functionality or 360 degree coverage pattern antenna. Any Wi-Fi enabled device can connect to Access Points and provide the internet facility.
5	Surge Protection	The Wireless Access Point must have Surge Protection, voltage protection.
6	Transmit Power	Transmit power of The Wireless Access Point Compliant with relevant national / international standard (WPC/FCC/CE/NTC, etc.)
7	Band Steering	The Wireless Access Point shall support Band steering: Steers wireless clients to the Concurrent operation in the 5 GHz band.
8	Performance/ Capacity	Minimum 50 concurrent users @ each radio.
9	Networking Features	The Wireless Access Point shall provide flexibility of segregating control plane & user plane traffic. support Layer 2 & 3 tunneling technologies
10		The Wireless Access Point shall provide VPN support through the following: IPsec, PPTP, L2TP, IP-Filtering, support ARP, DHCP snooping, SSL
11		The Wi-Fi Access Points and the solution should support configuration in both Bridge and NAT modes. WAN Configurations of PPPoE, DHCP, Static IP, VLAN. Support LAN Configurations of DHCP Server
12		The Wireless Access Point must support the below Tunnels: L2TP,GRE/EoGRE, SSLVPN, L2TP/IPSEC, PPTP, Wireguard
13	Roaming	The Wireless Access Point shall support Infrastructure-controlled zero-loss handover mechanism for standard Wi-Fi clients. Also support roaming for PSK based SSID and Captive Portal based SSID or any standard method
14	Security	The AP shall support portal based Authentication based on Radius Protocol.
15		The AP shall support WPA2 Enterprise based Authentication on 802.1X with following EAP methods:
16		EAP-Protected EAP (PEAP), EAP-Transport Layer Security (EAP-TLS), EAP-Tunnelled TLS (EAP-TTLS), EAP-SIM, EAP-AKA – RFC4187, EAP-PSK(Pre Shared Key)- RFC4764, EAP-IKEv2(Internet Key Exchange)version2- RFC5106, EAP-EKE(Encrypted Key Exchange)- RFC6124, MSCHAPv2, PEAPv1
17		The AP shall support local authentication based on WPA2 & WPA3-Personal based on PSK.
18	Mesh	The Wireless Access Point shall facilitate manual and automatic mesh formation. It should be sync with wireless controller.
19	Wi-Fi - Cellular Mobility / Offloading	Should support Automatic Offloading: Hotspot 2.0 / Passpoint (802.11u) - seamless roaming (and offloading) among Wi-Fi and cellular networks (one-way)
20		QOS Driven Offloading: Access Network Discovery and Selection Function - seamless roaming (and offloading) among Wi-Fi and cellular networks (both-way)
21	Multiple SSID Configuration	Max Number of SSID must be able to support 8 SSIDs per radio (declare how many are supported), Unique Portal per SSID: ability to setup unique login portals per SSID
22	IP Dual Stacking	Ability to support addressing for both IPv4 and IPv6 and work actively between the two networks
23	Multicast Broadcast Support	Multicast Broadcast Support must have the ability to deliver information using multicast packets to a client instead of a unicast packet
24	Power	The Access Point must support all features supported on 802.3at PoE.

25	Security	The Wireless Access Point must have a built-in Firewall Capability, URL/Web Filtering and L7 Application Filtering
26	Modes	The Wireless Access Point must be configurable in a Gateway & Bridge Mode.
27	Quality of Service	The Wireless Access Point must support the below QOS Policies: WMM Access Categories, QoS-based scheduling, Directed Multicast, L2/L3/L4 ACLs
28	DPI	The Wireless Access Point must support the DPI function to identify the Applications being used by Individual users and devices.
29	Other	Should support interference detection and avoidance for both Wi-Fi and non-Wi-Fi interferes.
30		Support Indian Temperature and humidity.
31		Access Point shall support all security guidelines prescribed by Government of India (and updated from time to time) for Access Points.
32		Intelligent RF control plane for self-healing, and self-optimization.
33		Overvoltage Protection, Power failure alarm should be extended to NOC as a separate alarm.
34		AP shall be able to assign end User/client the IP address and facility to assign IP address to end users received from backend core Central Infrastructure.
35		System should provide the capability to capture the data and syslog for audit and analysis.
36		AP Shall should provide all required information to NMS. Intelligent RF control plane for self-healing, and self-optimization
37		Should support mechanism to blacklist the AP so it cannot be configured if the AP is stolen, LED Management.
38		The operation of Wireless Access Point shall be in the license free bands of 2.4 and 5 GHz bands and as per latest National Frequency Allocation Plan (NFAP) and published WPC GSRs
39		SSID Based VLAN Management, SSID Wise Bandwidth Limiting
40		Should be able to detect clients that have dual band capability and automatically steer those client to use the 5GHz band instead of the 2.4GHz band.
42		Should configurable as a WAN Router and Access Point, as needed at site. Port Forwarding in Router mode.
43	Firmware Update	The OEM must provide continuous firmware upgrades to protect the Wi-Fi Access Points against any vulnerabilities, least 5 years of firmware upgrades, remotely upgradeable from the Wireless Controller
44	OEM	The OEM of quoted Access point should have supplied 5000 access point in the last three years.

5.20 POE Injector/Converter

S/n	Minimum Required Specifications
1	Should support 10,100, 1000 Base-Tx. This converter will use to convert Non-POE port to POE port for access points. Should Support Half Duplex, Full Duplex and Auto Negotiation. No Packet drop. Should support minimum 100-meter range for connection. Plug and Play Device, no configuration required. Data Transfer rate minimum 1000 Megabits per second. LED Indication for Power and Ethernet ports.

	Compatible with all POE Device, AC Connector (Compatible with existing GFGNL Infra), minimum two ports.
2	Should have standard Rj-45 Ethernet connection (Non-POE Switch(Existing GFGNL Switch) ->POE Injector/Converter(Non-POE to PoE)->Access Point
3	No power loss using the POE Injector/Converter. Provide sufficient power to Access Points. Auto Detect the required power supply
4	Provide constant power to access point
5	No packet/data loss using POE Injector/converter
6	Power fluctuation protection, Over Voltage Protection
7	Handle Indian temperature and humidity
8	Protocols- IEEE 802.3, 802.3u, 802.3x and latest one

5.21 Any Other Equipment.

S/n	Minimum Required Specifications
1	To be defined by the Bidders: If bidder deems fit that they required any other hardware or software to successfully run and manage the proposed solution. Bidder is free to bring the same however GISL shall not be bound to pay any extra cost for the same.

Note:

- 1) The solution should have facility to allocate and reserve specific %/Mbps/Gbps bandwidth to end users and %/Mbps/Gbps bandwidth to specific IP groups / events / locations from single and dual/multiple ISP Uplinks. Bidder can provide solution by QoS/Traffic Shaping/Rate-Limit/Any other advance method from supplied hardware.
- 2) The Technical Specifications mentioned are indicative and the bidders are free to propose/provide equipment of higher configuration in line with the scope of work.
- 3) The bidder needs to consider and provide any other equipment that may be required for the successful running of the project that may not have been included in the list under this section.
- 4) Bidder will maintain, manage & provide comprehensive AMC support for implemented solutions or if require, bidder may replace the same with equivalent/ better capabilities
- 5) Hardware sizing to be done for functional outcome, to be supplied and provide optimal performance.
- 6) All the supplied hardware/software under this RFP must be in compliance with the latest DoT, TRAI, GoG, GoI Guidelines.
- 7) All the supplied license under this RFP must be issued in the name of GISL/GIL and perpetual from day one without any linking with ATS (Annual Technical support) or other services by OEM/Developers. No conditional license is allowed.
- 8) The offered solution and product should adhere the guidelines related to restriction of the purchase from the border country as per G.F.R issued by Ministry of Finance, Department of Expenditure, Government of India, dated, 23rd July, 2020 and any subsequent revision. Undertaking of bidder as well as OEM as per the format- Annexed is required to be submitted along with bid

5.22 Minimum Quantity but not Limited:

Sr. No	Item	DC	OLT/DWDM Locations	Villages
1	Software based Wireless Controller with Licenses	1+1		
2	AAA Solution with Licenses	1+1		
3	Captive Portal Solution/SMP	1+1		
4	OSS+BSS+CRM Solution with Licenses	1+1		
5	WAN Router	1+1		
6	BNG Gateway	1+1		
7	DWDM/Districts/Block- Routers		100	
8	Core/Spine Switch	1+1		
9	Leaf/Border Leaf Switch	8		
10	NTP Server	1		
11	Network Management including ITSM, Helpdesk	1+1		
12	Hyper converged Solution (Hardware + Software)	1		
13	NGFW (FW+IDS+IPS)	2		
14	SMS Gateway – 1 Crore SMS Facility	1 lot		
15	Link Load Balancer	1+1		
16	Server Load Balancer	1+1		
17	SDN Controller with licence	1+1		
18	Routing EMS & Automation Orchestrator	1+1		
19	Indoor Access Points (2*2)			8,000
20	Converter/POE Injector			8,000
21	Any other items is required for RFP Requirement			

SECTION-VI
INSTRUCTION
TO BIDDERS

6.1 GENERAL INSTRUCTION TO BIDDERS

All information supplied by Bidders may be treated as contractually binding on the Bidders on successful award of the assignment by the GISL on the basis of this RFP. No commitment of any kind, contractual or otherwise shall exist unless and until a formal written contract has been executed by or on behalf of GISL. Any notification of preferred bidder status by the GISL shall not give rise to any enforceable rights by the Bidder. GISL may cancel this public procurement at any time prior to a formal written contract being executed by or on behalf of GIL.

This RFP supersedes and replaces any previous public documentation, communications, and Bidders should place no reliance on such communications. GIL may terminate the RFP process at any time and without assigning any reason. GIL make no commitments, express or implied, that this process will result in a business transaction with anyone.

6.2 COST OF BIDDING

6.2.1 The Bidder shall bear all costs associated with the preparation and submission of the Bid. GISL/GIL will in no case be responsible for those costs, regardless of the conduct or outcome of the bidding process.

6.3 BIDDING DOCUMENT

Bidder can download the bid document and further amendment if any freely available on www.gil.gujarat.gov.in and <https://gem.gov.in> and upload the same on <https://gem.gov.in> on or before due date of the tender. Bidder is expected to examine all instructions, forms, terms, and specifications in the bidding documents. Failure to furnish all information required by the bidding documents or submits a Bid not substantially responsive to the bidding documents in every respect may result in the rejection of the Bid. Under no circumstances physical bid will be accepted.

6.4 CLARIFICATION ON BIDDING DOCUMENT

A prospective bidder requiring any clarification of the bidding documents may seek clarification of his/her query on the date indicated on RFP clause of this document. GIL/ GISL will respond to any request for the clarification of any bidding documents, which it receives during the meeting on the date mentioned on the RFP clause of this document GIL shall hold a pre-bid meeting with the prospective bidders on date & time given.

The Bidders will have to ensure that their queries for pre-bid meeting should reach to Name, Address, Fax and email id of the officer mentioned by post, facsimile or email on or before on date & time given.

Bidder's Request for Clarification			
Name of Organization submitting request		Name & position of person submitting request:	Address of organization including phone, fax, email points of contact
Sr. No.	Bidding Document Reference (Clause /page)	Content of RFP requiring clarification	Points of Clarification required
1			

Gujarat Informatics Limited shall not be responsible for ensuring that the bidder's queries have been received by them. **Any requests for clarifications post the indicated date and time may not be entertained by the GIL/GISL.**

At any time prior to the deadline for submission of bids, GIL/ GISL may, for any reason, whether on its own initiative or in response to the clarification may change their bidding document by amendment; the amendment will be uploaded online through <https://.gil.gujarat.gov.in> & <https://gem.gov.in> . Any such corrigendum shall be deemed to be incorporated into this RFP.

6.5 AMENDMENT OF BIDDING DOCUMENTS

At any time prior to the deadline for submission of bids, GISL/GIL, for any reason, whether at its own initiative or in response to the clarifications requested by prospective bidders may modify the bidding documents by amendment & put on our websites.

All prospective bidders are requested to browse our website & any amendments/ corrigendum/ modification will be notified on our website and such modification will be binding on them.

In order to allow prospective bidders a reasonable time to take the amendment into account in preparing their bids, GISL/GIL, at its discretion, may extend the deadline for the submission of bids.

6.6 LANGUAGE OF BID

The Bid prepared by the Bidder, as well as all correspondence and documents relating to the Bid exchanged by the Bidder and GISL/GIL shall be in English. Supporting documents and printed literature furnished by the bidder may be in another language provided they are accompanied by an accurate translation of the relevant pages in English. For purposes of interpretation of the bid, the translation shall govern.

6.7 BID SECURITY/ EARNEST MONEY DEPOSIT (EMD)

6.7.1 Bidders shall submit **EMD of Rs. 1,00,00,000/-** in the form of Demand Draft OR in the form of an unconditional Bank Guarantee (which should be **valid for 6 months** from the last date of bid submission) of any Nationalized Bank including the public sector bank or Private Sector Banks or Commercial Banks or Co-Operative Banks and Rural Banks (operating in India having branch at Ahmedabad/ Gandhinagar) as per the G.R. no. EMD/04/2022/0002/DMO dated 20.05.2022 issued by Finance Department or further instruction issued by Finance department time to time; in the name of "Gujarat Informatics Ltd." payable at Gandhinagar (as per prescribed format given) and must be submitted along with the covering letter. **Start - UP is Exempted from EMD. MSME is Exempted only when MSME unit is OEM and providing end to end solution by themselves only.**

OR

Bidders can also submit the EMD with Payment Online through RTGS/internet banking in Beneficiary name Gujarat Informatics Ltd., **Account No. 50100247366022**, IFSC Code **HDFC0000190**, Bank Name **HDFC Bank Ltd.** Branch address Sector-16, Gandhinagar Branch.

The sealed cover should be super scribe as "EMD for the Request for Proposal for "Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure on behalf of Gujarat ISP Services Limited (GISL)".

6.7.2 EMD of all unsuccessful bidders would be refunded by GIL within 60 Days on selection of successful bidder.

6.7.3 The EMD of successful bidder would be returned upon submission of Performance Bank Guarantee as per the format provided in RFP.

6.7.4 EMD amount is interest free and will be refundable to the unsuccessful bidders without any accrued interest on it.

6.7.5 The bid / proposal submitted without EMD, mentioned above, will be summarily rejected.

6.7.6 The EMD may be forfeited, In case of a Bidder if:

6.7.6.1 The bidder withdraws its bid during the period of bid validity.

6.7.6.2 The Bidder does not respond to requests for clarification of their Bid.

6.7.6.3 The Bidder fails to co-operate in the Bid evaluation process.

6.7.6.4 In case of successful bidder, the said bidder fails:

6.7.6.4.1 Fails to sign the agreement in time

6.7.6.4.2 Fails to submit performance bank guarantee

6.8 LANGUAGE OF THE BID

6.8.1 The Bid prepared by the Bidder, as well as all correspondence and documents relating to the Bid exchanged by the Bidder and GISL/GIL/GIL shall be in English. Supporting documents and printed literature furnished by the bidder may be in another language provided they are accompanied by an accurate translation of the relevant pages in English. For purposes of interpretation of the bid, the translation shall govern.

6.9 LATE BIDS

6.9.1 Bids received after the due date and the specified time (including the extended period if any) for any reason whatsoever, shall not be entertained and shall be REJECTED.

6.9.2 The bids submitted by telex/telegram/ fax/e-mail etc. shall not be considered. No correspondence will be entertained on this matter.

6.10 SECTION COMPRISING THE BIDS

6.10.1 The quotation should be scan-able and distinct without any option stated in.

6.10.2 All forms / Tables, duly filled-in with necessary proofs, as required and stated in the bid document & supporting documents for eligibility criteria should be uploaded. The bid uploaded shall have the following documents:

6.10.2.1 **BID SECURITY SECTION:** The bid security to be furnished to GIL office in the form of demand draft in favour of "Gujarat Informatics Ltd." payable at Ahmedabad/Gandhinagar before opening of un-price bid. The details are required to be filled in this section.

6.10.2.2 **ELIGIBILITY & TECHNICAL SECTION**

- 1.) Financial Capabilities. (In the Prescribed Format Only: Annexure IV: Financial Details of the Bidder)
- 2.) Bidder's Experience. (In the Prescribed Format Only: Annexure V: Bidder's Experience)
- 3.) Compliance Statement. (In the Prescribed Format Only: Annexure VI: Compliance Statement)
- 4.) Proposed Technical Solution as per the Scope of Work with details of each component/Module
- 5.) Proposed Technical Architecture for the project, with details of each project component
- 6.) Detailed Write-up on the Approach & Methodology for implementing and maintenance of the project.

6.10.2.3 **PRICE BID SECTION: Priced bid** (in the prescribed format only)

6.10.3 Price shall be inclusive of all freight, forwarding, transit insurance and installation charges. Prices shall be inclusive of Excise Duties. The prices shall strictly be submitted in the given format. **Quoted prices shall be with GST.** Successful Bidder will have to supply/provide goods with an Invoice from a place located within State of Gujarat.

- 6.10.4** Prices shall be written in both words and figures. In the event of difference, the price in words shall be valid and binding. Arithmetical errors will be rectified on the following basis.
- 6.10.5** The bidder should provide calculations (Bill of Material with installation and setup charges, exclusive of taxes) for the quoted items, without which the bid is liable for rejection. Any arithmetical errors in these calculations will be on bidders account.
- 6.10.6** Offered price should be **inclusive of all applicable taxes such as GST**, FOR destination (anywhere in Gujarat state).

6.11 BID OPENING

- 6.11.1** Bids will be opened in the presence of Bidder's representatives, who choose to attend. The Bidder's representatives who are present shall sign a register evidencing their attendance.
- 6.11.2** In the event of the specified date of Bid opening being declared a holiday for the GIL, the Bids shall be opened at the appointed time and location on the next working day.
- 6.11.3** The Bidder's names, bid modifications or withdrawals, discounts and the presence or absence of relevant Bid security and such other details as the GISL/GIL officer at his/her discretion, may consider appropriate, will be announced at the opening.
- 6.11.4** Immediately after the closing time, the GISL/GIL contact person shall open the Un-Priced Bids and list them for further evaluation.
- 6.11.5** Bids that are not opened at bid opening shall not be considered further for evaluation.

6.12 BID VALIDITY

- 6.12.1** Bids shall remain valid for 180 days after the date of Bid opening prescribed by GISL/GIL. A Bid valid for a shorter period shall be rejected as non-responsive.
- 6.12.2** In exceptional circumstances, GISL/GIL may solicit Bidder's consent to an extension of the period of validity. The request and the responses thereto shall be made in writing. The Bid security shall also be suitably extended. A Bidder's request to modify the Bid will not be permitted.

6.13 CONTACTING GISL/GIL

- 6.13.1** Bidder shall not approach GISL/GIL officers outside of office hours and/ or outside GISL/GIL office premises, from the time of the Bid opening to the time the Contract is awarded.
- 6.13.2** Any effort by a bidder to influence GISL/GIL officers in the decisions on Bid evaluation, bid comparison or contract award may result in rejection of the Bidder's offer. If the Bidder wishes to bring additional information to the notice of the GISL, it should do so in writing.

6.14 REJECTION OF BIDS

GISL/GIL reserves the right to reject any Bid, and to annul the bidding process and reject all bids at any time prior to award of Contract, without thereby incurring any liability to the affected Bidder(s) or any obligation to inform the affected Bidder(s) of the grounds for such decision.

6.15 BID EVALUATION PROCESS

- 6.15.1** Part – I: Bidders who have submitted the valid bid security as per the format shall be considered for further evaluation.
- 6.15.2** Part – II: Bidders qualified as per the "Eligibility criteria" will be further technically evaluated. In technical evaluation, Technical proposal will be evaluated and those who complied with RFP requirement will be called for technical demonstration and technical presentation.
- 6.15.3** Technical presentation of Proposed Solution: Bidder who will qualify for prequalification and eligibility criteria will be asked for technical presentation. If required, GISL may ask bidder to carry out technical demonstration of the proposed solution.

6.15.4 There will a technical presentation for eligible bidders. In the technical presentation those who gets 60 % or more percentage will be short- listed for opening of price bid:

40 Marks- Technical Presentation

TECHNICAL PRESENTATION		
Items	Mark	Obtained Marks
Understanding - GISL Scope of Work	10	
Method/Approach for execution	10	
Technical Competency/compliance	10	
Value Added Service- Better Approach for Execution	10	
Total		

6.16 AWARD OF CONTRACT

- 6.16.1** Award Criteria: The Criteria for selection will be the lowest cost to GISL for the qualified bid. GISL/GIL may negotiate the prices with L1 Bidder, under each item/head offered by Bidder.
- 6.16.2** GISL/GIL right to vary requirements at time of award: GISL/GIL reserves the right at the time of award to increase or decrease quantity for the requirements originally specified in the document without any change in Bid rate or other terms and conditions.
- 6.16.3** Upon the selection of the successful bidder, work order will be released to successful bidder.

6.17 NOTIFICATION OF AWARD & SIGNING OF CONTRACT

- 6.17.1** Prior to expiration of the period of Bid validity, GISL/GIL will notify the successful Bidders and issue work order.
- 6.17.2** Within fifteen (15) calendar days of receipt of the Contract Form, the successful bidder shall sign and date the Contract and return it to the GISL/GIL. The contract Performance guarantee has to be submitted within 15 calendar days of receipt of final work order. The Performance Bank guarantee shall be equal to 10% of the contract value valid for duration of 180 days beyond the expiry of contract.

6.18 FORCE MAJEURE

- 6.18.1** Force Majeure shall mean any event or circumstances or combination of events or circumstances that materially and adversely affects, prevents or delays any Party in performance of its obligation in accordance with the terms of the Agreement, but only if and to the extent that such events and circumstances are not within the affected party's reasonable control, directly or indirectly, and effects of which could have prevented through Good Industry Practice or, in the case if construction activities through reasonable skill and care, including through the expenditure of reasonable sums of money. Any events or circumstances meeting the description of the Force Majeure which have same effect upon the performance of any contractor shall constitute Force Majeure with respect to the TPA.

6.18.2 The Parties shall ensure compliance of the terms of the Agreement unless affected by the Force Majeure Events. The TPA shall not be liable for forfeiture of its implementation / Performance guarantee, levy of Penalties, or termination for default if and to the extent that it's delay in performance or other failure to perform its obligations under the Agreement is the result of Force Majeure.

6.18.3 Force Majeure Events: The Force Majeure circumstances and events shall include the following events to the extent that such events or their consequences (it being understood that if a causing event is within the reasonable control of the affected party, the direct consequences shall also be deemed to be within such party's reasonable control) satisfy the definition as stated above. Without limitation to the generality of the foregoing, Force Majeure Event shall include following events and circumstances and their effects to the extent that they, or their effects, satisfy the above requirements:

6.18.4 Natural events ("Natural Events") to the extent they satisfy the foregoing requirements including:

- 6.18.4.1 Any material effect on the natural elements, including lightning, fire, earthquake, cyclone, flood, storm, tornado, or typhoon;
- 6.18.4.2 Explosion or chemical contamination (other than resulting from an act of war);
- 6.18.4.3 Epidemic such as plague;
- 6.18.4.4 Any event or circumstance of a nature analogous to any of the foregoing.

6.18.5 Other Events ("Political Events") to the extent that they satisfy the foregoing requirements including:

- 6.18.5.1 Political Events which occur inside or Outside the State of Gujarat or involve directly the State Government and the Central Government ("Direct Political Event"), including:
 - Act of war (whether declared or undeclared), invasion, armed conflict or act of foreign enemy, blockade, embargo, revolution, riot, insurrection, civil commotion, act of terrorism or sabotage;
 - Strikes, work to rules, go-slows which are either widespread, nation- wide, or state-wide or are of political nature;
 - Any event or circumstance of a nature analogous to any of the foregoing.

6.18.6 FORCE MAJEURE EXCLUSIONS: Force Majeure shall not include the following event(s) and/or circumstances, except to the extent that they are consequences of an event of Force Majeure:

- 6.18.6.1 Unavailability, late delivery
- 6.18.6.2 Delay in the performance of any contractor, sub-contractors or their agents;

6.18.7 PROCEDURE FOR CALLING FORCE MAJEURE: The Affected Party shall notify to the other Party in writing of the occurrence of the Force Majeure as soon as reasonably practicable, and in any event within 5 (five) days after the Affected Party came to know or ought reasonably to have known, of its occurrence and that the Force Majeure would be likely to have a material impact on the performance of its obligations under the Agreement.

6.19 CONTRACT OBLIGATIONS:

Once a contract is confirmed and signed, the terms and conditions contained therein shall take precedence over the Bidder's bid and all previous correspondence.

6.20 AMENDMENT TO THE AGREEMENT

Amendments to the Agreement may be made by mutual agreement by both the Parties. No variation in or modification in the terms of the Agreement shall be made except by written amendment Signed by both the parties. All alterations and changes in the Agreement will take into account prevailing rules, regulations and laws applicable in the state of Gujarat.

6.21 REPRESENTATIONS AND WARRANTIES

6.21.1 Representations and Warranties by the Selected Agency:

- 6.21.1.1 It is a company/ organization under any statute of India duly organized and validly existing under the laws of India and has all requisite legal power and authority and corporate authorizations to execute the Agreement and carry out the terms, conditions and provisions hereof;
- 6.21.1.2 It has in full force and effect all requisite clearances, approvals and permits necessary to enter into the Agreement and perform its obligations hereof;
- 6.21.1.3 It will have the legally valid and enforceable title to all Equipment as may be necessary for proper functioning and it will be free from all encumbrances, liens, charges, any security interest and adverse claims of any description;
- 6.21.1.4 The Agreement and the transactions and obligations hereof do not contravene its constitutional documents or any law, regulation or government directive and will not contravene any provisions of, or constitute a default under, any other Agreement or instrument to which it is a party or by which it or its property may be bound or any of its obligations or undertakings by which it or any of its assets are bound or cause a limitation on its powers or cause it to exceed its authorized powers;
- 6.21.1.5 There is no pending or threatened actions, suits or proceedings affecting the selected agency or its affiliates or any of their respective assets before a court, governmental agency, commission or arbitrator or administrative tribunal which affects the selected agency's ability to perform its obligations under the Agreement; and neither selected agency nor any of its affiliates have immunity from the jurisdiction of a court or from legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution or otherwise);
- 6.21.1.6 The selected agency confirms that all representations and warranties of the selected agency set forth in the Agreement are true, complete and correct in all respects;
- 6.21.1.7 No information given by the selected agency in relation to the Agreement, project documents or any document comprising security contains any material miss- statement of fact or omits to state as fact which would be materially averse to the enforcement of the rights and remedies of GISL/GIL or which would be necessary to make any statement, representation or warranty contained herein or therein true and correct;
- 6.21.1.8 All equipment including material to be installed by the selected agency shall be new. All equipment shall conform to the codes, standards and regulations applicable to networking facilities and benefit from the usual manufacturer's guarantees.

6.21.2 Representations and Warranties by GISL/GIL

- 6.21.2.1 It has full legal right; power and authority to execute the Village Wi-Fi project and to enter into and perform its obligations under the Agreement and there are no proceedings pending.
- 6.21.2.2 The Agreement has been duly authorized, executed and delivered by GISL/GIL and constitutes valid, legal and binding obligation of GISL/GIL.
- 6.21.2.3 The execution and delivery of the Agreement with the selected agency does not violate any statutory judgment, order, decree, regulation, right, obligation or rule of any court, government authority or arbitrator of competent jurisdiction applicable in relation to GISL/GIL, its assets or its administration.

6.22 RESOLUTION OF DISPUTES

- 6.22.1** If any dispute arises between the Parties hereto during the subsistence or thereafter, in connection with the validity, interpretation, implementation or alleged material breach of any provision of the Agreement or regarding a question, including the questions as to whether the termination of the Contract Agreement by one Party hereto has been legitimate, both Parties hereto shall endeavour to settle such dispute amicably. The attempt to bring about an amicable settlement is considered to have failed as soon as one of the Parties hereto, after reasonable attempts [which attempt shall continue for not less than 30 (thirty) days], give 15 days' notice thereof to the other Party in writing.
- 6.22.2** In the case of such failure the dispute shall be referred to a sole arbitrator or in case of disagreement as to the appointment of the sole arbitrator to three arbitrators, two of whom will be appointed by each Party and the third appointed by the two arbitrators.
- 6.22.3** The place of the arbitration shall be Gandhinagar, Gujarat.
- 6.22.4** The Arbitration proceeding shall be governed by the Arbitration and Conciliation Act of 1996 as amended.
- 6.22.5** The proceedings of arbitration shall be in English language.
- 6.22.6** The arbitrator's award shall be substantiated in writing. The arbitration tribunal shall also decide on the costs of the arbitration procedure.
- 6.22.7** The Parties hereto shall submit to the arbitrator's award and the award shall be enforceable in any competent court of law

6.23 BOOKS & RECORDS

The selected agency shall maintain adequate Documents Related to project's physical materials & equipment's for inspection and audit by GISL/GIL during the terms of Contract until expiry of the performance guarantee.

6.24 WARRANTY TERMS

In the event that the materials supplied do not meet the specifications and / or are not in accordance with the drawings data in terms of this order, and rectification is required at Site, GISL shall notify the Successful bidder giving full details of difference. The Successful bidder shall attend the Site within seven days of receipt of such notice to meet and agree with representatives of GISL/GIL, the action required to correct the deficiency. Should the Successful bidder fail the attend meeting at Site within the time specified above, GISL/GIL shall be at liberty to rectify the work/materials and Successful bidder shall reimburse GISL/GIL all costs and expenses incurred in connection with such trouble or defect.

6.25 PERFORMANCE GUARANTEE

- 6.25.1** The Selected agency shall furnish Performance Guarantee as provided in the bid document to GISL/GIL for an amount equal to 10% of the value of Order.
- 6.25.2** The performance guarantee will be in the form of bank guarantee for the amount equal of 10% of the value of the Order / LOI towards faithful performance of the contract obligation, and performance of the equipment during Warranty period. In case of poor and unsatisfactory field services, GISL/GIL shall invoke the PBG.
- 6.25.3** The Performance Guarantee shall be valid for a period of 180 days beyond Contract period and shall be denominated in Indian Rupees and shall be in the form of an unconditional Bank Guarantee issued by all Public-Sector Banks / private banks having branch in Gandhinagar\Ahmedabad in the format provided by GISL/GIL to be submitted Within 15 calendar days from the date of final work order.
- 6.25.4** The Performance Guarantee shall be discharged by GISL/GIL and returned to the successful bidder within 30 calendar days from the date of expiry of the Performance Bank Guarantee.

6.26 TERMINATION CLAUSE

6.26.1 Termination by GISL/GIL: GISL/GIL, reserves the right to suspend any of the services and/or terminate this agreement in the following circumstances by giving 30 days' notice in writing if: -

6.26.1.1 The bidder becomes the subject of bankruptcy, insolvency, and winding up, receivership proceedings;

6.26.1.2 In case GISL/GIL finds illegal use of hardware, software tools, manpower etc. that are dedicated to the project;

6.26.1.3 In case the bidder fails to delivered, Installed and commission ordered items within the prescribed time lines and extension granted if any. In such scenario GISL/GIL reserve the right to procure the same from other bidders at the risk, cost and responsibility of the selected agency.

6.26.2 Upon occurrence of an event of default as set out in Clause above, either party will deliver a default notice in writing to the other party which shall specify the event of default, and give the other party an opportunity to correct the default.

6.26.3 Upon expiry of notice period unless the party receiving the default notice remedied the default, the party giving the default notice may terminate the Agreement.

6.26.4 During the notice period, both parties shall, save as otherwise provided therein, continue to perform their respective obligations under this Agreement and shall not, whether by act of omission or commission impede or otherwise interfere with party's endeavour to remedy the default which gave rise to the commencement of such notice period.

6.26.5 The termination hereof shall not affect any accrued right or liability of either Party nor affect the operation of the provisions of the Contract that are expressly or by implication intended to come into or continue in force on or after such termination.

6.27 INDEMNIFICATION

Selected agency will defend and/or settle any claims against GISL/GIL that allege that Bidder branded product or service as supplied under this contract infringes the intellectual property rights of a third party. Selected agency will rely on Customer's prompt notification of the claim and cooperation with our defense. Bidder may modify the product or service so as to be non-infringing and materially equivalent or we may procure a license. If these options are not available, we will refund to Customer the amount paid for the affected product in the first year or the depreciated value thereafter or, for support services, the balance of any pre-paid amount or, for professional services, the amount paid. Bidder is not responsible for claims resulting from any unauthorized use of the products or services. This section shall also apply to deliverables identified as such in the relevant Support Material except that Bidder is not responsible for claims resulting from deliverables content or design provided by Customer.

6.28 LIMITATION OF LIABILITY

Selected agency's cumulative liability for its obligations under the contract shall not exceed the value of the charges payable by the GISL/GIL within the remaining duration of the contract term from the day claim is raised and selected agency shall not be liable for incidental, consequential, or indirect damages including loss of profit or saving.

6.29 CONFIDENTIALITY

6.29.1 Selected agency understands and agrees that all materials and information marked and identified by GISL/GIL as 'Confidential' are valuable assets of GISL/GIL and are to be considered GISL/GIL's proprietary information and property. Selected agency will treat all confidential materials and information provided by GISL/GIL with the highest degree of care necessary to ensure that unauthorized disclosure does not occur. Selected agency will not use or disclose any materials or information provided by GISL/GIL without GISL/GIL's prior written approval.

- 6.29.2** Selected agency shall not be liable for disclosure or use of any materials or information provided by GISL/GIL or developed by selected agency which is:
- 6.29.2.1 possessed by selected agency prior to receipt from GISL/GIL, other than through prior disclosure by GISL/GIL, as documented by selected agency's written records;
 - 6.29.2.2 published or available to the general public otherwise than through a breach of Confidentiality; or
 - 6.29.2.3 Obtained by selected agency from a third party with a valid right to make such disclosure, provided that said third party is not under a confidentiality obligation to GISL/GIL; or
 - 6.29.2.4 Developed independently by the selected agency.
- 6.29.3** In the event that selected agency is required by judicial or administrative process to disclose any information or materials required to be held confidential hereunder, selected agency shall promptly notify GISL/GIL and allow GISL/GIL a reasonable time to oppose such process before making disclosure.
- 6.29.4** selected agency understands and agrees that any use or dissemination of information in violation of this Confidentiality Clause will cause GISL/GIL irreparable harm, may leave GISL/GIL with no adequate remedy at law and GISL/GIL is entitled to seek to injunctive relief.
- 6.29.5** GISL/GIL does not follow the practice of asking Confidential Information of selected agency, however if any confidential information is required/shared by the selected agency then selected agency has to clearly marked it as "Strictly confidential". GISL/GIL in turn will not share the same without prior concern of the selected agency.
- 6.29.6** Above mentioned "confidentiality clause" shall be applicable on both the parties i.e., GISL/GIL and selected agency.

6.30 PAYMENTS TERMS

6.30.1 PAYMENTS TERMS for

Schedule- I: Setting up of core Wi-Fi infrastructure at central level

Schedule- II To provide warranty, AMC & O&M Support for 5 years and facilitate GISL for DoT, GoI, GoG Compliance

As per the scope of work successful bidder is required to successfully demonstrate the proposed solution. Further, any type of expenses related with the demonstration will not be paid or reimburse by the GISL/GIL.

As mentioned above, following payment terms will be applied:

S/n	Activity	% of Payment
1	Payment for Schedule-I & II of Price Bid.	
	Successful Delivery and Inspection (as per the delivery schedule)	60% of the sum total of schedule I.a, I.c & 1.d of Price bid
	Successful Commissioning and FAT	30% of the sum total of schedule I.a, I.c & 1.d of Price bid
	Successful Delivery, Inspection, Commissioning and FAT of Access points (I.b)	90 % of the sum total of schedule I.b of Price bid. Payment will be released in a smaller lot of 1000 access points also.

	Balance 10% Payments	10% to be divided in 20 quarterly installments and will be paid along with O&M Payment for I.a, I.b, I.c and I.d.
2	Payment for Schedule- II of Price Bid	
	Operational & Maintenance support during the contract period of 5 years	20 equal Quarterly Installments after the end of each quarter

Payment Procedure:

6.30.1.1.1 Solution Component (Supply, Installation & Commission of Central Infrastructure)

- The selected agency shall raise the component wise invoice as per the milestones achieved as mentioned above in the payment schedule and submit the invoice to GISL/GIL.
- GISL/GIL shall verify the Invoices raised against the milestone achieved and shall make the payment.
- The selected agency's request(s) for payment shall be made to GISL/GIL along with the 2 original copies of invoices and necessary documents. The invoice should be in English.

6.30.1.1.2 O&M Component

- Once the bidder completes the installation, commissioning and FAT of 7200 (90%) nos. of Access points of total 8000 Access points (I.b.) along with Central Infrastructure with 5 years' warranty (I.a.) of Schedule I of price bid; O&M period of the whole project will start and bidder may raise the invoice for schedule II of the price bid accordingly.
- The payments to the selected agency will be made quarterly at the end of each quarter on acceptance of the invoice by the GISL/GIL or its designated agency.
- The invoice would be processed for release of payment within 45 days after due verification of the invoice and other supporting documents by GISL/GIL or its designated agency.

6.30.1.1.3 Payment shall be made in Indian Rupees. While making payment, necessary income tax and service tax deductions will be made.

6.31 SERVICE TERMS

- 6.31.1** The entire scope of the work depends on the technical skill and experience in management of the same level or kind of infrastructure.
- 6.31.2** It is mandatory for Bidder to deploy qualified professional to install, commission & maintain the proposed Network, as defined under scope of work.
- 6.31.3** Bidder is required to arrange its own equipment such as Laptops, work stations, Printers etc. to facilitate the operation as per the scope mentioned in this RFP.
- 6.31.4** The Bidder has to submit regular schedule of man power availability & get it approved by GISL, before deployment.
- 6.31.5** The successful bidder has to deploy necessary problem escalation process and system to take care users at priority.
- 6.31.6** The successful bidder is free to deploy or to develop applications to facilitate the operation. GISL will welcome the deployment such application in respect to improve Quality of Services.
- 6.31.7** For extending better services to the government, the successful bidder will be allowed to deploy and use own tested and proven solution, with prior permission form the Tenderer.
- 6.31.8** The Bidder will have to carry out reinstallation of any of the equipment 'Free of Cost, if required.

- 6.31.9** The Bidder need to manage & maintain various records related to the services extended to the Government.
- 6.31.10** If required, the Bidder may need to coordinate and approach various agencies working for GISL and GIL.
- 6.31.11** The Bidder needs to maintain the required security of the network as per the DoT, GoG, GoI/GISL/GIL Security guidelines.
- 6.31.12** The Bidder is responsible to maintain documentation on the progress of the work and will have to update the same on regular basis. Successful bidder will have to submit the progress reports regularly, as per the guide line issued by GISL/TPA.
- 6.31.13** In case of failure of any system or equipment, the Bidder needs to replace or repair the faulty part/component/device to restore the services at the earliest. The cost of the repairing or replacement of faulty Cable/component/device has to be entirely born by the Bidder.
- 6.31.14** All expenses related to cable/component/device, including hiring of specialized technical expertise, in case required, has to be borne by the Bidder as part of Contract Agreement.
- 6.31.15** Bidder shall submit test procedures covering various test cases and expected results of these tests relating to various systems being commissioned for the network.
- 6.31.16** The escalation of the rate during the rate contract is not permitted.

6.32 WARRANTY SUPPORT

- 6.32.1** Bidder shall provide a comprehensive warranty and on-site free service warranty for 5 years from the date of FAT for all equipment's.
- 6.32.2** Bidder shall provide the comprehensive manufacturer's warranty and support in respect of proper design, quality and workmanship of all hardware, equipment, accessories etc. covered by the RFP. Bidder must warrant all hardware, equipment, accessories, spare parts, software etc. procured and implemented as per this RFP against any manufacturing defects during the warranty period.
- 6.32.3** Bidder shall provide the performance warranty in respect of performance of the installed hardware and software to meet the performance requirements and service levels in the RFP.
- 6.32.4** Bidder is responsible for sizing and procuring the necessary hardware and software licenses as per the performance requirements provided in the RFP. During the warranty period bidder shall replace or augment or procure higher-level new equipment or additional licenses at no additional cost in case the procured hardware or software is not adequate to meet the service levels.
- 6.32.5** Mean Time between Failures (MTBF): If during contract period, any equipment has a hardware failure on four or more occasions in a period of less than three months, it shall be replaced by equivalent or higher-level new equipment by the bidder at no cost. For any delay in making available the replacement and repaired equipment's for inspection, delivery of equipment's or for commissioning of the systems or for acceptance tests / checks on per site basis, GISL/GIL reserves the right to charge a penalty.
- 6.32.6** During the warranty period bidder shall maintain the systems and repair / replace at the installed site, at no charge, all defective components that are brought to the bidder's notice.
- 6.32.7** The bidder shall as far as possible repair/ replace the equipment at site.
- 6.32.8** Warranty should not become void, if GISL/GIL buys, any other supplemental hardware from a third party and installs it within these machines under intimation to the bidder. However, the warranty will not apply to such supplemental hardware items installed.
- 6.32.9** Bidder shall have to stock and provide adequate onsite and offsite spare parts and spare component to ensure that the uptime commitment as per SLA is met.

6.32.10 Any component that is reported to be down on a given date should be either fully repaired or replaced by temporary substitute (of equivalent configuration) within the time frame indicated in the Service Level Agreement (SLA).

6.33 SERVICE LEVEL AND PENALTY CLAUSE for Part A: Setting up of Central Infrastructure:

Successful Bidder shall be paid Quarterly Payment (QP) as per the services provided to GISL/GIL. The overall penalty would be generally capped at 15% of QP amount and will be recovered against the quarterly payment invoice submitted by the selected agency. If the cap of overall penalty is reached in two consecutive quarters, the penalty cap for the third quarter onwards, for each quarter will increase by 5% over the penalty cap for the preceding quarter till it reaches 35% of the QP. In addition to the applicable penalty and the provisions pertaining to closure/termination of contract the GISL/GIL shall be within its rights to undertake termination of contract if or anytime the penalty reaches to **20** % of the QP. Once the penalty cap has increased beyond 15%, if the bidder through better performance delivery for any quarter, brings the leviable penalty below 15% then the computation of the 1st of the 2 consecutive quarters as referred above will reset and will begin afresh. Availability will be calculated on a quarterly basis.

S/n	Activity	Target	Penalty
1	Availability and Reachability of Central Infrastructure	99.99%	a) 99.99% or Better= NIL b) 99.00% to 99.99%=1 % of QP c) 98.00% to 98.99% = 2 % of QP d) less than 98% = 3 % of QP
2	Availability and Reachability of Edge District Routers	99.00 %	a) 99.00 % or Better= NIL b) 98.50 to 98.99 % =1 % of QP c) 98.00 % to 97.49% = 2 % of QP d) less than 98% = 3 % of QP
3	Availability and Reachability of Edge Infrastructure and District Routers	98.00 %	a) 98% or Better= NIL b) 97.99% to 97.50%=0.25% of QP c) 97.49% to 97% = 0.50% of QP d) less than 97% = 0.75% of QP
4	Availability of Captive Portal/Web Portal, Mobile Application and its services from locations/External Devices	99.99%	a) 99.99% or Better= NIL b) 99.00% to 99.99%=1 % of QP c) 98.00% to 98.99% = 1.25 % of QP d) less than 98% = 1.50 % of QP
5	Misuse, hack and Compromise of GISL Captive Portal, Mobile Application, User's database, web server and any other supplied hardware, system software and services components.		One or more incidents = Rs. 50, 000/- per incident or 1 % of QP per incident whichever is higher will be imposed
6	Delay in closure of vulnerabilities identified if any (in days).		a) Upto 5 days= NIL b) >5 Days and <10 days= 0.25 % of QP. c) >=10 days and < 20 days = 0.50% of QP. d) >=20 Days for every 0.25% for every delay of 5 days.

7	Delay or Non submission of Various MIS reports & compliance report as per requirement as mentioned in RFP		Rs. 1000 per instance report
8	Not submitting Quarterly 1 % Customer Feedback Reports (location: Only Installed Access Point)		1 % = NIL 0.75 to 0.99 % = Rs. 50,000 < 0.75 % = Rs. 1,00,000
9	Core Infrastructure including districts routers packet loss - <= 1%	Successful bidder has to analyze report, escalate and get the issue resolved within 3 hours	Rs. 1500 per hour, per instance or part thereof.
10	Core Infrastructure including district devices & Edge Devices - Latency < =50 ms	bidder has to analyze, report, escalate and get the issue resolved within 12 hours	Rs. 1500 per hour, per instance or part thereof.
11	Not Resolved the Complaints for central locations		Within 4 hours= NIL More than 4 hours = Rs. 5000/- . Every 4 hours= Rs. 5000/-
12	Faulty part/device replacement at central location		Within 24 hours= NIL More than 24 hours = 0.25 % of QP per day
13	Not Resolved the Complaints for field locations		Within 24 hours = NIL More than 24 hours = Rs. 500 per village location. Every 24 hours = Rs. 500/- per village location
14	Faulty part/device replacement at filed location		Within 48 hours = NIL More than 48 hours = Rs. 1000 per village/edge location. Every 24 hours = Rs. 1000/- per village/edge location
15	Not sync Mobile Application & Captive Portal		Within 24 hours= NIL More than 24 hours= Rs. 5000/- Per Incident. Every 24 hours= Rs. 5000/-

6.33.1 PENALTY FOR DELAY in implementation

S/n	Activity	Timeline	Penalty
1	Delay in Delivery/Supply of solution	As per implementation timelines clause of this RFP Document	0.5% of Contract value of delayed item (as per Schedule-I of Price BID) per week or part thereof for delay in delivery (Delay beyond 12 weeks from Schedule timeline, GISL/GIL reserve right to terminate the contract and Forfeit the PBG).

2	Delay in Development/ Customization, integration of proposed solution, central including districts and edge infrastructures	As per implementation timelines clause of this RFP Document	0.5% of Contract value of delayed item (as per Schedule-I of Price BID) per week or part thereof (Delay beyond 6 weeks from Schedule timeline, GISL/GIL reserve right to terminate the contract and Forfeit the PBG).
3	Delay in Installation/ Implementation including Commissioning and FAT	As per implementation timelines clause of this RFP Document	0.75% of Contract value of delayed item (as per Schedule-I of Price BID) per week or part thereof for delay in Implementation including Commissioning and FAT (Delay Beyond 8 weeks from Schedule timeline, GISL/GIL reserve right to terminate the contract and Forfeit the PBG)

Note: Maximum Penalty cap for above is 15% of Schedule-I & II of the price bid .

6.33.2 If GISL/GIL fails to provide space and related clearances to carry out the job as per the agreement terms, as a result of which the installation of the equipment is delayed and the selected agency is not able to adhere to the schedule for completing the Acceptance Tests. Delay solely on account on above will not be accounted while ascertaining actual delay.

6.33.3 PENALTIES FOR NOT KEEPING MAN-POWER: If selected bidder does not deploy the required specified quantity & quality manpower as defined in the RFP document or a person deployed is not reporting to the duty at the Data Centre, there would be a penalty of Rs. 3,000/- per person per day for Central level and Rs. 1,000/- per person per day for Edge Location. It will be deducted from the quarterly payment subject to a cap of 15% of the quarterly payment.

Note:

- Selected agency has to provide attendance Report of all manpower deployed on monthly basis, within the 1st week of the subsequent month. However, in case of delay in submission of the same a penalty of Rs. 1,000/- per week or part thereof shall be levied.

6.33.4 OPERATIONAL PENALTY: The selected agency shall be responsible for repair/ replace all faulty material covered under the warranty within the shortest possible time thus ensuring minimum downtime.

6.33.4.1 The selected agency shall be responsible for maintaining the desired performance and availability of the system/services. Selected agency should ensure the prompt service support during warranty period. If any complain is made or auto alarm/instances is generated by the system for non-availability of the items/service covered under the scope of work, then it has to resolve as per SLA timeline from the time of complaint raised/auto alarm or instance generated by the system.

6.33.4.2 A penalty of Rs. 1000/- for complain made or auto alarm/instances is generated by the system for non-availability of the items/service shall be levied for every 12 hours of delay or part thereof.

Note: Maximum operational Penalty cap of 15% per quarter of quarterly payment (as per Schedule-II of the price bid).

6.34 APPROVALS/CLEARANCES

6.34.1 Necessary approvals/ clearances concerned authorities, for establishing the proposed project are to be obtained by the Selected agency.

- 6.34.2** Necessary approvals/ clearances from concerned authorities, as required, for fire protection, government duties / taxes are to be obtained by the Selected agency.
- 6.34.3** Necessary approvals / clearances, from concerned authorities for “Right of way”, as required, are to be obtained by the selected agency for laying their own cables to meet system requirements.
- 6.34.4** Necessary approvals/ clearances from DoT, GoG, Gol, TEC, TRAI, concerned authorities, any service provider, for establishing the network and connecting different Network elements/ any service provider’s circuits, shall be obtained by the selected agency.

6.35 PROJECT IMPLEMENTATION for Part A: Setting up of Central infrastructure:

- 6.35.1** GISL/Designated Officer shall be appointed for the Project and all inspection, installation, commissioning, and acceptance of work will be audited by third party auditor. All Invoices, Quarterly payment, Vouchers, Bills for supplied goods and services by the Successful bidder under the scope of the work will be verified measured and accepted by the GISL/TPA/DST/Designated Agency, for release of payment.
- 6.35.2** As part of implementation, the successful bidder shall provide details of equipment that will be incorporated in the proposed system, material and manpower as required. The location for storing spare parts and quantity there on should also be clearly indicated.
- 6.35.3** The successful bidder will implement the project strictly as per the plan approved by GISL/GIL. The successful bidder shall install and implement the proposed system at such locations as may be selected by GISL/GIL as per the project timeline.
- 6.35.4** The Successful bidder shall provide the necessary technical support, Standard Operating Procedure (SOP) and other information to GISL/GIL and its users in and after implementing the proposed system. GISL at any time during the currency of the Agreement should have access to the proposed content.
- 6.35.5** The successful bidder shall arrange to obtain all statutory and regulatory permission (If any) at no cost to the Government of Gujarat.
- 6.35.6** The successful bidder may have to work during Holidays and Sundays, according to the urgency of work. The successful bidder will obtain such permission on his own in consultation with the Engineers-in-charge. It will be the responsibility of the Successful bidder to co-ordinate with all other agencies of Government of Gujarat in order to obtain NOC required to execute the job.
- 6.35.7** The Successful bidder shall not disturb or damage the existing network of communication. If in case any damage to the network is done, the same shall be corrected with no extra cost. The successful bidder will also be responsible for paying penalty, as imposed by the service owner to which the damage is incurred.
- 6.35.8** Successful bidder shall treat all matters connected with the contract strictly confidential and shall undertake not to disclose, in any way, information, documents, technical data, experience and know how, without prior written permission from GISL.
- 6.35.9** Any damage caused to the property of Government of Gujarat while executing the job shall be solely Successful bidder 's responsibility. In case any damage to the property is caused, the same will be recovered from the Successful bidder.

6.36 THIRD PARTY AGENCY

GISL may appoint/designate a Third Party agency for IT Infrastructure projects, which would monitor the project, which would monitor the project during implementation, commissioning and operation. The Third Party will also conduct Final Acceptance Test as per the technical requirement of the Agreement and will issue the Certificate of Completion of each proposed Site. Third Party will verify the services provided by the successful bidder under the agreement. The successful bidder will co-operate with such Third Party.

6.37 FRAUDULENT AND CORRUPT PRACTICES

- 6.1.1** Fraudulent practice means a misrepresentation of facts in order to influence a procurement process or the execution of a Contract and includes collusive practice among Bidders (prior to or after Bid submission) designed to establish Bid prices at artificial non-competitive levels and to deprive the GISL of the benefits of free and open competition.
- 6.1.2** “Corrupt Practice” means the offering, giving, receiving or soliciting of anything of value, pressurizing to influence the action of a public official in the process of Contract execution.
- 6.1.3** GISL will reject a proposal for award and may forfeit the EMD and/or Performance Bank Guarantee if it determines that the bidder recommended for award has engaged in corrupt or fraudulent practices in competing for, or in executing, contract(s).

6.38 MIS REPORTS:

- 6.1.4** Bidder is required to submit various MIS reports to GISL in support of SLA compliance along with its quarterly invoice and as and when asked by the GISL. Following is the minimum indicative list of type of MIS reports to be submitted by bidder:

S/n	Activity	Periodicity
1	Bandwidth utilization per Internet link, AP, districts, zone, overall. Etc.	Daily
2	Total No. of users connected	
3	Availability of Access Points, AP Installation Report	
4	Ageing Report of issues/Incidents	
5	Online Payment and Reconciliation Report	
6	Total number of Incident reports (Open, Close, Pending)	
7	Bandwidth Utilization. Supplied Device Installation Reports	Weekly
8	CRM related various reports, Payment Collection against various tariff charges, Reports on successful/unsuccessful authentication, Recharges, OTP/SMS delivery, Inventory Report	Monthly
9	AP Installation Report	
10	Man-Power Reports and Online	
11	SLA compliance reports	Quarterly
12	Preventive maintenance reports	
13	Configuration change reports. Supplied Device Installation Report	
14	Inventory reports, Periodic back-up of all devices and as when changes in the configuration. Change Management Report	
15	Link Availability, Downtime, Usage/Utilisation, Fault & rectification, Performance statistics-AP & Network both, Log of Network parameters along with Service down time and % uptime achieved, System vulnerability Reports, Health Reports, FAT/Installation Report, OEM reports: End of Life and End of Sale Report of supplied solution if any, Preventive Maintenance Report, SOP and Documents update Reports, Man Power Reports	
16	Customize Revenue Generation Report, Customer Feedback Reports. Inventory Reports, Payment Reconciliation Report	
	Mobile Application and Captive Portal Sync Report, Firmware/Security Patches/ Update of all supplied hardware and Software Report, GOI/GOG/DOT Compliance Report, Required RFP Reports	

17	Submit Quarterly meeting report with GISL Board for project review and submit action Taken Report, All Internet link utilization Report, All Reports as asked in the RFP. Pending Issue Reports	As and when required
18	ISP Performance Report (Under/Over utilization, System Improvement process, Suggestion/Inputs for ISP service...etc)	
19	Report on Website, Application, Contents visited on Internet by Users in lawful manner, SOP of all components, Submit periodic internal VAPT reports.	
20	Any other reports	

Note: Mentioned reports should be available in NMS/CRM for online verification. Create a custom page in the system where GISL/DST can see all reports as per RFP requirement.

6.39 ACCEPTANCE TESTS

Acceptance Test will be conducted in as follows:

- 6.1.5** GISL reserves the right to inspect goods and services supplied as per the scope of this RFP document. The cost of all such tests shall be borne by the Vendor. Any inspected goods fail for confirm to the specification will be rejected, and Vendor shall have to replace the rejected goods as per the contract specification without any financial implication to the GISL.
- 6.1.6** Final Acceptance Test (FAT): After successful installation of the System in accordance with the requirements as mentioned in Schedule of Requirement, Final Acceptance Test will be conducted. After successful testing, Acceptance Test Certificate will be issued by GISL/its designated agency to the Vendor.
- 6.1.7** The date on which Acceptance certificate is issued shall be deemed to be the date of successful commissioning of the System.
- 6.1.8** Any delay by the Vendor in the Acceptance Testing shall render the Vendor liable to the imposition of appropriate Penalties.
- 6.1.9** Bidder is required to update the details of Hardware installed in the Assets Master of NMS and IWDMS before completion of FAT.

6.40 COPYRIGHT AND INTELLECTUAL PROPERTY RIGHTS

- 6.1.10** GISL/GIL will have exclusive right to use and own the application software (as customized from time to time), its source code along with further development rights and its derivatives
- 6.1.11** The source code of the software shall be provided to GISL/GIL on completion of the Project and GISL shall have all the rights to use/modify /enhance/ derive the source code. GISL/GIL will not use the source code submitted by the selected agency for any type of commercial purpose.
- 6.1.12** No software or services covered by the contract shall be developed or done by the company in violation of any right whatsoever of third party, and in particular, but without prejudice to the generality of the foregoing of any patent right, trademark or Similar right, or of any charge, mortgage or lien. Vendor will indemnify GISL/GIL for all such correspondence.

1.d	BSS+OSS+CRM- Software for Wi-Fi, FTTX, Hybrid Services Users with full featured, customizable during the contract period.	01 Lot	
Total (Schedule-I)			

Schedule-II

S/n	ITEM	Total Price for 5 Year O&M with GST
Schedule-II		
1	Operation and Maintenance Charges as per the scope of work for Schedule-I	

Grand Total (Schedule I + II)	
--------------------------------------	--

Note:

1. L1 will be the lowest sum total of rates of all line items with tax.
2. The rates should be inclusive of all taxes. Bidder is required to submit the applicable taxes taken in to account while submitting their bid for each component.
3. Actual Order quantities may vary depending upon the actual requirements.
4. Bidder is required to submit the detailed BoM for each line item along with the component wise pricing for the Schedule-I and II of the Price Bid.
5. The rates quoted would be valid for a period of 2 year from the date of issuance of work order & additional offline order will be placed based on the requirement raised as per quoted price.
6. The bidder has to provide single make & model of each line item along with required supporting documents, in the technical solution document.
7. GISL may increase the number of routers if required.
8. Operations and maintenance cost (Schedule-II) for 5 years to be quoted by the bidder should not be less than 20% of sum total of Schedule-I.
9. Non-acceptance of the above condition(s) or Conditional bid shall be rejected.
10. After technical demonstration, There will a technical presentation for eligible bidders. In the technical presentation those who gets 60 % or more percentage will be short- listed for opening of price bid
11. Operation & Maintenance contract for 60 months (5 years). Department of Science and technology/GISL may extend the contract period up to 2 Year (24 Months) after completion of 5 years (60 months) O&M contract if require. DST/GISL shall have the final authority for extension of contract period.
12. GISL/DST may use quoted rates in the RFP for expanding the project area and other projects i.e Campus, Urban Wi-Fi, Science City, Various Government Events. etc.

SECTION-VIII
Annexures & Formats

Annexure I: Proposal Covering Letter

(To be on the Bidder's letterhead duly Signed by Authorized Signatory)

Tender Ref No:

To

DGM (Tech)

Gujarat Informatics Ltd

Block no. 1, 8th floor, Udyog Bhavan,

Sector-11, Gandhinagar

Dear Sir,

We (Name of the bidder/ Consortium) hereby submit our proposal in response to notice inviting tender date and tender document no. and confirm that:

1. All information provided in this proposal and in the attachments, is true and correct to the best of our knowledge and belief.
2. We shall make available any additional information if required to verify the correctness of the above statement.
3. Certified that the period of validity of bids is 180 days from the last date of submission of proposal, and
4. We are quoting for all the items (including services) as per the price bid format Section-VII as mentioned in the RFP.
5. We the Bidder /Consortium are not under a declaration of Ineligibility for corrupt or fraudulent practices or blacklisted by any of the Government agencies.
6. We have an office in the state and relevant documents for the same are attached. We undertake that if the local presence is not there in the state, that we shall establish an office in the state capital at Gandhinagar, within one month of the award of contract.
7. Gujarat Informatics Limited may contact the following person for further Information regarding this tender:
-
 - a. Name & Designation:
 - b. Full address of office
 - c. Email ID & Contact No.
8. We are uploading our Response to the RFP (Eligibility, technical and financial bid documents) as per the instructions set out in this RFP.

Yours Sincerely,

Sector-11, Gandhinagar

Whereas ----- (here in after called "the Bidder") has submitted its bid dated ----- in response to the Tender no: XXXXXXXXX for ----- KNOW ALL MEN by these presents that WE ----- having our registered office at ----- (hereinafter called "the Bank") are bound unto the -----, Gujarat Informatics Limited in the sum of ----- for which payment well and truly to be made to Gujarat Informatics Limited, the Bank binds itself, its successors and assigns by these presents. Sealed with the Common Seal of the said Bank this -----day of ----- ---- 2022.

THE CONDITIONS of this obligation are:

The EMD may be forfeited, In case of a Bidder if:

- 1) The bidder withdraws its bid during the period of bid validity.
 - a. The Bidder does not respond to requests for clarification of their Bid.
 - b. The Bidder fails to co-operate in the Bid evaluation process.
 - c. The bidder, fails to furnish Performance Bank Guarantee in time.
- 2) The bidder fails to Sign the contract in accordance with this RFP
- 3) The bidder is found to be involved in fraudulent and corrupt practices

We undertake to pay to the GISL/GIL up to the above amount upon receipt of its first written demand, without GISL/GIL having to substantiate its demand, provided that in its demand GISL/GIL will specify that the amount claimed by it is due to it owing to the occurrence of any of the above-mentioned conditions, specifying the occurred condition or conditions.

This guarantee will remain valid up to 6 months from the last date of bid submission. The Bank undertakes not to revoke this guarantee during its currency without previous consent of the GISL/GIL and further agrees that the guarantee herein contained shall continue to be enforceable till the GISL/GIL discharges this guarantee

The Bank shall not be released of its obligations under these presents by any exercise by the GISL/GIL of its liability with reference to the matters aforesaid or any of them or by reason or any other acts of omission or commission on the part of the GISL/GIL or any other indulgence shown by the GISL/GIL or by any other matter or things.

GUJARAT INFORMATICS LIMITED
BLOCK NO. 2, 2nd FLOOR, KARMAYOGI BHAVAN, SECTOR-10A, GANDHINAGAR

The Bank also agree that the GISL/GIL at its option shall be entitled to enforce this Guarantee against the Bank as a Principal Debtor, in the first instance without proceeding against the SELLER and not withstanding any security or other guarantee that the GISL/GIL may have in relation to the SELLER's liabilities.

Dear Sir,

WHEREAS..... (Name of Bidder) hereinafter called "the Bidder" has undertaken, in pursuance of Agreement dated, (hereinafter referred to as "the Agreement for "Request for proposal (RFP) for Selection of agency for Supply, Installation, Commissioning and Operations & Management of Core & Edge Wi-Fi Infrastructure On behalf of Gujarat ISP Services Limited (GISL).", for the M/s Gujarat ISP Services Limited ("GISL")

AND WHEREAS it has been stipulated in the said Agreement that the Bidder shall furnish a Bank Guarantee ("the Guarantee") from a scheduled bank for the sum specified therein as security for implementing PROJECT.

1. WHEREAS we _____ ("the Bank", which expression shall be deemed to include its successors and permitted assigns) have agreed to give the Gujarat ISP Services Limited ("GISL") the Guarantee:

THEREFORE, the Bank hereby agrees and affirms as follows:

The Bank hereby irrevocably and unconditionally guarantees the payment of all sums due and payable by the Bidder to GISL/GIL under the terms of their Agreement dated _____. Provided, however, that the maximum liability of the Bank towards GISL/GIL under this Guarantee shall not, under any circumstances, exceed _____ in aggregate.

2. In pursuance of this Guarantee, the Bank shall, immediately upon the receipt of a written notice from GISL/GIL in that behalf and without delay/demur or set off, pay to GISL/GIL any and all sums demanded by GISL/GIL under the said demand notice, subject to the maximum limits specified in Clause 1 above. A notice from GISL/GIL to the Bank shall be sent by Registered Post (Acknowledgement Due) at the following address:

Attention Mr. _____.

3. This Guarantee shall come into effect immediately upon execution and shall remain in force for a period of ___ months from the date of its execution. The Bank shall extend the Guarantee for a further period which may mutually be decided by the bidder and GISL/GIL.

The liability of the Bank under the terms of this Guarantee shall not, in any manner whatsoever, be modified, discharged, or otherwise affected by:

- Any change or amendment to the terms and conditions of the Contract or the execution of any further Agreements.
 - Any breach or non-compliance by the Bidder with any of the terms and conditions of any Agreements/credit arrangement, present or Future, between Bidder and the Bank.
4. The BANK also agrees that GISL/GIL at its option shall be entitled to enforce this Guarantee against the Bank as a Principal Debtor, in the first instance without proceeding against the BIDDER and not

withstanding any security or other guarantee that GISL/GIL may have in relation to the Bidder's liabilities.

5. The BANK shall not be released of its obligations under these presents by reason of any act of omission or commission on the part of GISL/GIL or any other indulgence shown by GISL/GIL or by any other matter or thing whatsoever which under law would, but for this provision, have the effect of relieving the BANK.
6. This Guarantee shall be governed by the laws of India and the courts of Ahmedabad shall have jurisdiction in the adjudication of any dispute which may arise hereunder.
